

FORMER LIBRARIAN OF BELGIUM IS NOW REFUGEE IN HOLLAND

(By Associated Press)

THE HAGUE, Nov. 2.—Holland, which refused to surrender the former German emperor to the Allies for trial, has another knotty problem in a demand from the Belgian government for the extradition of Professor de Vreeze, formerly librarian of Ghent university, a political refugee, and no librarian at Rotterdam.

Professor de Vreeze is one of the Flemish Belgians who during the German occupation of their country sought with German aid, to separate Flanders, the Dutch-speaking part of Belgium, from the French-speaking part. Many of them, when the armistice showed Germany beaten, fled to Holland. In their absence, they were convicted of treason and some of them are under sentence of death. Professor de Vreeze is accused as a leading "activist" in the Flemish separation movement. Considering this a political offense and therefore not extraditable, the Dutch government would not give him up.

Relations Already Strained.

Now, at a time when relations between Holland and Belgium are strained because of commercial treaty complications and the renewed efforts of Belgian-Flemish activities towards the separatist movement, Belgium has demanded the extradition of De Vreeze, this time on grounds, which, if proved, Holland might consider, while it would not consider a political offense.

The charge, however, is only that Professor de Vreeze used for fuel at his house in Ghent some government property, such as old boxes, old books and some coal which were on the premises of the library at Ghent.

It is hinted in Holland that this is only a subterfuge to get the professor across the frontier.

The Dutch government has named a commission to decide the case.

Mr. and Mrs. Newton Helms Celebrate Wedding Day

Mr. and Mrs. Newton Helms celebrated their thirteenth wedding anniversary on Sunday, Oct. 31. The reception rooms were beautifully decorated with chrysanthemums and Hallow'en colors.

Several useful gifts were received. A bountiful dinner was served to the following guests: Mr. and Mrs. Luther Thomas, Mr. and Mrs. Joseph Helms, Mr. and Mrs. Joseph Henley, Mr. and Mrs. William Slade, Mr. and Mrs. Murray Colvin, Mr. and Mrs. Everett Helms, Mr. and Mrs. Perry Rude and son, Robert, Mr. and Mrs. Raymond Helms and children, Virginia and Maurice, Mr. and Mrs. Earl Campbell, Misses Hazel Colvin, Amy Evans, Margaret Taggart, Zelma Slade, Esther Helms, Helen Eachus, Lucile Helms, Mary Rupe, Helen Hiatt of Winchester, Ind., Messrs. Chester Helms, Robert Justice, Erman Helms, Raymond Slade, Murray Helms, Robert Sudoff, Ralph Helms, Merle Cully, Herschel Helms, Paul Campbell and Myron Helms.

Romance in Penitentiary Culminates in "Elopement"

(By Associated Press)

MILLEDGEVILLE, Ga., Nov. 2.—Officials at the state penitentiary here have announced that J. W. Gans, a guard at the women's building, and Juanita Weaver, a prisoner, quietly "eloped" late Saturday night.

Juanita was serving a sentence of one year for shoplifting, having been convicted in Atlanta last May. She is described as being about 21 years old and a blonde.

First New York-Cuba Mail Airplanes Land in Havana

(By Associated Press)

HAVANA, Nov. 2.—Two airplanes the nucleus of a future passenger-mail service between New York and Cuba, arrived from Key West yesterday, having left New York Saturday last.

A UNIQUE AND STYLISH DESIGN

Pattern 3369 supplies this model. It is cut in 7 sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure.

A 38 inch size will require 6½ yards of 36 inch material.

The width of the skirt at lower edge is about 1½ yards.

Brocade and embroidery stitches are here used for a decoration on serge. The design may be carried out on velvet or silk. Duvetyn, broadcloth, tricotine, tricotine, faille and crepe de nœud are fine for this model.

To Be Inducted as Wittenberg's Head

Dr. R. E. Tulloss

On Nov. 5, Dr. R. E. Tulloss is to be inducted into office as the seventh president of Wittenberg college, Springfield, Ohio. Two Richmond men are members of the Wittenberg board.

Dr. Tulloss entered Wittenberg college at the age of twenty. Not only did he make an enviable record as a student but he built up, coincident with his college course, the Tulloss School of Typewriting, working his way through college and winning business success at the same time. After who served since 1902.

Honey is Considered Necessity; Used as Substitute For Sugar

(By Associated Press)

INDIANAPOLIS, Nov. 2.—Honey is now being looked upon as a necessary food rather than a luxury in the opinion of C. O. Yost, state apriary inspector for the department of conservation. The slump in the price of sugar, the only competitor of honey, will not greatly affect the honey market Mr. Yost believes.

Thousands of persons turned to honey as a substitute for sugar during the unprecedented prices of that commodity during the last year Mr. Yost points out and now they have become permanent users of honey. Beekeepers have every prospect of disposing of the product of their apriaries at advantageous prices, he believes.

Work necessary for the proper wintering of bee colonies in order that the bees will emerge next spring vigorous and healthy is outlined in a letter which the state apriary inspector has prepared. The suggestions in the letter follow:

"Many features enter into the successful wintering chief of which are to have a large number of young bees in the hive in the fall, to be sure the colonies have sufficient stores, protect the bees by good windbreaks, provide plenty of room for spring brood rearing and insuring protection to colonies by properly packing the hives with insulating material.

Conserve Bee Energy.

"The prime objects of packing is the conservation of bee energy, bringing the bees out in the spring with as much energy and strength as far as possible in the law of nature as was possessed by them when they entered their winter rest. It is assumed that all beekeepers understand quite well that bees do not hibernate or become dormant or frozen up like some other of nature's creatures. Instead they maintain a comfortable temperature and remain active during the coldest weather, unless the cold is severe enough to overcome and freeze them. To do this they must generate heat and the amount of heat generated depends upon the amount of cold entering their hive and vicinity of the cluster; also conditions of hive packing, entrance, etc., which may afford an escape for the warm air in the hive as an entrance of the cold. The generation of the heat within the hive is brought about entirely by the activities of the bees.

Hives should face the east or south. For protection from winds, a good hedge or shrubs will provide an ideal condition. Fodder also may be shocked and fastened to the fence on the west and north sides. Avoid a solid wind break, and if the hives are placed before a solid board fence, it is better to remove every other panel. Packing of the hives with insulating material is put on after the first heavy frost, and four inches of packing beneath the hives, six inches on the sides and eight inches on the top has been found to work admirably.

Don't Clog Entrance.

A good insulating material is ground cork, chaff, shavings, or saw-dust. Between this packing and the bees there may be placed a burlap sack or an escape board (be sure to take out the escape and cover the hole with wire to allow moisture to escape into the packing). Don't use any oilcloth or tight board cover. Contract the entrance to one or two inches long and three-eighths inches deep. A box may be fitted around the hive (waterproof top) and filled with some packing material. Don't clog the entrance.

"Colonies setting in sheds may be boxed in and buried in chaff, etc. The entrance should be left open. Quadruple cases if properly packed and entrance trouble overcome, are valuable. Cellars, dark and ventilated, retain temperature of about 48 degrees.

result of diffusion of the knowledge that Guatemala has a safe and sane government, is a fit place to live in and has much territory yet undeveloped.

Test Locomotive Sparks At Purdue University

(By Associated Press)

LAFAYETTE, Ind., Nov. 2.—Elaborate tests to obtain data on sparks thrown out by locomotives are being conducted at Purdue University under the direction of L. W. Wallace, former professor of railway and industrial management at the university.

One of the largest and newest types of locomotives will be used on a railroad near the Purdue farm. A heavy grade has been selected for the tests.

In obtaining the data, which is designed to show the magnitude and distance of travel of sparks shot out from locomotive stacks, a plot of ground measuring 100 feet parallel to the track and 250 feet back is laid off and at each 20 feet intersection a pan of paraffin, the quantity, distance from the center of the track and gauge of temperature may be obtained from their effect upon the paraffin.

A locomotive will be run stoker fired and hand fired at different speeds and tonnage with variations in netting and exhaust nozzle draft. At night photographs will be made from an observation box back of the tender. From the photographs the height reached by the sparks and another measure of their heat will be obtained.

Mrs. Carolina Sussi Dies At Her Home Tuesday

(By Associated Press)

Mrs. Carolina Sussi, 35 years old, died Tuesday morning at her home, 322 South Third street, of tuberculosis.

Mrs. Sussi was born in Bohemia April 22, 1885.

She is survived by her husband, John Sussi; two children, John and Anna Sussi, of this city; father and mother, Mr. and Mrs. William Slinor; five brothers and two sisters, all of Moravia, Hruski, Bohemia.

Funeral services will be conducted from St. Andrews church, Thursday at 9 a. m. The Rev. F. A. Roell will officiate. Burial will be in St. Andrews cemetery.

NEW YORK BAKERS STRIKE FOR \$6 A WEEK INCREASE

(By Associated Press)

NEW YORK, Nov. 2.—Between 5,000 and 6,000 bakers were on strike in Brooklyn today for a wage increase of \$6 a week.

Walter D. Edinger, president of the Association of Union Bakery proprietors, said that none of the big bakers had been effected by the walkout.

Police were on guard at a number of shops where the places of the strikers had been filled with new men.

CROWN PRINCE HAS RIVAL

(By Associated Press)

WIERENGEN, Holland, Nov. 2.—The former German crown prince now has a rival attraction on this little island, the great Zuyder Zee which is to reclaim thousands of acres from the sea. Construction work has actually begun, with headquarters here.

Police were on guard at a number of shops where the places of the strikers had been filled with new men.

HAVE COLOR IN CHEEKS

Be Better Looking—Take Olive Tablets

If your skin is yellow—complexion pallid—tongue coated—apetite poor—you have a bad taste in your mouth—a lazy, no-good feeling—you should take Olive Tablets.

Dr. Edwards' Olive Tablets—a substitute for calomel—were prepared by Dr. Edwards after 17 years of study.

Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil. You will know them by their olive color.

To have a clear, pink skin, bright eyes, no pimples, a feeling of buoyancy like childhood days you must get at the cause.

Dr. Edwards' Olive Tablets act on the liver and bowels like calomel—but have no dangerous after effects.

They start the bile and overcome constipation. Take one or two nightly and note the pleasing results. Millions of boxes are sold annually at 15c and 30c.

PHONES 1105-1106

CATARHAL DEAFNESS MAY BE OVERCOME

If you have Catarhal Deafness or head and ear noises or are growing hard of hearing, go to your druggist and get 1 ounce of Parmit (double strength) and add to it 1/4 pint of hot water and a little granulated sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone who has Catarhal Deafness or head noises should give this prescription a trial—Advertisement.

Don't Clog Entrance.

A good insulating material is ground cork, chaff, shavings, or saw-dust. Between this packing and the bees there may be placed a burlap sack or an escape board (be sure to take out the escape and cover the hole with wire to allow moisture to escape into the packing).

Don't use any oilcloth or tight board cover. Contract the entrance to one or two inches long and three-eighths inches deep. A box may be fitted around the hive (waterproof top) and filled with some packing material. Don't clog the entrance.

The Farm and Farmer

By WILLIAM B. SANBORN

Wood Ellison, of Center township, says that he still has 18 acres of clover to hull, and that there are others in the same boat in various parts of the county, owing to the fact that a lot of clover was grown for seed this year, and threshing machines are limited. He has just had his fall sale of Poland China hogs and will now get off to cribbing a large acreage of corn, as weather permits.

After you have waded out to inspect

a field of white corn on the thirtieth of October, and you are informed that

that corn was planted early in May, you would hardly expect to gather a mess of roasting ears. But they were there all right; a little tough, perhaps, but more or less soft and juicy, with the stocks green and pithy, about as

in early September. No, there weren't a field full of that kind, but a whole lot at that. This reminds us of a statement made last week by Charles Shultz, of Hagerstown, who said that it took an early variety of white corn to mature in Wayne county, and that late varieties would grow until a heavy frost struck them, no matter how late that was. He says further that it takes better corn land to raise a good crop of white corn than any of the yellow kinds.

Meetings All Off for Week.

All farm federation meetings are off for this week. Fact is the drive meetings are pretty well over, but Chester and Webster will each hold meetings during the coming week, and dates will be announced. There has so far been no meeting held at Webster a few nights ago. Center township will meet on Tuesday evening, Nov. 9, the meeting set for Monday night of the present week being postponed on account of the hall being in use by election officials, for the installation of voting booths. These three meetings will close the campaign drive. A supper will be served at the Centerville meeting.

Pork and Beef Much Cheaper.

It will interest the farmer to know

that while he has been standing a

sever cut on the prices paid for his live

stock that the wholesale prices of pork

and beef have also been materially

lowered. A Washington special dated

Oct. 31, and issued by the Institute of

American Meat Packers, recites the

"drop" as follows:

"Selling prices of carcass beef
