NEW METHOD OF EXTRACTING ACID FROM PHOSPHATE ROCK MAY BENEFIT FARMER

The new furnace at the Arlington, Va., station at work.

A new method for extracting phosphoric acid from phosphate rock, discovered by the bureau of soils, United States department of agriculture, may revolutionize the world fertilizer industry, of much importance to the farmers who are compelled to use a constantly increasing amount of commercial fertilizer. By the new process, worked out at the department's experimental station at Arlington, Va., the acid is extracted from phosphate rock by heating the rock with sand and coke in the fuel fed furnace shown in the picture. The rock is poured in at the top while the acid comes out at the pipe connection held by the man on the left. There is no loss of rock by the new process, while the screening process now used results in almost an 80 per cent loss.

FACTIONS IN HUNGARY ADVANCE CLAIMANTS FOR EMPTY THRONE

(By Associated Press)
BUDAPEST, DEC. 1.—The question, who will eventually occupy the throne of Hungary, has been a constant source of unrest and trouble, threatening a sudden upheaval of the recently attained peace and order.

The pro-Hapsburgs declare that the former Emperor Charles is the real king of Hungary and that no one else can legally aspire to the throne until he abdicates. The Independent Magyars, including large masses of the rural population, declare they will never surrender their recently won independence.

In addition there is a third group of politicians which is willing to offer the throne to any king who promises restoration of Hungary's lost provinces. To achieve this, they would even consent to do homage to the King of the Serbs or the Rumanians.

Some Want Charles.
Much propaganda is being circulated in favor of the former Emperor Charles or his eldest son, Prince Otto, and grave fears are expressed that the over-zealous partisans of the Hapsburg dynasty may eventually succeed in compelling the country to accept a royalist coup as an accomplished fact. There is every indication that the followers of Charles are successful in their efforts to convince the country that the restoration of the Hapsburgs would improve Hungary's lamentable situation.

In view of the delicate balance maintained between the various factions, the following statements are important:

Admiral Horthy, the regent, recently declared—"All parties may rest assured that I shall not abuse my powers for the satisfaction of my personal ambition. On the other hand," he added, "no party will be suffered to play pitch and toss with the Crown of Saint Stephen. There must be no plots and conspiracies and everybody is to realize that for the time being, it is in the interest of the country to put the delicate matter under prohibition."

The leader of the independent farmer party, Stephen J. Kovacs, who represents the traditional Magyar hatred against Austria and the Hapsburgs, has accused the pro-Charlesists of planning some surprise action and also aiming to renew the union with Austria.

"The Hapsburgs will never give up their former countries," said Kovacs. "I am reliably informed that former Emperor Charles insists on first entering Vienna and thence marching in triumph to Budapest. But the Magyars will never again acquiesce in losing their dearly-paid independence."

"Super Prune" Scheme Of College Professor

HEALTH CONFERENCE URGES BUILDERS AID

(By Associated Press)
DETROIT, Dec. 1.—Public health officials from the principal cities of the east and middle west ended their conference on the housing situation here today with the framing of resolutions embodying conclusions reached after surveys of conditions in the centers of population.

Financial aid for home builders provided by governmental agencies, and stricter regulation of building, were among the remedies suggested for the elimination of congestion, which was held responsible for a large proportion of disease. The task was too great for individual financing, in the opinion of speakers before the conference, and should be placed in the hands of national, state and municipal governments. The recommendations of the health commissioners will be sent to the senate housing committee, which, under the chairmanship of Senator Calder of New York, plans introduction of some remedial legislation.
