

SURRENDER OF COWS PROTESTED IN LETTER FROM GERMAN WOMEN

(By Associated Press)
BERLIN, Dec. 21.—Surrender to the allies of 800,000 milch cows, which have been demanded under the terms of the Versailles treaty, would have disastrous results in Germany, says a letter to the women of France from a committee of German women.

Continued deprivation of the German people of the milk supply represented by these cows would result in weakening public stamina and individual resistance and, therefore, operate to reduce the ability of Germany to fulfill treaty obligations through necessary production, it is said.

"As women are defenders of the rights of children," the letter declares, "we embrace with equal sympathy suffering children of all nations. Our sympathy goes out in fullest measure to children in the devastated regions of France, where it appears to us to be urgent that help should be granted as speedily as possible."

"On the other hand, we see the need of every part of Germany is so great that further reduction in the milk supply would be equivalent to the death sentence for hundreds of thousands of children. Instead of the twenty billion liters of milk which Germany produced annually in peace times, the country is now producing only 8,800,000,000."

Milk Is Scarce.
For nearly six years the population of German cities have not had milk the letter asserts and owing to the fact the death rate from tuberculosis has doubled since 1913, and 38,000 more children died in 1918 than in 1913. In Prussia alone there has been an increase in child mortality of 100 percent. The letter declares these facts are not known to the French "because the press has not permitted the information to be made public."

The whole question is not one of German good will, the letter says, but of a life and death struggle for German parents, and French women are

Just the Punch You Need
You cannot take the same laxative twice from the same box of "Just-One," because there isn't another one like it in the box. You cannot keep on pounding the same organ or set of organs and getting them all irritated or calloused so that they cease to respond. You automatically change laxatives with every dose you take.

Ask Quigley's Drug Store about this wonderful new idea in laxatives, and rid yourself of the "pill habit."

asked to realize "it is not the right way to save children of one country by destroying those of another."

The letter was framed by a committee of 25 women deputies representing the bourgeois and majority Socialist parties in the reichstag, and was in reply to an open letter addressed to them by the women suffrage union of France, disavowing the German protest against the surrender of German milch cows.
