

EMERGENCY TARIFF ADOPTED BY HOUSE BY 196 TO 86 VOTE

WASHINGTON, Dec. 23.—Over the protests of a defiant minority, the house last night adopted the Fordney emergency tariff bill by a vote of 196 to 86. The vote was taken at 8:45 o'clock after eight hours of debate.

It was evident long before the vote was taken that supporters of the measure, designed to protect some twenty odd farm products for a ten-months period, had the situation well in hand. But Representative Henry T. Rainey, Democrat, of Illinois, leading the opposition, opened a bitter attack which increased in intensity as the debate wore on.

Paragraph by paragraph, he assailed the measure, while the Republicans with loud roars of "noes" sent his proposed amendments down to defeat. Few Republicans supported him in his attack, but a score of his own party turned from their traditional stand against a high tariff to join the majority.

Admits Bill Hasily Drawn

Opposition speakers charged that the measure would send the cost of living higher, and branded it as class legislation. Defenders of the bill, on the other hand, said it would save the agricultural industry.

Chairman Fordney of the ways and means committee, which reported the measure, in opening debate declared the measure was not scientific and admitted it was hastily drawn, but asserted that it was the best that could be had at this time.

Representative Garner, Democrat, of Texas, speaking in support of the bill, said he felt it was the only way in which congress could extend the relief so urgently needed by the farmers.

Representative Madden, Republican, of Illinois, however, assailed his colleagues for "opening the way to a renewal of prohibitory living costs." Pointing his finger at the majority leader's desk, he said:

"You men will make two lamb chops cost \$1.30 again and you will make our suits of clothe cost 100 per cent more."

Sees Plan to Split Party

Representative Garrett of Tennessee said he saw "in this bill a determined effort to divide the Democratic party, to make members of that party turn their backs on every principle of taxation for which the party has stood in its whole history."

"I can not believe the Republican leaders seriously hope to get this bill passed," he added. "I am convinced it is a fine piece of political strategy."

In his attempts at amendment, Mr. Rainey sought to show that the bill for the most part carried higher rates than the Payne-Aldrich tariff. He also warned of retaliatory tariffs and embargoes by other nations.

In this connection, an amendment by Representative Olney, Democrat, of Massachusetts, to admit wool in transit from Australia and South America at the time of passage of the measure at prevailing rates of duty was voted down.

American Legion

NEW YORK, Dec. 23.—Protesting that the 20,000 sick and wounded veterans of the World War are being treated as "so many sheaves of paper at Washington" and as "numbers" rather than "men," F. W. Galbraith Jr., National Commander of the American Legion, has issued an appeal to loyal Americans to take some "human" interest in the welfare of the men who were once acclaimed as "the saviors of the nation."

"Meanwhile, legion men will visit every hospital in the United States," Mr. Galbraith said. "They will inquire into the care and well being of these men, and then this official visit will be followed by brotherly visits—and the hand of fellowship, which is warm in the Legion, shall be extended in place of the hand of charity, which is not wanted and which is cold. These men shall be our 'comrades' not 'cases.' We shall ask the co-operation of every loyal American, especially in the communities where the hospitals

TO CONTROL FLOODS

(By Associated Press)

ASHEVILLE, N. C. Dec. 23.—Control of floods throughout the southeastern section of the United States is the tentative plan of the Southeastern Water Resources office of the United States geological survey, with headquarters here.

The idea is to temporarily dam waters originating in the western North Carolina mountains during periods of excessive rain. Huge basins would be built in mountain crevasses, into which flood waters could be turned and stored until high waters of the streams lower down had subsided.

Streams whose sources are in this section form rivers in Tennessee, South Carolina and Georgia.
