212 Union National Bank
Building.

CHICAGO, March 2.—Some export demand and grain bids slightly under the market. Reports of many green bugs in Oklahoma were early factors. Local element mixed and even this trade very slow. Attention is to be directed to supplies coming from Canada and news says falling off is probable. Some Manitoba wheat sold at the seaboard. Commission houses at Winnipeg bought for large mills at 1/2 cent below at Minneapolis yesterday. Government reports fly infection general in soft wheat states. Favor purchases on small declines.

RANGE OF FUTURES
