Healthful Blood Pressure vs. High Blood Pressure
Tuesday Health Talk No. 9
By G. C. Wilcoxon, D. C.

Often about the time a man gets to be about forty—women, too—comes that condition known as high blood pressure. It is the first symptom of age. It indicates a stiffening of the artery walls. To move the blood through the veins and capillaries the heart must work harder. It gets less aid from the elastic artery walls—hence, the high pressure.

The cause is faulty kidney action, resulting in a very slight salty deposit in the arteries which stiffens them. Sometimes the condition is centered in some one portion of the body. In such cases the cause is under-normal supply of nerve impulses to this part, due to pinching of spinal nerves at the spine. The chiropractor locates such pinching pressure, and by his skill adjusts the spinal joints to correct alignment. This removes the pressure, and Nature restores normal action of the organs or parts affected.

Healthy Once More

"My case was diagnosed as interstitial nephritis or breaking down of kidney cells. I suffered with dizziness, high blood pressure, and traces of albumen. After six chiropractic adjustments a test showed albumen reduced, and soon it cleared entirely. I am now entirely well of all these ailments."—Irving A. Stevert, Chiropractic Research Bureau, Statement No. 1097H.

THE LOWER NERVE UNDER THE MAGNIFYING GLASS IS PINCHED BY A MISALIGNED JOINT. PINCHED NERVES CANNOT TRANSMIT HEALTHFUL IMPULSES. CHIROPRACTIC ADJUSTING REMOVES THE PRESSURE. THE UPPER NERVE IS FREE AS NATURE INTENDS.

PHILCO

Rearing the Philco Retaining Wall that makes possible a Two Year Guarantee

IT has taken five years to do it—five years of the most painstaking scientific research—to rear the PHILCO RETAINER. But it was worth it.

For the result is the longest, strongest guarantee ever put behind a storage battery for automobile starting, lighting, and ignition.

The Philadelphia Diamond Grid Battery without the Philco Retainer was and is a good battery. Not one in a thousand has failed to outlive its long guarantee of eighteen months. But the Philadelphia Diamond Grid Battery with the Philco Retainer is even better. In grueling tests, it has outlasted and out-performed any other battery we could buy or build. In actual war service in the U. S. Navy, it has demonstrated its supreme practical worth.

THE new patented feature, the Philco Retainer, is a thin sheet of slotted hard rubber, which is placed flat against the active material of each positive plate. In any battery this active material tends to disintegrate and fall off. The faster this occurs, the quicker the battery wears out. Altho the slots in the Philco Retainer are so numerous that they allow the free passage of acid and current, each slot is so narrow that the Retainer is, in effect, a solid wall which holds the active material firmly in place.

This means for you at least six months extra battery service secured by a definite guarantee.
