NEWCASTLE, Ind., June 2.—A county mass meeting of farmers, in the nature of the huge district barbecue held by the farmers at the fairgrounds last fall, is now being planned by a committee from the Henry County Farmers' Association.

John G. Brown, president of the Indiana Federation of Farmers' associations, has been secured to deliver the main address before the large gathering. The date for the county meeting has been definitely set for Aug. 23.

Memorial park, one mile north of the city, will be the place for the large county meeting of farmers. This was decided by vote at the monthly meeting of the officers and directors of the farmers' association.

Completing Plans.

Many plans are being advanced for the county meeting and these will be definitely decided upon as the time approaches for the event. Efforts will be made to secure the Courier Cadet band on that date and it is believed the affair can be made a most successful one. The committee from the Henry County Farmers' association in charge of the arrangements is composed of Ralph F. Connor, H. E. Holsinger and Ernest R. Payne.

Mr. Brown, state president of the farmers, is known nationally as an authority on farm affairs and his talk, which is expected to touch on the work of the federation, will be of special interest to the farmers of the county.

In addition to the discussion of the county meeting, the binder twine problem, membership campaign, legislative matters, the grain marketing plans, and reports of several committees came up at the monthly meeting of the officers and directors of the farmers' federation, Saturday.

THRESHERMEN FIX PRICE SCHEDULES FOR RUSH COUNTY

RUSHVILLE, Ind., June 2.—Threshermen of Rush county have agreed on a schedule of prices which will be charged for threshing this season.

The costs to the farmer will be five cents for oats, eight cents for wheat, and 12 cents for rye, unless a special trip is made, when 15 cents will be charged.

Two members of the Rush county farm bureau were present at the meeting to hear the discussion, but took no part in it and expressed no opinion.

Condemnation of the use of Indiana coal in threshing was one of the actions of the conference of threshermen, and an appeal to farmers to exercise care in cutting and caring for grain, which would result in easier threshing. Recommendations made by the association were not to cut grain until it ripens, to cut high, make medium size bundles, tie bundles nearer the head than the butt, and shock well in shocks of 14 bundles or less.

Heavier investment than in previous years and more efficient operation were given as reasons for the charges fixed upon by the threshermen.
