

## HARVEY DENIES U. S. HAS WAXED FAT WITH GAIN FROM CONFLICT

LONDON, July 5.—Diplomatic representatives of more than 30 foreign governments were guests last night at the annual independence day dinner of the American Society of London.

Ambassador Harvey was the guest of honor. Lord Lee of Hareham, first lord of admiralty, toasting the guest, referred to Mr. Harvey as "a foreign envoy to whom the muzzle of diplomacy had not been obtrusive."

Therefore, he said, both Britain and America could expect from him "open and frank comment upon Anglo-American relations."

Compares George III and V. Referring in his reply to the revolt of the American colonies, Ambassador Harvey declared:

"Whether the territory comprising the United States should have been retained, is wholly speculative. But one fact is certain: If George III had issued a proclamation even approximating in eloquent sincerity and appealing force that uttered the other day by George V in his faithful endeavor to reconcile a nation, there would have been no ringing of bells in Philadelphia 145 years ago this night, nor for many years thereafter."

Ambassador Harvey declared the mutual helpfulness which all desired could not be realized until two grave misrepresentations had been removed, one of which pervaded Europe respecting the United States, and the other permeated the United States as to Europe.

The two combined appear to constitute the chief barrier to full and effective play of co-operation based upon confidence and understanding," said the ambassador. "I find in Europe the common impression that the United States alone among the nations of the world is today a land of milk and honey, whose people not only are universally prosperous, though recalcitrantly discontented, but are rich beyond the traditional dreams of avarice. You have only to supplement the fancy with suspicion which I find not wholly lacking, that all this opulence and this happiness are direct results of the great war, to account for the natural sense of resentment."

America Heavy Loser. "What are the facts? Did the United States really profit from the war to such degree as to make the lives she sacrificed seem to the cynical and sordid mind relatively insignificant?"

Ambassador Harvey proceeded to cite the tremendously increased national debt, the congressional appropriations for 1920 and the heavy income taxation.
