

## PARENTS, TEACHERS, TO DISCUSS PROPER DRESS FOR STUDENTS

(By Associated Press)

INDIANAPOLIS, Oct. 14.—Whatever may be fashion's edict as to concealed ears and exposed knee caps the Indiana Parent-Teacher association will carry on its efforts in behalf of less exaggerated styles for school children, especially those of high school age. The question of the proper dress for the youngsters will be brought up for discussion at the annual convention of the association to be held here Oct. 20, 21 and 22, and although no startling reforms are expected to result, nevertheless it is certain some sharply defined opinions will be expressed on the prevailing styles. The movies are also due for some discussion but the pictures are not in bad favor and much of the talk will concern visual education.

The convention this year will bring together probably several hundred parents and teachers in one of the largest conventions held since the organization of the association in Indiana in 1912. After a feeble start in that year the association has expanded until at the present time Mrs. Hence Orme, president, estimates that 27,000 teachers and parents are co-operating in the clubs throughout the state.

Has Elaborate Organization. The state association now has an elaborate organization. The state is divided into 13 districts conforming to the congressional districts. Each district is divided into counties also conforming to the county boundary lines. A vice-president is appointed for each district and the work in each county is supervised by a county chairman.

In this state the association has the following departments: better films, child hygiene, child psychology, country life, education, home education, visual education, loan papers, legislation, literature, home economics, press and publicity, ways and means, humane education and recreation. Through these departments the association aims to impart to all parents and teachers the information that pertains to child welfare.

Headquarters of the convention will be at the Claypool hotel. Arrangements have been made for rooms for some of the delegates in private homes at a nominal price and Mrs. Orme has announced that rooms will be assigned at the registration table at the Claypool hotel.

Albuquerque, New Mexico, has the distinction of having the only one-woman street cars in the United States.

## Radiophone News From Here and Elsewhere

With this column is inaugurated a new department in the Palladium devoted to the publication of news that is interesting to wireless amateurs in Richmond and neighboring cities. The news will be published every Tuesday hereafter.

It is the intention of this department to include as much as possible that is of especial interest to amateurs of this locality, and in order that this may be done, all are invited to send in accounts of any local radio developments that are called to their attention, so that others may take advantage of them also.

New records, established either in local or DX work by local operators, new hook-ups, the outcome of experiments that have not been worked out before, the establishment of new receiving or sending stations or the improvement of already existing stations, all are matters of news interest. Items should be left at the office, given to Palladium representatives, or mailed addressed to the Wireless Department.

Many New Uses. New uses to which the wireless is put is a news matter also. For instance, a farmer suggested after listening to the wireless telephone at a county fair, that radio might be developed so as to operate a milking machine. "Then we can stay in town in the evening," he said, "instead of going home to do the milking just as the movies are starting." It is not probable that such a development will come soon, although all amateurs are familiar with the fact that autos, boats and airplanes have been operated by wireless. But a school football team might call together members for a practice game by wireless, business might be done by wireless, or some other comparatively new use may occur to local amateurs and be tested out by them. What everyone is particularly interested in now is work that can be done by wireless that will show a practical, commercial value.

Notices of the meetings of the DX Radio club, publication of traffic regulations, and other official news of the club also will be found in this column.

Proceedings of DX Radio Club. Election of a board of directors, consisting of Charles Snyder, president, Leslie Hart, Walter Schultz and Dr. H. Riley Spitzer of Eaton, was one of the actions of the club at its second meeting, held in Hart's Electric Shop, on the evening of Wednesday, Oct. 12. The constitution was adopted as offered, with only minor changes, and a traffic board was elected from names recommended by the board of directors. Fred Clark was chosen traffic manager, with Maurice Druley and

Harold Cutler as first and second assistant. Meeting nights were set for the first and third Wednesdays of the month.

Eaton Hears Cape May. The station at Cape May was heard by an Eaton station on Tuesday, it was announced at the Wednesday night meeting of the DX Radio club. The home-made receiving set manufactured by Charles Emrick, was used for the reception, being hooked up to Willard Overholser's aerial at his station. The same installation received SWJZ, a Westinghouse telephone set at Newark, N. J., as well as a station at Cambridge, Mass. All three telephones were sending out the world's series return.

Emrick's set is made up on the Westinghouse pattern, with primary and secondary wound together, and with a variable condenser and a vernier condenser which makes possible a very light adjustment. One stage of amplification is provided and was used for the distance work this week. The aerial was a flat top four wire, about 75 feet in length and 45 feet high.

Hears Telephone on Crystal. Elmer Elleman, of Richmond, reported that he heard 9ZAE on his new Westinghouse crystal set very distinctly on Wednesday night about 11 o'clock. Although it has been reported that telephone has also been heard on crystal as far as Cambridge City, it is not well established what success may be obtained locally in clearness and audibility and in distance with crystal sets on phone work. Reports of other accomplishments with crystal might be interesting.

Somerville Hears Returns. Earle Bourne of Somerville, O., reports getting the world series very QSA. He uses a short wave tuner, with a home-made detector and two

stage amplifier, but only one stage on the 9ZAE work.

The latest record established by 9ZAE is of Newport, Kentucky, an amateur at that city reporting that he copies the signals easily.

FIRST DEPARTMENT STORE IN U. S. DESTROYED BY FIRE. DUXBURY, Mass., Oct. 14.—The old Ford store, built in 1826 and reputed to have been the first department store in America, was burned Thursday. New England clipper ships brought goods from Europe and the West Indies for sale over its counters.

## LOSE YOUR FAT, KEEP YOUR HEALTH

Superfluous flesh is not healthy, neither is it healthy to diet or exercise too much for its removal. The simplest method known for reducing the overfat body easily and steadily is the Marmola Method, tried and endorsed by thousands. Marmola Prescription Tablets contain exact doses of the famous Marmola Prescription, and are sold by druggists the world over at one dollar for a case. They are harmless and leave no wrinkles or flabbiness. They are popular because effective and convenient. Ask your druggist for them or send price direct to the Marmola Drug Co., 4612 Woodward avenue, Detroit, Mich., and procure a case.—Advertisement.

**This is WHY**  
**KIRK'S JAP ROSE SOAP**

**Makes the Complexion Beautiful**

WE SAY IT AGAIN: "Real beauty lies in the skin, not on it." A beautiful skin means a healthy skin. And the skin cannot be healthy unless it is absolutely clean. JAP ROSE, more than any other soap, makes a beautiful complexion, because its absolutely pure oils heal, as well as cleanse the skin perfectly, and being wholly soluble, no sediment is left behind to clog the pores.

For the hair too—You'll Like It!
