# NOW—as to ECONOMY

ECONOMY is not only a matter of saving. It consists also of spending money to best advantage. You can often add materially to the effectiveness of your purchases by reading the advertisements in The Palladium.

Advertising identifies goods of unquestioned value. When a store or a manufacturer puts his name on a product and tells you about it, you may rest assured that it is worth while. It does not pay to advertise merchandise that is not sound. The comebacks are too costly.

Make a practice of reading advertisements. Read them as news from the business world, published for your benefit.

Sometimes, they keep you from making an unwise purchase by pointing out just why one article suits your needs better than another. A step toward real economy!

Often, they help you live better and dress better and make more of your income in every way. Also, real economy!

And you will find that they frequently save you money.
