

GENERAL BOOSTING OF CITY ASKED FOR BY MAYOR HANDLEY

"With the co-operation of the various departments of the city administration, there will be no end to what can be accomplished for Richmond," declared Mayor Lawrence A. Handley before the Kiwanis club Thursday.

Mr. Handley stated that as far as the city light plant was concerned, the most competent superintendent available would be obtained.

"Every department in the administration of the city is now working under competent heads, and they are going ahead with their respective duties without interference by the mayor," he said.

Explains His Stand

Mr. Handley said that he was no more a fanatic about prohibition than any other man who held office, but his big objective was to head off the violations of the liquor law and stop the manufacture of liquor commonly called white mule, raisin jack, etc.

"The purpose of the office which is held by the mayor is to maintain law and order, and that is what my intentions are while I remain in office as mayor of Richmond," he said.

The mayor recommended that the citizens of Richmond boost all departments of business and get behind their city for prosperity in the future.

"The way to gain prosperity is to make things look prosperous, and every one should get the spirit of 'boost' and get somewhere despite the obstacles," he said.

COLDEST WEATHER OF WINTER ON WAY; TEMPERATURES DROP

(By Associated Press)

CHICAGO, Jan. 19.—A cold wave, bearing snow, reached eastward from the Rocky mountains today. Leaving behind the coldest weather known in Washington and Oregon since 1909, and far below zero weather in the nearer western states, it was expected to reach Illinois by noon today. Predictions were that the coldest weather of the winter would be produced, with a minimum reading of five above. The lowered temperatures will spread into Kentucky, Louisiana, Mississippi and southwestern states, the government weather bureau said.

At Deer Park, Wash., 25 miles from Spokane, a temperature of 35 below zero was recorded. Northern Idaho and Montana are experiencing below zero weather, and at Billings, Mont., the temperature fell to 20 degrees below. Casper, Wyo., reported 30 degrees below and a three-inch snowfall.

In Nebraska and the Dakotas the thermometer descended rapidly with predictions that it would go below the zero mark before nightfall.

Cold in Colorado

Denver dispatches told of extreme cold in Colorado, while from San Francisco came word that the cold wave had penetrated the southern part of the state, causing snow to fall at Redlands, in the heart of the citrus fruit district and threatened crops there. At Reno, Nev., the temperature was 7 degrees below.

Kansas City reported that the thermometer there had reached the 10 degrees above mark, while indications were that it would go even lower. Snow, sleet and rain accompanied the cold.

Texas felt the cold wave which reached far south into that state while New Orleans was preparing for some unusual cold following the forecast of a drop in temperature of 40 degrees in parts of Louisiana and Mississippi.

PREVENTIVE DENTISTRY AND MOUTH HYGIENE BEFORE ASSOCIATION

(By Associated Press)

CHICAGO, Jan. 19.—Preventive dentistry and mouth hygiene were the underlying themes of the 58th annual meeting and clinic of the National Dental association which opened here today.

Leaders in the profession declared that there are only 45,000 qualified dentists in America and that this number is not large enough to care for the needs of the population. Therefore they assert the only solution of the dentistry problem of the country lies in perfecting preventive measures.

Detail in its relation to health and dentistry to the teeth was one of the main topics up for discussion, together with the continued employment of the tooth brush along scientific lines.

Establishment of clinics in public schools where students can be trained in the care of their teeth was another subject which occupied an important question on the program.

Fourteen postgraduate clinics with experts in charge will be held during the convention. Tonight a banquet will be tendered to Dr. John P. Buckley of Los Angeles, formerly of Chicago president-elect of the national dental association.

Mrs. Milton Sizelove Is Dead at Camden

CAMDEN, Ohio, Jan. 19.—Mrs. Milton Sizelove died at her home on North Second street, Wednesday. She leaves a husband and family. Funeral arrangements will be announced later.

CAMDEN, Ohio, Jan. 19.—William Myers died Wednesday morning at his home a few miles north of town. Funeral services will be held Friday.

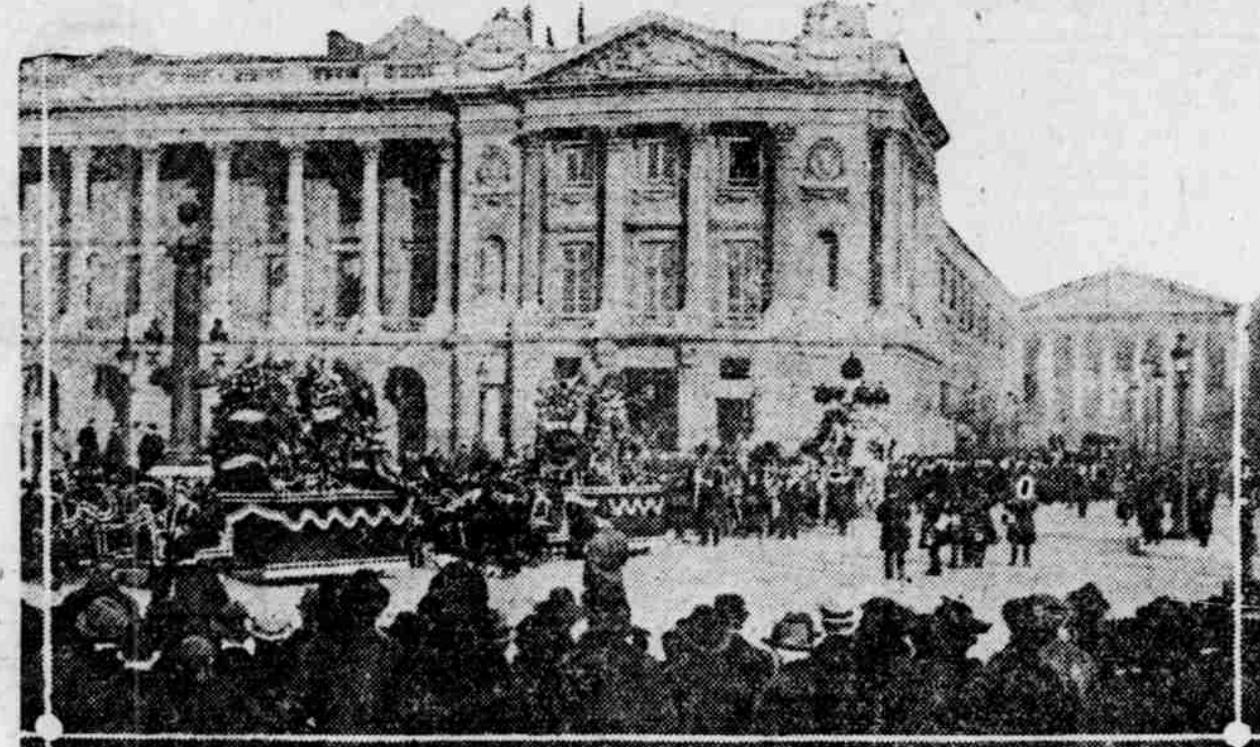

WOMAN WOULD ANNUL MARRIAGE TO CONVICT

(By Associated Press)

JEFFERSON CITY, Mo., Jan. 19.—Mrs. Frank E. Jandro, whose husband is a convict in the state prison here, filed a petition for a divorce yesterday claiming she was deceived by Jandro, who posed as a government detective while he served as chauffeur for a prison official. The couple were married Dec. 26, last. Jandro recently said he married to aid in his appeal for a parole.

Stevenson devised an instrument called a dynamometer to measure the force of waves.

FRANCE PAYS FINAL TRIBUTE TO NOTED COMPOSER

Funeral procession with body of Camille Saint-Saens crossing Place de la Concorde en route to cemetery.

The body of Camille Saint-Saens, distinguished French composer, has been laid to rest in

Paris with the tribute paid other national heroes by France. The funeral was held in the Church

of the Madeleine. Thousands lined the streets along which the cortege passed.

PALESTINE FORCES TRY TO STOP RIOTING BY IMPOSING FINES

(By Associated Press)

JAFFA, Palestine, Jan. 19.—The government forces in this district are attempting to stop rioting here by imposing fines on the inhabitants of the communities which participate in them and following this up with raids upon the towns and villages in the Jaffa district to collect the fines.

The experiment is an unusual one, and its success up to the present, is not evident. The Zionists are jubilant and see in this action a definite alignment of the government on their side. On the other hand, it has stirred up bitter feelings on the part of the natives who see in the government's action the beginning of Jewish domination and the betrayal of their passionately longing for national freedom.

Fine towns \$25,000.

A fine amounting to \$25,000 was imposed by the government on five towns and villages in the Jaffa district for alleged attacks made last May by their inhabitants upon Jewish colonists nearby. To collect the fine large bodies of English, Jewish and Hindu troops having machine guns, surrounded Tel Karem and four other villages near Jaffa, sent in men and confiscated all the live stock, including the oxen, led the animals into the fields and placed them under guard.

Then notices signed by Sir Herbert Samuel, the British high commissioner, were posted in the streets, demanding payment of the fines.

It is the policy of the field artillery chief to equip all field artillery brigades stationed in the United States with the French guns. They have been accepted as the standard light gun for the regular army and the national guard and in time of national emergency would be issued to organized reserves.

New Departure

"The American 76-millimeter gun," says an official communication issued by the office of chief of field artillery, "is an experimental split trail gun with which several regiments have heretofore been equipped.

The shortage of field artillery troops makes it inadvisable to continue further experimental work with this gun."

In extending the examination to organized reserve officers the latter say a new departure in army training has been made.

"Heretofore courses have been maintained for regular officers and for national guard officers," it says. "We are now inaugurating the systematic instruction of the third component of the army of the United States—the organized reserves. In so far as the size of field artillery is concerned, the size of the classes will be limited only by the amount of funds commanding makes available."

Sufficient funds are available at the present time, the letter continues, for conducting a course of instruction in field artillery subjects at Fort Sill, Okla., for a limited number of artillery reserve corps officers.

Circuit Court

TAKEN TO PRISON

John I. Lennard was taken to the penal farm, and Roy Null and John Gilbert were taken to Jeffersonville reformatory, Thursday.

ASK FOR PROPERTY

Jesse L. Gibson and Eliza Gibson filed complaint for possession of property and judgment, against Clark J. Hazlitt and Naomi Hazlitt, in circuit court late Wednesday. Damages of \$100 is also asked.

FILES FOR FEE

In default of defendant to appear in the divorce case of Opal M. Fraze against Russell L. Fraze, in circuit court Thursday, the prosecutor filed motion for statutory fee.

ALL RECORDS BROKEN IN CREATING PEERAGE

(By Associated Press)

LONDON, Jan. 19.—All records in creating peerage have been broken by the present administration, according to the new issue of "Debrett," a standard work of reference concerning the British aristocracy.

In six years now expiring 94 peers, 235 baronets and 2,015 knights have been created.

WILL BOOST BUDGET

INDIANAPOLIS, Jan. 19.—O. B. Iles of Indianapolis is working to perfect the state organization of the Indiana branch of the National Budget Committee. Mr. Iles was recently elected president of the Indiana branch. The purpose, he explains, is to interest Indiana business men in the work of establishing a national budget system, such as was begun by Charles G. Dawes.

LOS ANGELES "QUAKE" ONLY FIRING ON NAVAL GUNS

LOS ANGELES, Calif., Jan. 19.—Air vibrations caused by the firing of the heavy guns on battleships of the Pacific fleet off Los Angeles harbor last night, were responsible for widespread reports of slight earthquakes in this vicinity, but the regularity with which they occurred later dispelled the fears, it was said yesterday. Reports that window panes were broken in some houses could not be confirmed.

Stevenson devised an instrument called a dynamometer to measure the force of waves.

ANARCHY IS FEARED OVER DISBANDMENT OF BULGARIAN ARMY

(By Associated Press)

SOFIA, Bulgaria, Jan. 19.—Anarchy is feared in Bulgaria if in obedience to orders of the allied council of ambassadors the country's once proud and formidable army is disbanded. The little state would be reduced to such a state of military helplessness that her frontiers would be endangered and the internal order of the country menaced if it is declared by Constantine Tomoff, minister of war. The council's order gave Bulgaria a month in which to comply with the edict to disarm completely.

The treaty of Neuilly stipulated that Bulgaria must demobilize her entire regular army.

She was given the right, however, to raise a volunteer force of 20,000 men to keep order within the country as well as a force of 13,000 to serve as frontier gendarmes. Only 6,200 men responded to the country's call for volunteers, and M. Tomoff insists the plan has been a failure.

Fears Revolution

"If Bulgaria should have the misfortune to have internal riots or disorders arising from the lack of bread or from other causes," said the war minister, "the country might be plunged into revolution, and there would be no forces to preserve order. How are we to repress the raids and forays which are constantly occurring along our borders?"

Tomoff is 32 years of age and is the youngest member of the Bulgarian cabinet. He asserted that Bulgaria's 300,000 rifles had been thrown into the Black sea and that the country was almost defenseless. Rumors that Bulgaria was awaiting an opportunity to attack her Balkan neighbors in order that she might retake territory lost under the peace treaty were described as "utter nonsense" by the minister.

"That part of the national wealth devoted to highways should represent capital invested, earning dividends and not capital consumed. In other words, the economic balance between capital cost and operating expenses should be maintained. The highway should be designed as an engineer designs anything else to fit conditions."

Short News of City

Regular Meeting Held.—The regular meeting of the Eagles' lodge was held Wednesday night in the lodge rooms. Regular business was transacted during the meeting.

Reports Auto Theft—Harry Newell, route C, east of Richmond, reported the theft of a light truck Wednesday evening. The machine had a broken windshield and a torn top, he said, and had been taken some time between 7:30 and 9 o'clock in the evening.

Zem Zem Frolic—Members of the Zem Zem Shrine club, their wives and sweethearts enjoyed a basket supper held in the club rooms, Wednesday night. Following the basket supper the party attended the performance of the Sheik now being shown at the Richmond theatre.

Installation Service—The W. B. A. of the Maccaques will hold installation of officers Friday evening at 7:30 o'clock in the O. O. F. hall. A short program will follow, after which refreshments will be served. All members are asked to be present.

Entertains Class—Mrs. J. W. Han sel will be hostess Friday afternoon to her Sunday school class at her home, 100 South Sixteenth street.

Community Meeting—The Fairview Community club is giving a community night entertainment at Sevastopol school Friday evening at 7:30 o'clock. Recreation, games, and music will constitute the program. The public is invited to attend. All children who come must be accompanied by their parents.

To Entertain Class—Mrs. Charles Backmeyer's Sunday school class will be entertained with a picnic supper Friday evening by Mrs. Harrison Fry at her home, 539 South Sixth street. All members are cordially invited.

Having succeeded to 30,000,000 lire (nominally \$6,000,000), a carpenter in Bologna, Italy, continues to work in his humble shop, which is his living room.

The first semester ended Thursday and school will be dismissed all day Friday. The students will return to school Saturday morning at the usual hour to receive their grades and to run through their programs for the second term which will begin Monday.

Bird On Peace Dollar Is Eagle, Not Dove

(By Associated Press)

WASHINGTON, Jan. 19.—The bird on the new peace dollar is an eagle—not a dove—in case there be any ornithological dispute about it. Moreover, he is the only eagle with folded wings on an American coin with the exception of the bird on the ten dollar gold piece. Bird sharks have been horrified to hear of the eagle described as a dove of peace on a mountain top. In truth, it took some digging among mint officials to find out what kind of a bird really was. All the other eagles are spread eagles.

ROAD DEVELOPMENT MUST FIT CONDITIONS

(By Associated Press)

CHICAGO, Jan. 19.—Highway development must depend on more critical economic analysis than in the past and highway transport officials must prepare their cases, W. K. Hatt, director of the advisory board on highway research in session here today.

"The proportion of the national wealth available for the purposes of transportation is limited," he said. "This proportion must be distributed among the various agencies, railroads, highways, etc. Inasmuch as the money spent on one agency is not available for another, it is clear that highway transport is intimately bound up with transportation in general."

"That part of the national wealth devoted to highways should represent capital invested, earning dividends and not capital consumed. In other words, the economic balance between capital cost and operating expenses should be maintained. The highway should be designed as an engineer designs anything else to fit conditions."
