

COAL STRIKE WOULD BE 100 PER CENT EFFECTIVE, REPORT

(By Associated Press)

CHICAGO, March 3.—If the country's 400,000 union coal miners are called out on strike April 1 the fight between operators and the United Mine Workers of America will center largely in the fields of Pennsylvania, Ohio, Kentucky, Alabama and some of the western states, including Kansas, coal experts here believe.

Indiana and Illinois, the two largest producers in the central competitive field, are highly organized and if the strike comes operators expect it to be practically 100 percent effective in those two states.

A table prepared by the United States geological survey showing the degree of effectiveness of the last coal strike, in 1919, shows 71.6 percent of the country's mines were closed at the period of maximum effectiveness of the strike, the remaining 28.4 percent representing the non-union fields.

1919 Strike Effective.

The 1919 strike was 100 percent effective at its maximum period in 12 out of 42 fields listed by the government report. Seven of the 42 districts did not strike. The 12 reporting a complete shut down were northern Pennsylvania; the Pittsburgh district; northern Ohio; southern Ohio, Michigan, southern Appalachian, Indiana, Illinois, Iowa, Arkansas, Oklahoma and Washington.

The 71.6 percent closed during the 1919 strike had produced 414,625,000 tons of the 579,281,000 tons of soft coal mined in the preceding year, the remaining 164,556,000 tons coming from the non-union fields which were not affected by the 1919 tie-up. While the non-union group thus averaged but 3,166,401 tons a week during 1918, operators claim the opening of new mines in the unorganized fields, have raised their potential maximum production to from 3,500,000 to 4,000,000 tons a week.

SEEKING MODIFICATION OF EIGHT HOUR RULING

(By Associated Press)

NEW YORK, March 3.—Modification of the eight hour day ruling of the arbitration court is the chief point members of the Pressmen's Union are seeking in their meeting today with a committee representing the newspaper publishers.

CIGAR STRIKE DEADLOCK

ST. MARYS, Ohio, March 3.—The Delsel-Wemmer cigarmakers' strike has entered its third week here with no concessions from either side.

Watch the little folks speed home for Kellogg's Corn Flakes

"Mudder, I always wins the race when I carry home Kellogg's Corn Flakes. I can't hardly wait till I have some quick, mudder!"

It's great to see child-enthusiasm for Kellogg's; great to see every one in the family enjoy their crisp crunchiness and wonderful flavor! To sit down before a heaping bowlful of these joyous oven-brown "sweet-hearts-of-the-corn" and some milk or cream—and fresh fruit, if it's handy—is just about the very last word in appetizing appeal! And, your good taste will prove that!

Kellogg's Corn Flakes ought to be superior—they are the original Corn Flakes! Kellogg's are never tough or leathery; never hard to eat; never a disappointment!

Be certain to get Kellogg's—the delicious kind of Corn Flakes in the RED and GREEN package—because none are genuine without the signature of W. K. Kellogg, the originator of Toasted Corn Flakes.

BOYS', GIRLS' CLUB WORK IS CONSIDERED

Boys and girls' club activities for Wayne county are under consideration with plans being formed for organization of the clubs as soon as possible in the spring. A consultation was held recently at the county agent's office between Charles Weadick and Luther King, farmers of Webster township, and L. M. Hall and E. L. Austin, of the Purdue extension department, who are identified with children's club work.

With the support of the farm bureau, and the active interest of the breed organizations and the Wayne County Grain Growers, in addition to the liberal premiums offered by the Young Men's Business club of Richmond, the indications are that club work this year will be far in excess even of the successful pig club of last year.

By using a process said to be entirely new, an Italian company is obtaining fuel oil from the asphalt deposits of Sicily.

TO ELIMINATE CROSSINGS

(By Associated Press)

ELYRIA, Ohio, March 3.—It has been announced by an official of the New York Central railroad that the company is preparing to spend \$2,000,000, in order to eliminate grade crossings along its right of way in this city.

Put a Blue Devil in your bath tub—he will promptly steal the rings.

GRATIS, Ohio, March 3.—The Bronx, reputed to be one of the country's most congested communities, has the lowest baby death rate in the United States, according to figures made public today by the Babies' Welfare federation.

Buffalo and Pittsburg are tied for the highest rate of all, 93.6 a thousand births.

The report, which deals with infant mortality in the country's 10 largest cities, shows that of 15,297 babies born in the Bronx last year, only 972 died before reaching the end of the first year of life, an average of 63.1 for each thousand births. In New York, as a whole, the death rate was 77.1.

Los Angeles has the lowest death rate of the 10 largest cities, with 13.655 babies born and a death rate of 83.6, or 66.12 a thousand. New York City has the second lowest infant mortality rate.

Although Chicago and St. Louis were not included in the official birth registration figures, an unofficial report shows Chicago to have had an infant mortality rate of 89.68. St. Louis, unfortunately had a record of 61.7. Other percentages follow: Philadelphia, 77.8; W. Boston, 77.12; Detroit, 83.6; Baltimore, 84.9.

BABY DEATH RATE IN BRONX IS LOWEST IN NATION, REPORT

(By Associated Press)

NEW YORK, March 3.—The Bronx, reputed to be one of the country's most congested communities, has the lowest baby death rate in the United States, according to figures made public today by the Babies' Welfare federation.

Buffalo and Pittsburg are tied for the highest rate of all, 93.6 a thousand births.

The report, which deals with infant mortality in the country's 10 largest cities, shows that of 15,297 babies born in the Bronx last year, only 972 died before reaching the end of the first year of life, an average of 63.1 for each thousand births. In New York, as a whole, the death rate was 77.1.

Los Angeles has the lowest death rate of the 10 largest cities, with 13.655 babies born and a death rate of 83.6, or 66.12 a thousand. New York City has the second lowest infant mortality rate.

Although Chicago and St. Louis were not included in the official birth registration figures, an unofficial report shows Chicago to have had an infant mortality rate of 89.68. St. Louis, unfortunately had a record of 61.7. Other percentages follow: Philadelphia, 77.8; W. Boston, 77.12; Detroit, 83.6; Baltimore, 84.9.
