

## HAGERSTOWN SCHOOL BUILT ON UNIT PLAN TO PERMIT ADDITIONS

HAGERSTOWN, Ind., May 1.—The contracts were let last week for the new Hagerstown and Jefferson township high school building. The general contract was given to V. H. Juerling of Richmond, on a bid of \$61,000. The plumbing contract went to H. H. of Winchester, \$5,950; the heating contract to Liege Heat and Ventilating company of Auburn, Ind., \$7,236; wiring to the Service Electric company of Fountain City, \$1,120; total \$75,406. The cost had been estimated at \$83,000.

The building will be constructed of shale brick and will be a two story basement building on the "T" plan. All the corridors and stairs are to be made of reinforced concrete, same having a wainscoting of four feet and six inches high of glazed brick.

Floors are to be of the joist type with deadened double floor on top. The roof is to be of the built up type using a composition of pitch and paper for the roof surface. The lighting, vacuum cleaning and plumbing system are of the latest improved type as well as the heating, which is known as the furnace blast system, said heating system being of the type as recommended by the State Board of Health.

### Working's Design Structure.

Charles E. Working and son Paul of this place are the architects.

Following is a further description of the building, which is to be erected on the grounds which was recently purchased for the purpose, off of a field adjoining Hagerstown on the east of the Williams farm.

The architects have gone back to the early English Gothic period for their inspirations and have used the Tudor Gothic style for a basic design. Entering the main entrance and ascending a small flight of concrete steps landing in the main cross corridor at either end of which is a flight of concrete stairs leading from the basement to the second floor. The basement floor, which is to be three feet below the finished grade line, will be built with a concrete base with wood floor on top of same, except in the toilets. The base of all these rooms is to be built out of glazed brick to a height of four feet, the ceiling and side walls being either plastered or built of brick.

**Basement**

In the basement are to be the boys' and girls' toilets, the domestic science room, and cafeteria; these to be provided with waste, gas, water and electricity, a small serving table, a small modern dining room with a buffet in connection with same. There are to be two manual training rooms provided with cabinets; one room to be used for rough work and the other for finishing and drawing work. There will be also the janitor's and machine rooms, furnace and fuel rooms and to be connected to the outside by means of a passage leading to a flight of concrete stairs in the rear.

The gymnasium, the floor of which

is six inches above the finished grade is accessible from either the boys' or the girls' side of the building. At the rear of the gymnasium is to be a stage and two dressing rooms, each being provided with a set of double doors making it possible to bring in machinery for demonstrating purposes. There will be four outside entrances to the basement.

On the first floor will be two grade rooms, three recitation rooms, a sewing room, with a small fitting room and the superintendent's room.

In the superintendent's room is to be the master clock, which will regulate all classes, by means of a bell system. Opposite the main entrance will be the balcony of the gymnasium, with seating capacity of 250, same to be accessible from gymnasium floor by flight of stairs.

On the second floor are to be two recitation rooms, a commercial room, private room for use by school board, and provided with fire proof vault, also small music room.

At the rear, over the gymnasium, a large study hall, capable of seating 150 pupils, being provided with a small library and principal's room. At the front the agriculture, botany and physical laboratory, with a lecture room between; same to be provided with two storage rooms, gas, water, waste electricity.

The architects have used precautions and thought in not only providing all modern conveniences that the present day school plan should have, but have designed the building so that it will be classed as modern in years to come and provided a flexible plan so that it may be added to without disturbing the designing elements of the building.

## ZEPHA J. CRANDALL ASKS FOR DIVORCE

GREENVILLE, Ohio, May 1.—Zepha J. Crandall, who was married to Harry W. Crandall on July 20, 1920, has filed a petition in common pleas court praying for a divorce.

In her petition Mrs. Crandall charges her husband with gross neglect of duty, failure to provide and says she was compelled to rely upon her parents for support. She also alleges that on April 20, 1921, her husband deserted her and she does not know of his present whereabouts.

The court is asked to grant her a divorce, restore her to her maiden name, and for all other relief to which she may be entitled.

Suit for money due on two promissory notes was filed in common pleas court Saturday morning by H. A. Geeting against Charles Studebaker, and the total amount asked for is \$1,325.24 and six per cent interest.

The first note is dated West Manchester, Aug. 6, 1919, and calls for \$900 and six per cent interest payable one year after date, and the other note is for \$325 dated West Manchester, April 25, 1920, and payable one year after date, both notes being past due and not paid.

work so much the better. It is the hard task that makes the greatest man. In overcoming difficulties you will get twice the value of the reward as I used to do in cutting wood, when I got warm once when cutting it and again when burning it.

Graduation exercises were saddened for many by the knowledge of the serious illness of one of the high school graduates, Miss Elizabeth Plankhorn, whose diploma was accepted for her by one of her companions. Miss Plankhorn was taken ill while helping to decorate for the graduation exercises on Friday.

Music for the graduation program

was furnished by the Collegian's Premier Five. Diplomas were given out by County Superintendent C. O. Williams. Trustee Will Moore presided over the program in the absence of Superintendent Armstrong, of the Webster school, who had been called to Anderson unexpectedly.

**REVIVE STONE PILE**

GREENSBURG, May 1.—So many hoboes have applied to the local sheriff for lodging recently that the city council has revived the stone pile. The "migratory workers" will pay for their lodging in this manner, it is planned.

**RAINY WEATHER HINDERS ASTRONOMY STUDENTS**

BLOOMINGTON, May 1. — Unless the remainder of the school year for the most part is calm, forty students of astronomy will be in danger of having their credits deferred, according to Professor W. A. Cogshall. The moon and planets have been receiving treatment for the past two months by university students, it was said, because the telescopes could not be used during April showers or when the sky was cloudy.

## In the "Wrong Gear"?

Does your heart-engine pound when you climb the stairs? It is a danger signal that should warn you to eat proper food and take rational daily exercise. Taking a hill "on high" is easy for the man who eats

## Shredded Wheat

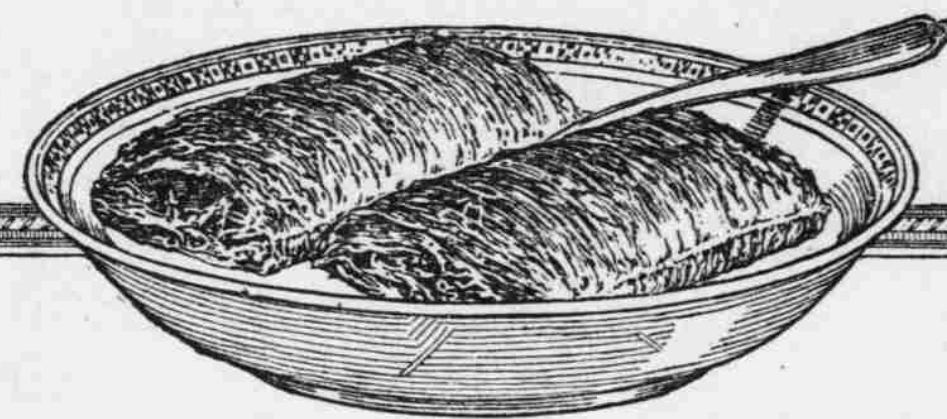

Eat it for breakfast, for dinner, for lunch—you can't eat too much of it. Shredded Wheat contains just enough carbohydrates and proteins to sustain the human body in top-notch condition, also the mineral salts that are so necessary to life and normal growth.

For a warm, nourishing meal heat two Biscuits in the oven to restore their crispness; pour hot milk over them, adding a little cream and a dash of salt. Delicious with sliced bananas, prunes, raisins or canned fruits.

TRISCUIT is the Shredded Wheat cracker—a real whole wheat toast—and is eaten with butter or soft cheese.

Send two-cent stamp for copy of our new book, "The Happy Way to Health," which tells how to keep healthy and strong and how to prevent many ailments and diseases by eating the right kind of food.

The Shredded Wheat Company, Niagara Falls, N. Y.
