

POSTOFFICE REPORTS INDICATE INCREASED AND BETTER BUSINESS

Improvement in business conditions are reflected in the sale of all stamped paper at the postoffice during the month of April, according to the belief of Henry Deuker, assistant postmaster.

Sale of the stamped paper during the past month exceeded the sale of April, 1921 by \$2,337.46. The April, 1922 sale totaled \$14,561.63.

Not only does this indicate that business houses are buying more stamps and envelopes for mailing purposes, but it also proves that purchase of the paper from all sources has increased.

Another sign, it is believed, is the sale of United States Savings Certificates. Yesterday, May 1, was the day on which the most certificates were sold of any day since the certificates were received at the local postoffice, Dec. 15, 1921. Sales Monday totaled \$7,780, and Assistant Postmaster Deuker said Tuesday that a large sale was being enjoyed on the second day of the new month.

Total amount of certificates sold during the month of April was \$16,640. This amount makes the total face value sold since last December, \$10,000 or \$15,000 over the \$100,000 mark. The fact that these certificates bear five percent interest if held until maturity, and that they are non-taxable, is a great factor in their sale, Mr. Deuker said.

In the rural mail department, evidence of growth is indicated in the report by Superintendent of Mails Clarence Foreman, showing that nearly 5,000 more pieces of mail of all classes were distributed by the four rural carriers during April, 1922 than in April, 1921. While the amount of first and fourth class mail delivered is a little under the amount carried in April of last year, the increase in second and third class distribution more than equals the loss in the other two classifications.

During April, 1921, there were 84,615 pieces of mail delivered on the four rural routes. In comparison to this report, it is the announcement that in the month just ended, 89,341 pieces of mail were taken to the homes of rural patrons.

MUSIC IN THE AIR TO AID VETERANS' CAMP.

Miss Jeannette Vreeland, opera singer, and Bert Acosta just before they entered the plane piloted by Lieut. Belvin Maynard for a flight during which Miss Vreeland sang through a radio transmitter several songs designed to help the work of gathering funds for the American Legion's projected camp at Tupper Lake in the Adirondacks.

Palladium Government Call is 9 ZAE — Fred Clark, Operator

Unusual results with crystal detector reception is reported by amateurs of Lynn, where they have had long experience with crystals. Newark, Pittsburgh, Schenectady, as well as Dayton and Indianapolis are some of the more distant stations that Minor and Beatty have been able to get on crystal. Kenneth Benson, living three miles north of Lynn, purchased a crystal, phones and sliding tuner from Beatty two days ago and was able Sunday night to get in New Albany, N. Y. With a similar set, Ralph Hollingsworth heard Pittsburgh his first night.

Beatty also reports KYW, the Chicago Westinghouse station, foning in very satisfactorily at Lynn, although no one else in this section has been able to hear that station very well. The situation of Lynn is credited for the unusual results. It is suggested by the Lynn amateurs that the situation of the town is responsible for the results.

Denver, Colo., and Harrisburg, Pa., and Bradley Institute in Illinois are new phones recently heard by Beatty. The "flying parson," Lieut. Maynard, also was heard by Beatty at 11 o'clock central time as he performed an aerial marriage over New York recently. The ceremony, which received much comment in the papers, was performed in an airplane carrying the couple and the "parson" at a height of a thousand feet, with a radiophone transmitting the words to listeners below.

the ballet dancers at a French theatre lately, the music being broadcasted from a station 25 miles distant during an afternoon matinee.

Wireless Broadcasting
Besides the ever increasing numbers of American telephone broadcasting stations, the idea is gaining favor abroad. England, Germany and France all are taking it up and substituting phone broadcasts for telegraph broadcasts that already had been common. This country promises to retain the lead for some time, however.

Germany has been broadcasting grand opera by telephone for some time.

California leads all other states in number of broadcasting stations, but most of the licenses are issued to wireless dealers or manufacturers who are using weak sets. The eastern part of the country is better covered by a few powerful stations. More than a fifth of all broadcasting licenses have gone to California.

Radio for Constables
State constables of Massachusetts have been equipped with portable radio sets with which they can listen in on the phone at the central station, and by which their movements can be directed at a distance.

CHILDREN IN SPRING TIME
Mrs. C. Osborn, 7512 Hillside Rd., Cleveland, O., writes: "My granddaughter was troubled with a cough for nearly two years. She took Foley's Honey and Tar and her cough is now gone. It loosened the phlegm so she could raise it easily." Foley's Honey and Tar is just what children should have for feverish colds, coughs, "snuffles" and tight, wheezy breathing. Be sure to get Foley's. It checks croup and whooping cough, too. A. G. Luken Drug Co., 625-628 Main St.—Advertisement.

Richmond Men on Ship Deck of Which Collapsed

Charles F. Unthank and John F. Davenport, Richmond men who were on the Ohio river steamer, Island Queen, whose forward decks collapsed last week while making a trip to the Grant Centennial at Point Pleasant, Ohio, were in the midst of the catastrophe, and declare that it was a miracle that more people were not hurt and that those who were hurt, were not hurt more seriously.

Mr. Unthank stated that the crowd on the upper deck was attracted to one side of the boat by a crowd of

people on the shore, and that the extra weight caused the timbers to gradually give way. Mr. Unthank said "The warning was fully three minutes long and Mr. Davenport and myself had plenty of time to get to cover on the lower deck before the upper fell. There were more people hurt than was at first estimated. So many women fainted for a time, that it was impossible to determine just how many persons were injured."

Confirmed criminals never dream, is the conclusion reached by a medical research society after long investigation.
