Palladium Government Call is 9 ZAE — Fred Clark, Operator

Palladium call is WOZ.

The long desired elimination of static is announced at last by army experimenters stationed in Chicago, and their statements have aroused a widespread interest.

Major J. O. Mauborne, a signal officer, and Dr. Louis Cohen, a consulting engineer, after two years' experimentation, state that it is possible to "drain" the static noises through a special coil of wire without affecting the strength of the radio signals.

The static noises are drained off and grounded, leaving the radio signals clear and distinct. The draining coil contains wire of a certain length in relation to the wave length it is desired to receive.

All amateurs and novices will watch for further information of this discovery with great interest.

**Eaton Amateurs**  
Cyrena Van Gordon, noted grand opera singer and formerly of Camden, Ohio, was heard in Eaton recently. Walter Fishback and a guest, while tuning in on an amateur station, were agreeably surprised to hear the voice of the Preble county singer.

A larger tower is being erected for their aerial by Marshall and Henry Bucher, managers of the Eaton laundry. Their station is equipped with a three-stage simple circuit set.

County Surveyor Burns is the latest recruit to the ranks of the radio fans, having acquired a variometer set recently. Fred Miles and Roy Poe are two others who are getting good results from their sets.

**Other Preble Amateurs**  
With seven amateurs twirling dials in Lewisburg, the town is well on the road to get its share of radio broadcasts. Owen Douglas, the pioneer in radio for that locality, is assisting the newer ones in many ways.

Alden Swift of West Alexandria is making a new simple circuit outfit. Copp and Rinck of the same town report very good reception for broadcasts, especially for Rike Kunkler at Dayton.

Dr. Lawrence Fisher of Camden, a dentist, has been added to that town's radio roll call, with a variometer set.

**Lightning Reception.**  
The set belonging to Russell Kincaid west of Centerville, was damaged by fire, the tuner being completely destroyed, last week, being unequal to the task of receiving lightning.

The fire was caused by lightning which struck the interurban power lines and followed a power line into the wireless shack. Just outside the shack the lightning jumped to the lead-in which was near the power electric wire, and followed through to the set. Kincaid had placed the bulbs in a cupboard on the other side of the room when he finished listening and managed to get out, when the fire started, in time to prevent destruction of more than the tuner. His one horse power motor was burned out also.

Kincaid is now building a new set similar to that described in the call book, but planning to place his tickler against the variometer and connect the two, without using a separate tickler motor.

**New Sets.**  
The receiving set recently installed by Ora Dunbar of Centerville is enabling Mr. Dunbar, with his neighbors and friends, to listen in on concerts from almost any section of the country at will. Mr. Dunbar has become a full fledged radio fan and is spreading the fever among other Centervilleans.

Another set put in a couple of weeks ago by Verl Sheffer, south of Williamsburg, is the source of much pleasure during leisure hours. Mr. Sheffer is two miles from Williamsburg, and his house is on the top of a hill, placing him in an ideal position for a station. Chicago reports on stock and grain markets are received regularly at noon, and entertaining programs from eastern stations are heard in the evening.

Mr. Sheffer is using a four-wire L

type aerial 60 feet high. His set is a two-stage, six-tube circuit.

**Circus By Radio.**  
Putting the elephants through their tricks by wireless orders is the latest use of radio. This was done at the New York Hippodrome. The elephants were fitted up with receivers the size of soup-plates, connected by a long wire, with the receiving set.

**Trans-Atlantic.**  
The University of Vermont has been heard recently, in Paris. Word has just been received from that city that a university broadcast was picked up by a Paris station.

**Bureau of Standards.**  
Experiments are being conducted by the Bureau of Standards in the use of condenser plates as aerials instead of wires. The large plates used are found to be freer of static and of course are better suited to portable sets.

A method of broadcasting direction finding signals so as to enable airplanes to land by them, has been perfected by the bureau. The signals can be heard at a distance, but within a certain radius of the field, are localized so that the plane can find the exact location of the landing ground.

**Palladium Wireless.**  
A communication has been received from W. C. Noves and Son, electrical contractors of Ticonderoga, N. Y., reporting reception of the Palladium broadcast. The reception was "faint but clear" at a distance of about 700 miles, and further information regarding the set is requested.

Another card from Maine also reports hearing the Palladium, but complains that it does not come in very clearly during static.

## SAY TEN PER CENT OF CORN IS PLANTED

COLUMBUS, Ohio, May 16.—Only about 10 per cent of corn acreage is planted, according to reports received by Statistician West, of the state-federal crop reporting service. Under ordinary conditions with favorable

## NEW GARDEN READY TO ORDER TWINE

(Special to The Palladium)

FOUNTAIN CITY, Ind., May 16.—

Several thousand pounds of binder twine will be needed for New Garden federation farmers, according to estimates made at a federation meeting Monday night. This twine will be bought co-operatively through the purchasing agency.

After deciding upon the use of the state manufactured twine, which is being distributed by the farmers' organization, a committee was appointed with a member on each country telephone line, to accept orders for the twine from farmers on that line and to turn them in to George Myers, township chairman, who will combine them with the county order.

Committeemen, with their telephone lines, are: Reuben Macey, 174; Luther Leibold, 176; George Myers, 178; Ed. Bockhofer, 179; Charles Gifford, 181; Lloyd Pyle, 182; Claude DeArmond, 185; Lester Wright, 186; William Dorgan, 189; Frank Longfellow, 191; Ed. Chenoweth, 194; R. M. McQuiston, 195.

## Corns? here is relief Dr. Scholl's Zino-pads Put on - the pain is gone

For quick and lasting relief from corns, callouses and bunions, there's nothing like Dr. Scholl's Zino-pads. They get at the cause; protect against irritation and pressure while they heal. Zino-pads are thin, antiseptic, waterproof. Absolutely safe! Just try them once. Special sizes for corns, callouses, bunions—at druggist's and shoe dealer's.

Taste is a matter of tobacco quality

We state it as our honest belief that the tobacco used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.

PROTECT YOUR CLOTHES AND FURS FROM MOTHS —Do it the sure, convenient, inexpensive way

Keep your garments, wraps and bedding stored in a well-made, moth-killing

## Genuine Red Cedar Chest

Millions of dollars worth of clothing, furs, blankets and textile goods are destroyed every year by the ravages of moth-worms.

The United States Department of Agriculture recently had a series of tests conducted to determine the

value of Red Cedar Chests as protection against damage by moths. The Department's Report shows how these chests "are effective in protecting fabrics from clothes-moth attacks" because "cedar chests do kill young larvae" (moth-worms).

## This is Cedar Chest Week—May 15th to 20th

We have a complete stock of these Chests ready for your inspection in a variety of styles, designs and prices, and in finishes which will match period furniture.

Now, when you are getting ready to lay away your Winter things, is the time to get one of these Chests and make sure of safe storage for your clothing and furs.

Come in and ask us for a copy of this valuable booklet. It tells what the Department of Agriculture tests proved about the value of Cedar Chests and how to care for your garments to insure their safety.

Your copy is here, ready for you, with our compliments—no charge.
