RECOMMEND CUTTING NUMBER OF CHURCH BOARDS AT ASSEMBLY

(By Associated Press)

DES MOINES, Iowa, May 22.—Reduction of the 16 existing boards and agencies of the Presbyterian church in the United States of America to four and the creation of a general council, was unanimously recommended here today to the one hundred and thirty-fourth general assembly of the denomination by the committee on reorganization, of which Rev. Dr. John Timothy Stone, of Chicago, is chairman.

"For nearly a quarter of a century," the report asserted, "the Presbyterian church has been struggling with the problem of co-operation and co-ordination and greater efficiency. A former committee on administrative agencies sought to work out the problems involved, but was intimidated by the fear of legal complications, in the administration of the large trust funds.

Instructed in 1921.

The present committee appointed at Philadelphia in 1920 was instructed at Winona Lake in 1921 to proceed to a general consolidation of boards and agencies, and now brings in a report substantially in accordance with the definite instructions given by the Winoona assembly.

The committee also recommends that certain work hitherto performed by committees be assigned to the office of the general assembly.

The present boards and agencies are the Women's Board of Foreign Missions, the Board of Home Missions, the Women's Board of Foreign Missions, the Woman's Board of Home Missions, the Board of Publication and Sabbath School Work, the General Board of Education, the Board of Ministerial Relief and Sustentation, the Board of Church Erection Fund, the Board of Missions for Freedmen, the Board of Temperance and Moral Welfare, the Permanent Committee on Evangelism, the Permanent Committee on Men's Work, the Permanent Committee on Sabbath Observance, the Permanent Committee on Vacancy and Supply, the Executive Commission and the New Era Movement.

3557. A Guimpe dress is a necessity in the wardrobe of every little maid, and to have it in the popular suspender style, with the friendly plaited skirt, so comfortable and becoming is to have the "right thing." This style may be made of gingham, crash or cretonne, with crepe, pongee or voile for the guimpe. It is good in "all of one material" such as gingham or chambray, but the thought of contrast is very strong this season.

The Pattern is cut in 4 Sizes: 4, 6, 8 and 10 years. A 6 year size will require 1½ yards of 27 inch material for the Guimpe, and 1½ yards of 40 inch material for the "dress."

Small Investors, Hoping to Get Rich Quick, Furnish "Easy Money" for Many Smooth-tongued Swindlers

MEDICAL ASSOCIATION SESSION IS FEATURED BY SPECIAL EXHIBIT

(By Associated Press)

ST. LOUIS, Mo., May 22.—A feature of the annual session of the American Medical association which opened here today, was an educational exhibit presented by 48 physicians, of recent advances in medical science, teaching and organization.

Most of the national organizations devoted to education of the public, including the Child Hygiene association, Red Cross, American Society for the Control of Cancer, the Association for the Prevention and Relief of Heart Disease and the national organization for public health nursing presented outlines of their methods of work, their activities and complete sets of the literature used by them in their educational efforts.

The United States Public Health service presented an exhibit of its work in child health and in the prevention of venereal disease.

Other exhibits included demonstrations of work on the prevention of ringworm in the south, on the treatment of cancer, on occupational therapy and demonstration of a method for showing by the X-ray the position and appearance of various organs within the abdomen.

The small investors furnish the great mass of victims of the swindlers who are everlastingly out for "easy money," although the disclosures of recent date show that the big operators get bigger fish. However, the vast sums of money which go into the baskets of the sharers come from people of small means, men and women who have worked hard, raked and scraped and saved a little at a time. The United States Government Savings System offers a safe investment and a sure return in the new Treasury Savings Certificates, paying 4½ per cent interest compounded semi-annually. They are sold at all post offices in denominations of \$25, \$100 and \$1,000, at \$20, \$80 and \$800, and are redeemed at their face value in five years. That is 25 per cent in five years. Besides, the certificates are tax exempt, except estate and inheritance taxes. It would be better for the small investor to take his savings to Uncle Sam instead of handing them over to the sharks represented in the cartoon. They will get his money and keep it. The Government will hand it back with a 25 per cent increase. And what is very important, the investor will have the supreme satisfaction of knowing that his money is safe all the time.

Telephone Is Prized Possession In Japan

(By Associated Press)

TOKIO, May 22.—A telephone instrument is one of the most prized possessions of a foreigner in Japan. Under the government system the instrument is sold outright to a sub-

scriber and as the government's supply is apparently never replenished, it is next to impossible for a new subscriber to have one installed, applicants who sent in the order even 10 years ago are still waiting to have their request complied with.

As a result instruments, ownership of which carries with it the right by

payment of a small fee to have it moved or transferred to another individual, are held at a price. In Tokio for example, an instrument is valued anywhere from \$700 to \$1,250.

In the past generation or so America has become the world's leading diamond customer.
