

# VOCATIONAL GRADS ENGAGED IN TRADES LEARNED IN SCHOOL

(By Associated Press)  
INDIANAPOLIS, Dec. 6.—More than 75 per cent of the 23,000 young people in Indiana who have had vocational training in public schools, are engaged in the occupation for which they were trained, according to the state department of public instruction.

According to a bulletin just issued by the board of education, seventy-six per cent of the boys at work who have had vocational agriculture in Indiana high schools are farming. Seventy-nine per cent of the boys who have had vocational industrial training are working at the trade for which they were trained, it was said.

Vocational agriculture training is increasing the wealth of the state by improving methods of farming, it was declared. In Shelbyville, it was pointed out, the boys in the vocational class tested 16,000 ears of seed corn in one year. This tested corn was planted on thirty-two Shelby county farms and yielded 11 per cent more than the untested corn on other fields in the same county.

"Training in the trades is improving industrial conditions in Indiana," the bulletin says, adding: "An employer in an industrial city states: 'We have heretofore been compelled to take in green boys, and train them at our time and ability would permit. Our time and patience, to say nothing of our ability, have been so limited that we usually had to keep a boy from six months to a year before he was of any value to us, but now with your staff of specialized boy trainers you equip them with the peculiar knowledge that makes it possible for them to earn the minute they enter our shops.'"

## IF BACK HURTS BEGIN ON SALTS

## IF BACK HURTS BEGIN ON SALTS

Flush Your Kidneys Occasionally If You Eat Much Meat.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid, which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver troubles, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys. The moment you feel a dull ache in your kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water just before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.—Advertisement.
