### All depends on your tooth paste

Your smile should disclose white, unmarred teeth. The first step in that direction should be the use of the right kind of dentifrice. Above all, be careful to choose one that will not injure the precious tooth enamel, for, once scratched, decay sets in, then — unsightly teeth.

### This paste is absolutely safe

Listerine Tooth Paste contains a new polishing agent. Dentists pronounce it ideal—just hard enough to remove unhealthy tartar and film, but not hard enough to injure the enamel. You can brush your teeth with perfect safety.
