

marched with considerable force to Fort Mitchell.—He has captured the Chief Nehor Mathala and his son. Many of the Indians are coming in and claiming protection, professing to have been peaceable. Provisions were very scarce, in the Indian country. Gen. Scott, at the last accounts, was on the wing of departure, to join Gen. Jessup, with a very strong force.—*Cin. Gazette.*

**PRICES, CROPS, HARVEST.**—The price of flour has advanced in the Atlantic cities. June 23, in Baltimore, it ranged from \$7.25 to \$7.50. There is a prevalent opinion that the wheat crops are light. It would seem certain they must be so in many places; and particularly on the eastern waters of Pennsylvania, Maryland and Virginia. The harvest has commenced, in the Miami country, and the wheat is considered below an average.—*ib.*

**THE DEPOSITE BILL.**—The deposit bill has been approved by the President. The most important feature in this act is that which makes the several States the depositories of all the public moneys which may be in the Treasury on the first of January next, over the sum of five millions of dollars, on their passing laws, pledging the faith of the States respectively to pay the warrants of the Treasury in the manner prescribed. By an amendment introduced by an overwhelming majority of the House of Representatives, all the features of the bill which went to make the proposed transfer of the money to the States a loan or gift, were struck out, and as the act now stands, they are to be mere depositories, like the banks in which the public moneys are now kept.—*Globe.*

By letters received on the 13th ult., from Dr. Isaac Coe, one of the Canal Fund Commissioners, then at Washington City, we learn that the expected loan, of which notice was given in our last paper of \$500,000 is effected with the Messrs. Cohens of Baltimore at 5 percent. bonds at par. The terms we understand are, one-tenth to be paid in hand and the balance on the 1st of September and 1st November. The greater portion of which is for the General Internal Improvement use, and the remainder for the Wabash and Erie Canal.

Dr. C. expresses confidence that the residue of the loan authorized to be now contracted, will be made in due season, for continuing any operations which may be now commenced.

#### PROSPECTS OF MICHIGAN.

The Detroit Journal of the 31st May says: The Steamboat *Michigan*, yesterday morning, brought into this City, the greatest load of passengers that was ever landed here—there being not less than 7 or 800 souls. We learn that at Buffalo the rush to get on board of her was so great, that the Captain refused passages to many persons previous to the regular hour of leaving there not being room to accommodate them. All the boats that come in seem to be loaded down to the extent of their capacity. Within a week past, there has been landed on our wharves from steam boats and Schooners, at least 10,000 souls. This may seem to our Eastern readers to be almost incredible, but we can assure them it is no exaggeration. At some of our hotels, and we have a great many—from 250 to 300 persons have taken breakfast in one morning.

**FLAG OF THE UNION.**—On and after the fourth of July next, the flag of the United States will be spangled with twenty six stars, 2 being added in consequence of the admission of the States of Arkansas and Michigan into the Union. In 1813, the number of States then being 20, an Act was passed "that on the admission of every new state into the Union, one star be added to the Union of the Flag; and that such addition shall take effect on the 4th day of July then succeeding such admission." The 13 stripes, denoting the thirteen original States, were on the admission of Vermont and Kentucky, increased to 15; but as the number was further enlarged it was perceived that the Flag would not, eventually admit of a stripe for each, and so an Act was passed fixing the number at 13, as before. The last star added to the Flag, was on the 4th of July, 1822, in honor of the State of Missouri, which was admitted into the Union on the 16th of August 1821. The star for Maine was added on the 4th July 1820.—*N. Y. Jour. of Com.*

**RETROCESSION.**—A communication bearing the signatures of some seventy or eighty of the citizens of Georgetown, (D. C.) has been addressed to the Mayor of that city, requesting him to call a public meeting of the citizens; as also of the citizens of that portion of Washington county which is west of Rock Creek, to be held in Georgetown, with

a view to deliberate upon the question of retrocession, and to devise measures for re-connecting that portion of the District with Maryland. The letter, thus signed, expresses the conviction that no alternative, consistent with their interest and self respect is left them but that of a re-connection with Maryland, their "ancient parent," and thus to restore to them, at least in part, the right of "self government." In accordance with this requisition, the Mayor has issued a notice inviting a public meeting, in that city, on Monday evening next.

The Metropolitan declares in reference to this question, that the "bold measure" of retrocession, which used to meet so much opposition, is now generally advocated among the citizens of Georgetown.

Well patronized newspapers, wherever published, says the Poughkeepsie Telegraph, point as certainly as the needle to the pole, to enterprise and public spirit in a place. There is no mistake in this.

So accustomed have we become to judge in this matter, that all we wish to see, when we hear a thriving village spoken well of, is a well conducted paper from it, and we promise to tell by it whether the report in its favor is correct or not. If it has many advertisements compactly set, and of different kinds, we will answer that there are men of the right kind there. But if the paper is barren of advertisements, the matter set in large type, we put it down that the report is unfounded.

**YOUNG HYSON IN OHIO.**—Mr. John Platt, of Marietta, Ohio, advertises in a paper of that place that he has succeeded in cultivating the genuine Tea Plant of China. He has, he says, raised the plant for ten years past at Marietta, after a series of expensive experiments, has been fully successful in discovering the art of drying and manufacturing the leaves into tea of a quality quite equal to imported Young Hyson. He offers gratuitously to furnish seed of the last year's growth to any gentleman desirous of pursuing the cultivation.

A peck of green peas was recently sold at Boston for ten dollars and a half.
