

## About Consumptive School Teachers.

State Board of Health Bulletin  
Dr. I. M. Washburn, Health Officer of Jasper county, writes: "A young lady having tuberculosis wishes to teach school. What is the law upon the subject?"

There is no law which directly forbids the employment of school teachers affected with tuberculosis. There is, however, a law which says that persons having any infectious disease which is listed in the Rules of the State Board of Health shall not be allowed in the schools. These diseases are listed in Rule 12, Book of Instructions, page 45:

Rule 12 The infectious and contagious diseases which shall be immediately reported to the Health Officer having jurisdiction are hereby declared to be yellow fever, smallpox, cholera, diphtheria, membranous croup, scarlet fever, typhus fever, typhoid fever, bubonic plague, leprosy and pulmonary consumption.

Pulmonary consumption and typhoid fever shall not be quarantined, as they are to be reported for record only.

County Boards, also City and Town Boards, have power to pass ordinances which would cover this matter. Any County Board may formally pass an order forbidding the employment of teachers having tuberculosis or any transmissible disease. There would be good reason for such an order, because it is contrary to the best interests of any person to be a teacher who has a chronic ailment or an infectious disease. It is also clearly against the best interests of the pupils and the community. Sick persons cannot possibly be good teachers. A professional teacher who has tuberculosis has our fullest sympathy, but it is not sympathy which governs in this instance.

## NOT CAUSEL BY GERMS.

No Dyspepsia Microbe—One Disease That Has No Bacillus.

It really seems refreshing in these days of germs and microbes to know that there is one disease at least where a germicide does not have to be used to cure it.

Dyspepsia is a plain, ordinary, common, irritable disease that has all kinds of causes except a germ. To cure it, the inflamed and irritated organs should be relieved for a time of part of their work. Mi-o-na, the one guaranteed cure for dyspepsia, meets these conditions and also gives strength and tone to the whole system.

A few days treatment will show the great good Mi-o-na can do and its use for a reasonable length of time will result in a complete cure. No one should hesitate trying this remedy. It is as certain to be successful in curing dyspepsia and stomach troubles as anything can be. A two week's treatment costs but 50 cents.

Mi-o-na is sold by B. F. Fendig on the fairest plan imaginable, with an absolute guarantee to refund the money in case it does not cure. He will sell you Mi-o-na on trial with the positive understanding that if it does not give satisfaction the money is to be returned without question. A guarantee like this cannot fail to inspire confidence. The purchaser runs no risk whatever.
