

EDISON WORKS ON NEW SUBMARINE

Inventor Proposes to Provide Ship With Gills to Enable It to Stay Under the Water Indefinitely.

NEW YORK, Oct. 12.—Thomas A. Edison is at work on a submarine which will be provided with gills similar to those of a fish. His experiments cover the past year and are almost perfected. When he presents his boat for the inspection of naval experts it will be possible for it to remain under water indefinitely, extracting the oxygen from the sea water.

This was learned Sunday when in company with the Secretary of the Navy and Mrs. Daniels, Mrs. Edison and Miller B. Hutchinson, chief engineer of the Edison laboratories at Orange, N. J., the world's greatest inventor made his first trip of inspection to a battleship, the New York at the Brooklyn navy yard.

Mr. Edison also visited the submarine G-4 to inspect the working of a storage battery which he designed and built at the request of the navy department. Batteries heretofore used have been of a type which gives off chlorine gas when it comes in contact with salt water.

It is next to impossible to keep the batteries of a submarine from becoming wet with sea water. It is announced that Edison's invention has met all tests required of it and probably will be adopted by the navy.

The submarine with gills interested the navy men. Mr. Edison explained that he believed he had perfected the application of the principle and said that he had arrived at his solution by actual study of fish.

When he started on the invention Mr. Edison went to the fisheries at Battery park where the attendants lifted from the tanks many species of fish. These the inventor held in his hand as long as possible without inhaling them, studying the motion of their gills as they gasped for breath. All his experiments have been based on what he learned in this study.

THOUSANDS VISITED PREVENTION EXHIBIT

One of the Best Ever Arranged by South Bend People, Dr. Rosenbury's Comment.

The doors of the Disease Prevention exhibit rooms at 209 S. Michigan st., which have been open to the public since Oct. 3, were closed last night after what was termed a most satisfactory display by Dr. Charles Rosenbury, president of the board of health. For the past two weeks hundreds of pamphlets pertaining to health subjects were distributed to visitors.

It was conceded by all that the exhibit was one of the best the city has ever shown. That unlimited good will result from the lessons taught by the display was the opinion of Dr. Rosenbury.

Many of the exhibits were the property of eastern societies and will be returned for further use by them. The exhibit by local organizations were equally instructive and entertaining.

J. H. Wright had charge of the exhibits and much praise was given him for the satisfactory display.

SPECIAL DEVOTIONS AT ST. JOSEPH'S CHURCH

Forty Hours Will Be Brought to Close Tuesday Night—Father Carriero to Speak.

Forty hours devotion began yesterday morning with solemn high mass at St. Joseph's Catholic church, Fr. P. J. Carroll, pastor. Fr. Eugene Burke of Notre Dame was celebrant. Fr. Thomas Burke, deacon; Fr. Frederick Gassensmith, sub-deacon; Fr. William Connor acted as master of ceremonies assisted by Fr. Ulrich Hise. Following the mass a procession of 40 girls and 26 altar boys carrying candles marched around the aisles of the church. Father Eugene Burke carried the holy sacrament.

At 7:30 in the morning the Holy Name society approached communion in a body, 300 being present.

This morning at 7:30 the Children of Mary and the Junior Children of Mary will approach communion. Services tomorrow night at 7:30 will observe the closing of the holy hour. Fr. Leonard Carriero will preach while Fr. Morrissey of Notre Dame will be celebrant at benediction.

NOTICE OF ADMINISTRATION.
Notice is hereby given that the undersigned has been appointed by the Probate Court of St. Joseph County, State of Indiana, administrator of the estate of Charles F. Kye, late of St. Joseph County, deceased. Said estate is supposed to be solvent.
HERMAN F. LANG, Administrator.
Oct. 7, 1914.
F. J. L. MEYER, Atty. for Estate.

Little Italian Count and Countess Notable Arrivals From Europe

COUNT STEPHANO AND COUNTESS AGNESE DI CELERE.

NEW YORK.—Among the recent arrivals in this country from Europe were a handsome young Italian count and countess, who have just gone to Washington to become members of the social colony there. They are Count Stephano di Celere, aged five, and his sister, Countess Agnese, aged 12. They are the children of the new Italian ambassador to the United States and will be educated in this country as long as their father remains ambassador.

Skin Like a Lily or a Rose— It Is Easy and Sure—A Few Other Beauty Secrets

Valeska Suratt, Celebrated on the American Stage for Her Self-Made Beauty, Gives Some Extraordinary and Simple Methods of Acquiring Quick Beauty.

BY MISS VALESKA SURATT.

HOW often have we seen women of beautiful features, but with poor complexion attracting far less attention than women of merely ordinary features, but with complexions superb and adorable. Faces clear and pure as lilies are the faces that conquer. There is only a small percentage of women who are really beautiful in features. Providence alone regulates this circumstance. But there are millions of women who little realize the tremendous advantage which can be secured by having a perfect complexion in spite of a lack of beauty of features. The quick changes which are now made possible in skin beauty are really startling, but it is regrettable to note that the means employed to obtain these changes are not only weak, but useless in most cases. It all depends on what

"It Is Now Comparatively Easy to Make the Skin Exquisite in a Very Short Time."

you use. There is a formula which eclipses any preparation known for beautifying the skin. Its results are extraordinary. I advise every woman to stop using all other skin-beautifying creams and use this formula. Simply mix one tablespoonful of glycerine in a pint of water and add one ounce of Zintone. This forms a cream, use it liberally and very soon your skin will take on a most decided cleanness and purity and every muddy spot, red spot, freckle and blemish will have disappeared. This formula should mean a fortune to the woman who uses it. The formula can be secured at any drug store at a moderate price.

MRS. OPIE F.—There is a wrinkle-removing formula which has the peculiar property of making the skin plump and vigorous. This is the only way in which all wrinkles, both little and big can ever be successfully removed. The youthful appearance produced in a short time by the use of this formula is really startling. Mix this at home by adding to a half pint of hot water two tablespoonfuls of glycerine and two ounces of opol. This makes half a pint of the cream, costing several times less than you would have to pay for a cream at the store, and which would not be successful. Any drug store will

supply you with the opol. By using this cream faithfully, and liberally, you will have attained in short order your fondest wish for a perfect, quick wrinkle-eradicator.

ROSA B. O.—The only way to remove dandruff is to dissolve it. Soap cannot do it, simply because of the alkali which it contains. No amount of soap-scrubbing with soap will remove dandruff. The only thing known which will dissolve all fatty accumulations and dandruff is eggol. This surpasses any hair tonic or invigorant. You can get enough eggol to produce twelve or more of these surpassing head washes. Every head of hair needs a hair-wash of this kind.

TEARFUL.—Falling of hair can be positively and quickly stopped by using a mixture of half a pint of alcohol, half a pint of water, (or a full pint of bay rum in place of alcohol and water) and one ounce of beta-quinol, thoroughly mixed. This surpasses any hair tonic or invigorant. I have ever known. It is a hair restorer, actually compelling the hair to grow luxuriantly. Frequently several inches a month. Hair stops falling, the hair becomes fluffy, silky and thick, and the formation of dandruff is completely stopped.

MRS. G. O. N.—Blackheads are simply a local trouble and blood tones will do no good. It is not generally known that blackheads may be thoroughly removed in a few minutes by getting a sponge, wetting it with hot water, sprinkling some norexin and it, and then rubbing it on the blackheads. It is almost magical and every blackhead will disappear. Do this every day and you will not be troubled further. It works equally well in very severe cases.

SARAH M. H.—I do not wonder that you did not succeed in removing the stubborn hairs you mention. Why not dissolve them away instead of burning them off? By moistening the hairs with simple sudra solution, every hair, heavy and light, disappears in a few moments. Instead of leaving a red spot where applied as other depilatories do, the skin, on the contrary, is left soft, smooth and clear. No matter how sensitive the skin or how hairy the growth it will work without fail.

BEREFT.—To develop the bust has often proved a difficult matter. Although you can never be sure of success, nevertheless the following formula is the very best you can ever hope to find. It is safe and if anything can succeed, this certainly should. To a half pint of cold water, add two ounces of metone, obtainable at any drug store, and half a cup of sugar. Mix thoroughly. Take of this tea-spoonful after meals and at bedtime.

MRS. T. M. P.—Applications of hydro-lyzed oak to arm-pits will put an end to the unnatural and excessive perspiration. There is nothing so effective, so cooling and so economical. This keeps the arm-pits always fresh, keeps the perspiration under control, prevents embarrassment and the damage to garments from fading. It also destroys all body odors immediately.

Here's An Ad Just Brimfull of Good Honest Values For You

With **COUPON**
Infants' Sweaters
All wool, white, navy, red, 87c
