

## WANTS MARRIAGE LEGALIZED AFTER FORTY YEAR TANGLE

Woman Asks Legislature to Validate Ceremony Performed Many Years Ago.

BOSTON, Mass., April 29.—Mary Alice Stewart Butman of Cohasset has asked the legislature to legalize her marriage to her dead husband, with whom she had lived 40 years as man and wife.

She also asked it to validate the man's divorce from the woman who is alleged to have left him a generation ago and who recently appeared on the scene.

The story of the unusual marital tangle in which the future of five children also is involved, was told to Mrs. Butman to the legislative committee on legal affairs by Atty. William R. Sears.

Sears said that Joseph B. Butman, a young Civil war veteran, in 1865 married Geth Hellenbach. She later left him, taking their three children along. Butman obtained divorce papers from a man who purported to be her.

Is Snared Tangle. In 1880, Butman and Mary Alice Stewart were married. Five children came to them. Two years ago the original Mrs. Butman put in an appearance. She brought suit for bigamy, and Butman was convicted in the Quincy court, but Dist. Atty. Katmann, following an investigation, not pressed the case. The divorce papers were not to be found in the records of the court.

Butman gave the first Mrs. Butman \$1,000, and on March 1 Judge Wait of the superior court granted a decree nisi. Four days later Butman died and the divorce could not be made absolute.

The bill seeks to establish the divorce of last month, the marriage of 1880 and the legitimacy of the five children.

### APPARATUS CARRYING MESSAGE TO PLANET MARS WILL GET TEST

WASHINGTON, April 29.—Test of the new rocket apparatus designed by Prof. Robert H. Goddard to reach altitudes far above the earth's air envelope and, as a vague possibility, even to the moon, will be made late in July at Worcester, Mass., the National Geographical Society announced Wednesday. The immediate object of the inventor, the announcement said, was "the study of the aurora, and of the short wave lengths in the spectrum of the sun which are entirely absorbed by the air." At more moderate altitudes, Prof. Goddard hopes to obtain valuable information concerning measurements of wind velocity, humidity, temperature and pressure, all of which enter vitally into the business of weather forecasting.

The rocket will be propelled by the explosion of successive charges.

COLUMBUS, O., April 29.—The Ohio State Journal and Columbus Dispatch announced Thursday that the price of their Sunday editions will be increased from 7 to 10 cents, effective Sunday next.
