## Picked Up.

Know yourself. Everybody else knows you.

The stupid woman is one of nature's misfits.

The man who is servile is a disgrace to manhood.

The honest poor are no scarcer than the honest rich.

Directness of aim is of more importance than loudness of report.

Women demand better manners of men than they possess themselves.

"His Honor is at steak," said the waiter when the judge was at dinner.

Opportunities are bald behind. You must catch them by the forelock.

Keep your eyes peeled for opportunities, and if they do not show up, create them.

The man who dresses to please his wife should never be asked to perform any further penance.

Every mother thinks that her boy is about perfect although he may be the veriest rascal on earth.

A girl sometimes coaxes her lover not to spend so much money on her, but she doesn't have to coax him after they are married.

Be honest. Dishonesty seldom makes one rich and when it does, riches are a curse. There is no such thing as dishonest success.

## Hicks' April Weather.

It will be prudent to count on general and severe disturbances from the 5th to 9th, and to expect cold, with frost and light freezing as the storm area works eastward of intermediate points. On and touching the 12th and 13th, thermometers and barometers will swing back to storm readings, heavy showers, with hail, thunder and wind, will strike all sections in their march to the Atlantic. Very cold weather, with frosts, will succeed these disturbances.

The 17th to 21st will constitute the next regular period. The crisis of the disturbances will be reached from 18th, to night of the 20th, the full moon on the 19th having a tendency to centralize disturbing forces on that date. The showery conditions, usually existing all through April, will take on new power and organize into storms of great extent and energy at this period, as well as all the dates of central disturbances. Very cool nights, with frost generally, may be expected between the storms of this period and the reactionary changes and storms due centrally on the 24th and 25th. Another cool dash—severe enough to bring frost in the north—will follow storms about these dates.

Without useless foreboding and dread, we may reasonably expect tornadoic storms in many places during the storm periods in April.

Before the end of April the season will be well opened, with a propitious outlook for all who have their agricultural interests well in hand, and who are planning for early crops.

## The Silver Agitation.

The silver agitation is making a great stir but the benefits from it will be nothing compared with the investment of a silver quarter in Simmons Liver Regulator powder. It agitates the liver and cures biliousness and sick headache.

Two men from LaPorte joined Coxey's army. Editor Becker, of the Watchman, a populist paper, is said to have joined the army as war correspondent.

Speaker Crisp who was offered the United States senatorship by the governor of Georgia has declined to accept. It is rather tough to be compelled to forego a rich plum like that, but the circumstances, it seems, were against Crisp accepting, at present.

A dinner was given at the residence of Mr. and Mrs. S. A. Robbins last Tuesday in honor of the twenty-fourth birthday of their daughter-in-law Mrs. Chas. S. Robbins. The guest present consisted of the immediate relatives. Mrs. Robbins was presented with a gold watch by her husband in honor of the event.

Col. C. B. Gillette delivered his lecture last Friday evening for the benefit of the G. A. R. "His subject was U. S. Grant." The house was filled and the lecture was enjoyed. This is the second lecture Gillette has given here and the people are so well pleased they have already spoken to him for his other lecture by Henry Ward Beecher.

Dan Brubaker has moved the house he has been renting onto a lot in Place's addition, and will build a new one on the site of the old house. He will commence building soon, and intends putting up quite a fine house. It will be occupied by his son-in-law and daughter, Mr. and Mrs. Ed Koontz.

The following from a contemporary is right to the point: "It's just as sensible to expect a crop of corn to plant itself, grow and finally land in the crib without the help of labor, as to sit calmly down and wait for the town to prosper without any effort. We will get just what we work for. 'Twould be strange indeed if there were not some men in our midst who are willing to do nothing but float around in the pool of stagnation like leeches ready to fasten to the body of prosperity and suck the blood which they did not help to make. Don't be a leech."

On Monday evening the ladies of the M. E. Church, about 65 in number, each with a pound or so of carpet rags, gathered at the parsonage while Mrs. Stockbarger was at the Epworth League and when she arrived home she was much taken by surprise to see her house full of ladies busily engaged, and when after spending a very pleasant evening, they departed leaving 65 large balls of rags already for the weaver, they had only expressed a little of the good will and esteem in which they hold their minister's most estimable wife.

From the pen of Editor Stoll, of the South Bend Times, is the following pretty tribute to robin redbreast: "The bright sunshine and warm rains have awakened the buds and brought back the robins from the orange grove. If there is a cheerier harbinger of spring than this same brave, friendly robin, his name is still unknown. The green has scarcely sprinkled the gray branches, yet his note of faith has been heard these many mornings, and 'tis sweet as maple syrup and light biscuit. He briskly finds something to do, and whether the breakfast crumbs are many or few, he goes about his business with an air totally indifferent to failure."

A candidate for an office in one of the counties of the state publishes the following tearful appeal: "Owing to the bad condition of the mud roads I can not visit my friends, but I will assure the people if they want to elect the head man, and one who is in every way capable and honest, and whose wife and children will feel prayerfully grateful, then they must vote for me. You will make no mistake if you vote for me, I'll assure you."

Sam Cunningham, who returned from California recently, brought back with him some interesting newspapers which he has left at this office for our perusal. The papers are the Midland, the Californian, the San Francisco, and being fac simile copies of the papers published there in the stirring times of '49. They contain a great deal of matter about the early stamping days of California that is very interesting and amusing.

A good story, for which Miss Nettie Hammond vouches, comes all the way from the Hawaiian Islands about Hon. L. A. Thurston, minister to this country. "He was returning from Punahon college. The boat landed at Maalaea bay, and there was no one to meet him, consequently he started to walk the seven miles to Wailuku. On the plains he found himself surrounded by a herd of wild cattle. He took in the situation and then dropped on his hands and walked with his heels kicking the air, while he yelled 'Pan-ahon hash!' The cattle took flight."—LaPorte Herald.
