A Scientific Remedy.

For a long time Brazilian Balm was a puzzle to the doctors. It cured so many diseases that seemed contrary to each other—diseases which were supposed to require a directly opposite treatment. The secret was at last revealed when it was discovered that the Balm is a most potent germicide; that it kills disease germs or microbes in any part of the system. This discovery proved that its cures were purely scientific and in harmony with the latest revelations of bacteriology. For nearly all germ diseases, as Catarrh, Hay Fever, Consumption, Dyspepsia, Typhoid and Scarlet Fever, Piles, Measles, Chicken-pox, Rheumatism, Mumps, Lockjaw, and other germ diseases attended with inflammation and fever, it has proved itself for 10 years a perfect and reliable antidote.
