

## INSURANCE AGENTS

## HOLD MEETING

Charles R. Watkins, of Indianapolis, state agent for the New York Underwriters' Insurance Co., was elected president of the Indiana Underwriters' Association at the close of its annual convention at the Spink-Wawasee Hotel. The convention convened two days and was attended by 150 agents from various sections of the state. Mr. Watkins succeeds George W. Mercier of Indianapolis, state agent for the Hanover Fire Insurance Company.

Other officers elected follow: Vice-President, Robert C. Walker of Indianapolis, state agent of the Royal-Liverpool group; Secretary-Treasurer, Miss Elizabeth S. Cooper, of Indianapolis. Miss Cooper was re-elected. An executive committee will be appointed by Mr. Watkins within the next few weeks.

Principal speakers for the two-day meeting were M. G. Grannatt, New York City, assistant United States Manager for the Royal-Liverpool group, and Louis A. Warren, director of the Lincoln Life Foundation of Fort Wayne.

REA EXHIBIT TO  
SHOW NEAR HERE

You are invited to attend what we think will be one of the finest traveling exhibits you have ever seen. It is the REA Electric Farm Equipment Show. REA and your cooperative are bringing it to you. It will stop at Otis Nellan's farm, Marshall-Fulton County Line Rd., 2 1-2 miles west of U. S. highway No. 31. The dates are July 6 and 7, 1939. It will be free.

The REA Farm Equipment Show is a traveling demonstration of what electricity can do for you, especially how you can make it pay its way by putting it to work. Manufacturers of feed grinders, motors, water pumps, milk coolers, electric fences, and so on, will have their equipment set up and in operation. You will see the feed grinders actually grinding feed which one of you will bring in. You will see the pumps working. At a lunch tent, you will be able to buy piping hot lunches prepared with electric cooking aids. In a big tent you will hear specialists from REA and from your own state extension service tell about the value of electricity in farming operations and explain comparative cost figures. You will have a chance to see examples of safe and adequate wiring and proper lighting. You will see a demonstration of electric ranges, refrigerators, and other kitchen equipment and perhaps take part. This will be conducted by an REA home economist.

Your community will remember the REA Electric Farm Equipment Show in your neighborhood as an outstanding event. It has been received enthusiastically in other parts of the country. It is getting better as it goes along. We want you to see it. Bring lots of questions about your own electrical problems. Try to stump the experts. See how electricity can help you.

When the recent tornado struck Anoka, Minn., an American Legion meeting was being held in the city hall after a failure to obtain the local armory for the purpose. The twister wrecked the armory, but did not damage the city hall.

URGES USE OF EGGS  
IN SUMMER MEALS

Now that eggs are cheap and plentiful, one or more a day may be used to advantage for every member of the family, says a well-known nutritionalist.

Eggs, one of the eight foods recently listed as surplus by the Secretary of Agriculture, are needed in every diet.

Eggs are one of the best of the body builders, added the expert. They are, especially the yolks, an outstanding source of iron — a mineral in which many diets are low. All the vitamin A and D value of eggs is in the yolk. The amount of either one present depends on the diet of the hen. Eggs also contain varying amounts of three other vitamins, and they are rich in calcium and phosphorus.

Consumers looking for good eggs on the market will do well to place more emphasis on the way an egg has been handled than on its age or the color of its shell. An egg only 24 hours old that has been in a warm place all the time will be less fresh than an older egg that has been kept cool. Color of shell is no clue to either egg quality or food value.

In many stores, eggs graded by local, state or federal graders are available. These graders are not uniform yet from state to state, but more and more concerns are adopting those grades set up by the United States Department of Agriculture.

When eggs are brought home, they should go into the refrigerator in the next to the coolest spot. If the shells are soiled, wipe them with a rough, dry cloth. But do not wash them, because water removes the "bloom" of the egg that forms a protective seal for the shell.

Buffalo, Minneapolis, Omaha, Milwaukee, Portland, Ore., and Salt Lake City are among the larger cities which had no deaths from typhoid fever during 1938. Bridgeport, Conn., with approximately 150,000 population, has had no typhoid fatality in five years.

When a shipment of fish specimens from Pacific waters arrived at the Shedd Aquarium in Chicago, it appeared that they were about to die. After being placed in still water for a while, they revived, and scientists say they were only seasick from their long journey.

## The SNAPSHOT GUILD

## PICTURES AND SPORT

Combine photography with your sports or other hobbies... for studies of "form" in golf... wild-life studies if you are a hiker... and so on. Picture taking mixes well with almost any other hobby.

ONE of the fascinating features of photography, as a hobby, is that it fits in perfectly with almost any other hobby or interest. In particular, nowadays, outdoor enthusiasts are finding that picture taking harmonizes admirably with such sports as hunting, fishing, hiking, golf, and other open-air activities.

More sports enthusiasts are taking pictures because modern cameras are so light, compact, and easy to carry. Cameras taking fairly large pictures have been reduced in bulk in recent years, while many fine present-day miniature cameras are so compactly built that they can be carried in a pocket at all times.

Operation has been made more convenient, too, so that picture taking is quick and easy. Therefore, the sportsman can use his camera about as he would a notebook, "jotting down" in picture form each interesting detail of his trip or sport activities.

This is the modern way to use a camera. Instead of taking random snapshots, one here, one there, the wise picture taker tries to keep a

full, well-rounded picture record of all the things he does and sees. And such "notebook" pictures add greatly to the pleasure of other sports and hobbies.

For example, the hiker or mountain climber may employ his camera for pictures of woodland plants and wild life—gradually building up a collection which is genuinely worth while. The hunter records his camps, his kills, the trails and waters he traverses—building up an enviable story of travel and outdoor life. The golf professional may use a home movie camera to make slow-motion pictures of his students, so that they can study their errors on the movie screen—or golfers may take movies of each other for the same purpose.

From these examples, it is easy to see how photography can enrich and broaden other hobbies. It fits in with any of them—and its great virtue is that pictures have lasting value. Therefore, by using the camera to record our other hobbies and activities, we can put them in enduring form... and enjoy them over and over again.

B. & O. APPOINTS  
NEW REPRESENTATIVE

Pedro Perez, a native of Panama, has been appointed Latin-American representative of the Baltimore and Ohio Railroad, with headquarters in New York City.

Following his university career, Mr. Perez taught school for three years. He then traveled extensively in Latin-American countries, first as import and export commission merchant and later as freight clerk and assistant purser on ships of the Panama Mail and Grace Line Companies.

Later he took courses at New York City College and New York, specializing in Foreign Trade, Transportation and International Finance.

As head of the B. & O. Latin-American Transportation Bureau, Mr. Perez will be glad to arrange tours for those planning either pleasure or business travel in So. America, and also to advise generally on commercial and trade conditions in that country.

After an engagement lasting 25 years, Lily May Marshall and Joseph Wilsher were married in Braintree, Eng.

## A PERSHING BADGE

An initial order for 65,000 badges for members of the American Legion who will attend the 21st annual convention in Chicago next September has just been placed, to be followed by additional orders as plans for the great event are perfected.

The design of the new badge is a most attractive one, being a medallion of military bronze with a bust portrait of General John J. Pershing as its most prominent feature, and bearing the Legion emblem in the lower center, accompanied by oak and laurel leaves. The top bar, from which the medallion is suspended by a ribbon, shows the Chicago skyline.

John Doctoroff, a widely-known Chicago artist, designed the badge after suggestions by a committee of Chicago Legionnaires. The badges will be made with a slot in the top, so that they may be worn as watchfobs if desired after the convention.

General Pershing is expected to attend the national convention for the first time in ten years and will be given a tremendous ovation by what is expected to be the largest gathering of Legionnaires since the organization was founded 21 years ago.
