

## WATCH YOUR TIRES!

In addition to being dangerous, it's going to be expensive for Pennsylvania motorists and tourists driving through that state to be caught on the highway with tire so worn that the fabric shows through the tread, after September 1, Joseph H. Braun, general council of the Chicago Motor club today warned motorists who contemplate late vacations to the New York World's Fair and other eastern points.

"After September 1, any officer in the state is authorized to stop you and issue warning, giving you 48 hours to repair your tires

or replace them with new ones," he explained. "This new ruling, in addition to rigidly enforcing speed laws, is designed to make the highways even safer by forcing motorists to use equipment which is in good condition, thus further preventing accidents which arise from mechanical defects."

## USE OF THE HIGHWAYS

One of the trends in state legislation that is hard to understand is the enactment of laws which surrender our highways more and more to the enormous trucks that are becoming an intolerable nuisance to the motoring public.

No one objects to trucks of reasonable size, such as those used by farmers and business concerns for ordinary purposes. But there is no justification, economic or otherwise, for permitting legitimate highway traffic to be impeded and endangered by the oversized monstrosities now allowed by the laws of many states.

Every driver of a passenger car or other vehicle of moderate size hates to meet one of these mammoth trucks on the road, for he knows he must be prepared to give way or risk a collision. Furthermore, it cannot be doubted that the hauling of such excessive weights as are carried by the largest trucks causes damage to the highways.

In short, the comfort, safety and highway investment of the general public is being sacrificed to benefit a few, who have little regard for the welfare of anyone except themselves.
