**"MEDAL HONOR" BOOK AGAIN AVAILABLE**

The first printing of "The Medal of Honor", the United States Army's great story of its Medal of Honor and of the courageous men who have won it since it was first authorized on July 12, 1862, was a huge success and sold out almost immediately. To meet the popular demand, a second printing has been authorized and will soon be off the press.

The stories of the bravery of these Medal of Honor winners—men like Lieutenant Audie L. Murphy, who jumped on a burning tank destroyer and, despite a leg wound, killed or wounded about fifty Germans and stopped an attack; or like Corporal Harry R. Harr, who threw himself on a live hand grenade and saved the lives of his comrades at the cost of his own—will linger with you long after you have closed the covers of this thrilling volume.

This book handsomely bound is divided into four major parts: Part I is the history of the Medal of Honor; Part II consists of photographs of Medal of Honor winners of World War II; Part III tells the story of the action for which each person was awarded the Medal of Honor, and lists these persons by wars and campaigns, alphabetically, by last names, and by the states from which they entered the service; and Part IV tells how the information used in the volume was unearthed and has a calendar of documents and a bibliography.

Copies of "The Medal of Honor" may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. at \$4.50 per copy.

**READ THIS—AND REAP!**

For the past 39 years, our country has been enriched by the existence of the Boy Scouts of America. This thriving movement has affected the lives of more than 15,500,000 boys and men who have, in turn, contributed to the general welfare of us all.

The theme of this year's Boy Scout Week is "Adventure"—that's Scouting—but it's much more than that. Boy Scouts get the satisfaction of "learning by doing" exciting things, to "help other people at all times," and enjoying outdoor activities.

No yardstick can measure the harvest of advantage Boy Scouts bring to the nation and the community. But the Scouts depend on the active support of each one of us to increase and extend these benefits.

Let's help them grow—and thereby reap for ourselves a larger crop of healthier, happier young men!

The Original Standley  
**Milk Cooler**

Lifting 6 cans of milk twice a day creates a real Backaching Job. Standley Lift-Saver Milk Coolers, unlike the conventional top-lid type, save you this operation. Just open the wide front doors and slide in the cans.

**COOLS FASTER—CHEAPER—BY NEW REFRIGERATED WATER SPRAY METHOD**

Instead of the old-fashioned water bath, the Standley Cooler works on an entirely new principle: it sprays your milk cans with gallons of constantly circulating ice water, which washes away the heat as it runs off the cans. Don't worry about partially filled cans. They can't tip. Refrigeration is just as efficient whether you have one or all of the cans in place. Cleaning is simple. Just loosen the hose connection, start the pump and the water is out in a jiffy.

This more efficient method cools your milk to meet Grade A requirement—in a fraction of an hour—so fast that bacteria count is held well under the maximum. The extra profit you make on Grade A every day, with the low-cost operation of your Standley Cooler, will soon make it pay for itself.

**MODERN SCIENTIFIC DESIGN CUTS DOWN YOUR COOLING COST**

Also, the ice-water pump is automatically controlled so that it runs only when needed. Just set the time-switch to star; and it stops when the milk is cold.
