## Why not get all this in YOUR new car?

Owners of low-built Hudsons have it!

Owners of New Hudsons are seeking for themselves that the lower a car can be built, the more graceful its lines can be made, the better it will ride, the more sure it will handle, and the safer it will be! Because people who drive Hudsons "step down" into an exciting, new kind of automobile, they enjoy more head room and roomier seats—in an automobile only five feet from ground to top—than in any mass-produced car built today! Yet Hudson has ample road clearance!

But roominess is only one of the wonderful advantages that go with the automobile that is so far ahead it's a protected investment in motor car value.

Here are more: Authentic beauty—the "step down" principle is so basically right it frees

designers of the need for makeshift styling, enables Hudson to achieve pleasing proportions, symmetric, free-flowing lines.

A hug-the-road ride, and a smooth, steady way of going, because Hudson has the lowest center of gravity in any American stock car!

Performance? You bet! Hudson's all-new, high-compression Super-Six engine—or the masterful Super-Eight, get every chance to perform at their brilliant best, because this car is so low-built, so streamlined!

A new measure of safety, because you ride completely encircled by the sturdy, box-section steel girders of Hudson's Monobilt body-and-frame.\*

We invite you to visit your nearby Hudson showroom, to see all the advantages you are entitled to in your new car! \*\*
