

COUNTY SWINE

SCHOOL MARCH 8
E. C. Miller, swine specialist of Purdue University, and Dr. L. M. Hutchings of the Purdue Veterinary Department will be feature speakers at the 1950 swine school to be held in Warsaw on March 8. According to county agent Paul Jackson, the swine school will get underway promptly at ten o'clock and will adjourn at three.

The program will open with Dr. Hutchings discussing disease problems in hogs, and Mr. Miller will follow on the program with a presentation of methods used by some farmers to produce large litters. Plans are being made for those attending the school to have lunch together at noon, and immediately following lunch, ton litter and swine testing awards will be presented to those men qualifying in the county in 1949. Officers of the county swine breeders for 1950 will be elected at the close of the award presentations.

During the afternoon session, Dr. Hutchings will continue his discussion of swine diseases with plenty of time given to answering questions of the audience. Mr. Miller's afternoon topic will be "New Developments in Swine Feeding" with up-to-date information on APF in hog rations.

Robert Merkle, 1949 chairman of the county swine breeders organization, will preside at the meeting. The committee which made plans for the school were Leslie Orr, Washington township; Sam Norris, Franklin township; Robert Merkle, Clay township; LeRoy Harris, Franklin township; and the county agent.

Awards to be presented for swine testing work go to Charles Decker, Clay township; Glenn Johnson, Wayne township; Leslie Orr, Washington township; and LeRoy Norris, Franklin township; and Gold Medals for ton-litter production will be presented to Ronald Severns, Harrison township; Charles Decker, Clay township; and Robert Merkle, Clay township.

All commercial and pure bred swine producers are invited to attend. Reservations for the noon lunch should be sent to the County Extension Office.

It's Smart to include

CONSOWELD
Decorative laminates

in your building or modernization plans

Kitchen walls, counter and sink tops...
wainscoting in nursery and recreation room...
dinettes and kitchen table tops...
bathroom walls and counter tops... sleek, smooth, handsome Consoweld—the miracle plastic surfacing—adds beauty to any home!

So practical, too... a swish of a damp cloth wipes Consoweld sparkling clean. It's highly resistant to moisture, heat, alkali and acids which stain or mar other materials.

Drop in today and let us show you how Consoweld will add functional and decorative beauty to your home.

Do You Want To Cut Your Federal Taxes?

Something For Nothing

You know that you can't keep drawing money out of your bank account without ever putting any in. The bank doesn't play that way. This is also true of Federal financing. Every dollar spent must sooner or later be collected in the form of taxes.

Many of these taxes are hidden, such as the \$2.44 you pay on a \$30 radio, or the 62 cents on the average alarm clock. These are in addition to the direct taxes of which the average citizen is painfully aware.

Tax money is necessary to run our government. But all too much of it is wasted by inefficiency, duplication of effort, overlapping of Federal agencies or appropriations for services to pressure groups.

Heretofore, no one has known how much these government services cost us through waste and inefficiency. But some surprising facts have been revealed by the Commission on the Organization of the Executive Branch of the Government. This twelve-man, bipartisan Commission was created by Congress with the approval of the President. At the suggestion of Mr. Truman, former President Hoover was made its Chairman.

The Army, Navy, and Air Force asked for \$30 billions of appropriations after being told that \$15 billions was all the Nation could afford. The Army applied for \$29,000 tropical uniforms at \$129 apiece and homes for military personnel in Alaska at \$58,000 apiece. Yet every dollar spent in such activities comes out of your pocket in the form of taxes.

Fifty Federal agencies jostle each other collecting statistics at an annual cost to you, the taxpayer, of \$43,000,000. Many of the statistics are of use only to small groups, or collect dust in government files. The Corps of Army Engineers and the Bureau of Reclamation are expert at selling the "something for nothing" idea to the American public. Underestimation of costs appears to be their specialty. The original price tag put on the Colorado-Big Thompson project was \$44 millions. Its final cost was \$131,800,000. Such discrepancies, the Commission wryly notes, "hardly can be explained by increases in labor and material costs."

You may obtain information about how you can fight waste and inefficiency in our government by writing to the Citizens Committee for Reorganization of the Government, 1421 Chestnut Street, Philadelphia 2, Penna. Also write your Congressman! Tell him you want laws enacted which will put into effect the suggestions of the Commission!

Syracuse B. & P. W. Club, 2nd Tuesday of each month.

Chamber of Commerce, 2nd Tuesday night, each month.

In the Mail Bag

To the Editor, Syracuse-Wawasee Journal.

At a meeting last week of the Woman's Christian Temperance Union, it was suggested that since our town received much favorable comment regarding our improved lighting system, that various organizations be invited to unite in a campaign for beautifying the general appearance of our town by urging that all bottles, cans and unsightly trash of every sort, be cleaned off, and kept off the streets, alleys and even the business and private properties of individuals.

The town, by action of the Town Board has rules and regulations regarding this matter, but a little pressure from the Board might help a great deal in its accomplishment.

From where I sit... by Joe Marsh

How to Get That Homework Done

Miss Gilbert, our grammar school principal, spoke the other night at the regular Parent-Teachers' meeting, on getting children to do their homework when they want to listen to the radio.

"We mustn't give them a flat 'no'," Miss Gilbert said. "If we adults really believe in tolerance and moderation, we should instill these qualities in our children. Listening to the radio is fine—in moderation—as long as homework gets done, too."

From where I sit, the lady was dead-right. This radio vs. home-

work problem is a wonderful way to see to it that our youngsters acquire the sensible moderate habits they'll need later on.

I've never believed in hard and fast rules—except where absolutely necessary. Let the other fellow do as he likes, as long as he's temperate and tolerant. Guess that's why I've never felt we should quarrel with the fellow who is partial to a glass of beer—the "Beverage of Moderation."

Joe Marsh
