# WHAT MAKES "THE ROCKET" ROCKET?

"56" HOLIDAY COUPÉ

**Here's why the engine that  
started the high-compression era  
still tops the field today !**

THE ROCKET BROUGHT HIGH-COMPRESSION performance to motoring . . . set the standards . . . broke the records.

Today it's the same. With a high in compression of 9.25 to 1 and a displacement of 324 cubic inches, the Rocket packs a potent new wallop.

THERE'S AN EFFORTLESS SMOOTHNESS that tells you this one is a masterpiece of balance and precision. What's more, this power plant's big-bore, short-stroke design means shorter piston travel for less friction, wear and longer life.

You'll rarely use the full 230<sup>+</sup> horsepower under the hood. But you'll go for the Rocket's high torque—the force that makes the wheels go 'round. Even at medium speeds, your toe can call a hefty 340 pound-feet of torque into play—to move you away from a light or pass by any emergency. Add Jetaway Hydra-Matic\* and you meet Rocket action at its smoothest.

VISIT OUR SHOWROOM TODAY! We invite you to "Rate the Rocket" on the road. You'll get out of the ordinary . . . into an Olds!
