

THE STATE.

MOUNT VERNON recently indulged in a small earthquake.

Work on the Cairo and Vincennes road is suspended.

INDIANAPOLIS employs 55 public school teachers.

ALBERT YOUNG, LaFayette, lifted 830 pounds at one effort.

THREE prominent citizens of Jeffersonville have lately become insane.

LA FAYETTE sends three more citizens to Michigan City Penitentiary.

An Encampment of Odd Fellows was organized at Minawake, on last Monday night.

A LITTLE son of Peter Joy, at Richmond, was drowned in a tub of water one day last week.

THREE more Evansvillians have just gone to Jeffersonville on long compulsory visits.

THERE are 9,908 pensioners in Indiana, who receive annually, \$1,079,439 12.

The capital of the Greenest Iron and Nail Factory has just been increased \$30,000.

DECATUR COUNTY is afflicted with horse thieves, supposed to belong to respectable families.

THE Huntington Herald says that a brewery in that place has an arctic wind of 264 feet depth.

THE Indianapolis Rolling Mill is now engaged in re-rolling iron for the Indianapolis and St. Louis Road.

PROF. TIMOLEY, of Asbury University, is preparing to take photographs of the total eclipse of the sun, which is to occur on the 7th day of August.

THE portraits of the old Governors of Indiana, are being received at the State Department, to be painted in accordance with the act of the last Legislature.

THE Indianapolis Sentinel says that Spiritualism is fast gaining ground in this city. Quite a number of prominent citizens have recently been converted to this mysterious doctrine.

SOLDIERS of the war of 1812 will rally at Danville, Hendricks county, on the 14th day of August, to petition Congress to pension the few remaining soldiers of that war—Exchange.

THE colored people of Louisville, New Albany and Jeffersonville, are to have a grand celebration on Monday, August 9th. Fred Douglas has been invited, and is expected to be present.

W. W. HIGGINS, Warden of the Northern Prison, on Thursday drew a warrant for \$12,298 10 to cover the expenses of that institution for the last quarter. The receipts will fully cover the amount.

NEAR Fort Wayne on Wednesday night a Frenchman, named Frank Bailey, was run over and instantly killed while lying on the track of the Wabash railroad in a state of beastly intoxication.

GOV. BAKER has been in correspondence with persons in New Albany with relation to the pardon of Halpine, the idiotic man sentenced to ten years in the penitentiary by a Floyd county jury.

THE Sentinel says the State Fair this fall will not doubt be the best exhibition ever given in Indiana. A lively interest is manifested among farmers and stock raisers.

A WARRANT for \$44,672 22 was drawn by the Auditor of State on Wednesday for the balance of the State Debt Sinking Fund on hand. It will be applied by the Agent of State in the redemption of five per cent. bonds.

THE State Geologist is now engaged on a map of Clay and Greene counties, which will give the location of all the coal mines and beds in that region. He will make an exploration of Fountain and Warren counties next week.

AT Jeffersonville, on Sunday afternoon, a soldier named Ebers, while drunk, went to bed in his house on Chestnut street. He laid face downwards on the pillow, and was thought to be asleep. It was discovered, however, some time after he laid down, that he was dead, having smothered to death upon the pillow.

THE New Albany Commercial is informed by a correspondent who writes from near Martinsburg, Washington county, that the recent terrible murder and arson at Farrabee's Station, and the many other murders that have occurred in that county, have led to the organization of a Vigilance Committee, and that this Committee holds regular secret meetings with a view to taking summary vengeance upon some of the villains in that county.

THE Washington, Davies county, Gazette says: We have the astounding information from some of the knowing ones, that a gay youth, about the color of a new saddle, had eloped with a married white woman, the wife of one of our first mechanics. This announcement seemed so monstrous to us, at first, we gave it little credence, but inquiry has confirmed the fact. This extraordinary proceeding created the greatest astonishment, yet, some would say, "it is just what might be expected."

As old gentlemen who reside a few miles from Indianapolis, married a widow lady about one year ago, who had a daughter aged seventeen years. The old gentleman had a daughter the same age. These step-sisters were wooed and won by two step-brothers, and on Wednesday the happy old gent led a pair of prospective son-in-laws into the office of the County Clerk to procure the necessary papers for a double wedding at his house.

THE colored people of Jennings county are surrounding counties design holding a celebration in honor of the emancipation proclamation, at the fair grounds between this place and North Vernon, on the 22d of September—Vernon Banner.

THE La Fayette Journal says Will Pounds, city editor of the Indianapolis Journal, was presented with a little responsibility on Wednesday. Thereupon transpired a miracle—one small Pounds weighed nine pounds!

FROM the officers of the steamer Sam Orr, we learn that W. B. Griffith, a colored man, and a long time employed at the Dry Docks in this city, was drowned by falling off a barge, at Shoelwell Mines, on last Thursday—Evansville Journal.

THE German societies in Indianapolis are making extensive preparations for the celebration of the one hundredth anniversary of Humboldt's birthday, September 14. All nationalities will be invited to participate in the festivities of the occasion.

THE Greenest Iron and Nail Factory says: A lively fight, Monday afternoon, which resulted in the shooting of Arthur Mason by James Maden. Maden received two shots, one in the fleshy part of the right arm, the other glancing his right side.

GEO. S. SONNAT, Evansville, has sold his handsome residence on First street, to Samuel Bayard, Esq., for the sum of \$25,000. This is one of the most elegant and desirable residences in the city, and perhaps the most complete in all its appointments.

THERE are 75 soldiers in the Home at Knightstown, and 174 soldiers in the Orphan's Home at the same place. Under the resolution of the last Legislature, providing for the transfer of the soldiers to the Orphan Home, not more than two or three have been taken there, the soldiers refusing to leave the State.

THE Sentinel learns that Mr. Alexander Denman, who resides about a quarter of a mile from Yorktown, was struck and instantly killed by lightning, while working in a barnyard, about noon on Wednesday. Mr. Denman was a man of wealth and influence in his neighborhood, and enjoyed the good will and esteem of all in that locality.

THE Madison Courier says that a young man in that vicinity was taken sick about two years ago, and fell into a deep sleep, from which he only awoke a few weeks since. The first expression he made on coming to, was, "I breakfast ready!" just as though he had been asleep but one night. He is now in good health.

THE Indianapolis Commercial says that within a day or two after the committee from the State University had bargained for the Owen cabinet, a letter was received from Prof. Agassiz stating that he would send a man to purchase and that price was no object. This cabinet will give the University a world wide reputation, as it contains many specimens which can not be duplicated anywhere.

ONE of our State exchanges has a European correspondent who writes that he kept his boat on one night, while crossing the Atlantic, in order that, in case of shipwreck, he might be ready for any emergency. The same sentimental genius has discovered that Burns was "Scotland's great poet," and that draft horses, in Glasgow, "have hair on the hinder part of their legs." We trust that he will not fail to secure a sample of that "hair" for the New Albany Natural History Society.

A DISPATCH dated Fort Wayne, 29th inst., says: "About three weeks ago W. Carter received a severe injury in the abdomen, by a kick from a man he was quarreling with. He did not pay any attention to it at the time, but it mortified him and he died of the effects of it, mortification having set in. The party inflicting the injury has not yet been arrested, and it is understood that when the officers attempted his arrest he was aided in making his escape by his harvest hands he was working with."

THE Mitchell Commercial says that on Thursday last a young man named Benjamin Puett, a brakeman on the freight train, on the L. N. & C. R. R., while endeavoring to detach a part of the train when in motion, by some mishap, fell under the cars, several of which passed over his body, mangleing it in a horrible manner. The mangled and scattered parts of his body were gathered up and taken home to his distracted mother, in Bloomington, with whom he had taken breakfast only a short time before the accident.

A COTEMPORARY reports that Mr. William Gay, a prominent furniture manufacturer and dealer, in Jeffersonville, has recently become insane. His affliction is of a mild type, yet it renders him very erratic. A few days ago he visited Cincinnati and purchased three coffins, for a trio of his friends in Jeffersonville. Two of them are designed for the two largest citizens, and one for the smallest man in the place. He is now trying, like Mrs. Todd, to persuade them that these articles are a very good thing to have about the house, but the said gentlemen "can't see it in that light."

THE Russian journals bring us an account of a singular suicide—that of Komaroff, who in 1866 saved the life of the Emperor Alexander, by knocking up the arm of the assassin, Karakozov, just as he was about to direct a pistol against the head of the Czar. The man who was fortunate enough to render this service to His Majesty was a working hatter, and was about thirty-five years of age. From this time out, Komaroff continued to rain upon him. For his pious name was substituted a noble one—that of Kostomski. He received an entailed estate, with all its privileges, was made Colonel of a regiment of the Imperial Guards, and a national subscription was opened for him, which produced nearly two millions of roubles. This favorite of fortune, however, could not stand the intoxication of his good luck, and he sought to counterbalance its giddy effects by another species of intemperance. A hopeless sot, he became an intolerable bore to himself and others, and finally, in one of his desperate fits of drunkenness, hung himself.

"Determination to work, and working." These opinions are certainly worth something, and will doubtless be eagerly studied by the masses of the people.

THE Petersburg Express, after reading the statement that the Minnesota Democratic State Convention indefinitely postponed, says: "The most valuable and most extensive beds of iron ore in Indiana are found associated with the lower members of the coal measures. These ore belong to the class of limonites—the kidney or stone ore of the furnace men."

These ore are easily smelted, run freely, and yield from forty to fifty per cent. of metal. In the northwestern counties of the State, a large bed of ore occurs, covered by several feet of peat and swamp muck. This ore contains from thirty to forty per cent. of iron, is easily reduced, and almost entirely free from sulphur or other harmful impurities.

Secondly, as to coal. It is in this that Indiana excels. The Journal has often and so fully presented the overwhelming superiority of our block coal for the manufacture of iron, that we shall not repeat any of the statements other than to

COLORED SCHOOLS.

Opinion of Attorney General Williamson.

Colored children entitled to the immediate use of the Public Schools.

A short time since, the Superintendent of Public Instruction, at the instance of the Board of School Trustees of the City of Indianapolis, addressed a letter of inquiry to the Attorney General, with a view of obtaining his opinion concerning the effect of the law enacted by the Legislature providing for the education of colored children, and a special reference to the time of its taking effect, whether before or after another enumeration and distribution of the school fund.

To this letter the following answer has been returned:

ATTORNEY GENERAL'S OFFICE, INDIANAPOLIS, July 26, 1869.

B. C. Hobb, Esq., Superintendent of Public Instruction.

DEAR SIR: I am in receipt of your note enclosing that of Mr. Elder, on behalf of the Board of Trustees of the City of Indianapolis, asking my opinion on certain questions arising under the act providing for the education of colored children.

The point presented is whether colored children can be included in the enumeration of the children of the respective school districts, townships, towns and cities of this State for school purposes for the present school terms, or whether their organization into such schools must be postponed for the present or until their proportion of the tax can be assessed and collected.

The act to render taxation for common school purposes uniform, and to provide for the education of the colored children of the State became a law on the 17th day of May, 1869, which provides that "All children of the proper age, without regard to color shall hereafter be included in the enumeration of the children of the respective districts."

The law further provides that "all laws relating to school matters not inconsistent with its provisions shall be deemed applicable to colored schools."

It then becomes the duty of the respective school districts to include colored children, in separate lists, in the enumeration taken between July and September, 1869.

So far as the question presents itself in a legal form it is but the common occurrence of new laws entering the schools each year. And the law is not to be adapted itself to the enumeration of the actual number of children legally entitled to enter the school.

To illustrate: Suppose the "apportionment" of the school fund is made upon actual enumeration and afterwards from immigration into a particular district, the number of scholars or pupils legally entitled to enter the schools is enlarged.

Are they to be excluded from the school for the year because the apportionment is based upon an enumeration that does not represent the actual case?

I am, therefore, of the opinion that under the act of May 13th, 1869, colored children are entitled to be organized into separate schools having all the rights and privileges of other schools in the township.

D. E. WILLIAMSON, Attorney General.

It appears from this that the education of colored children must be immediately provided for, without waiting for the distribution under the present enumeration.

THE MANUFACTURE OF IRON.

Another Statement of the Advantages of Indiana.

The Extent of the Coal Beds and of the Deposit of Ore.

The Facilities for Securing the Ore, the Flux and the Coal.

From the Indianapolis Journal.

There can be no question of the fact that the future of Indianapolis, and indeed of the whole State, depends much upon the manner in which use is made of the advantages at our doors for the manufacture of iron. In former articles we have endeavored to show these things to be so, and although there is nothing new to be said, still upon the question, "Will it pay?" it will be of interest to iterate what has been already published.

Three things are necessary for the manufacture of iron. Given ore, coal and lime, and the production of iron anywhere in the world is not a problem. The advantage lies with the locality that can bring these materials together the most easily; added to the difference in the intrinsic quality of the ingredients themselves. There are incidental matters to be considered, but the three things we have stated are the most important. These secured, the others are easily obtained.

First as to ore. The common varieties in use in the West are the Lake Superior ore and that from the Iron Mountain of Missouri. The experience of the iron makers of Brazil and vicinity is in favor of the Iron Mountain ore, as with Indiana coal, it yields about two per cent. more of iron. Still the Superior ore is most operating in Chicago, there are some ores of Lake Superior, Fourth and fifth lines are in contemplation by way of Danville, Illinois, and Delphi—These are the roads where the Superior ore can be shipped. Besides, four of these routes run to Michigan City, which point, when the harbor is completed, will be nearer to the Superior mines than Chicago is at present. To St. Louis there are four lines either now running, or to be in operation within the next twelve months. And not only do these roads communicate to the West, but we can ship the Iron Mountain ore, or all of them run through the regions where the celebrated "block coal" is most largely obtained. Here in a glance, we can see that the use of the Superior ore is not elsewhere to secure the first necessity in the manufacture. In addition to all this, Indiana has no mean quantity of quality of native limestone, which is prepared by the authority of Governor Baker, we find the following statement on this point:

"The most valuable and most extensive beds of iron ore in Indiana are found associated with the lower members of the coal measures. These ore belong to the class of limonites—the kidney or stone ore of the furnace men."

These ore are easily smelted, run freely, and yield from forty to fifty per cent. of metal. In the northwestern counties of the State, a large bed of ore occurs, covered by several feet of peat and swamp muck. This ore contains from thirty to forty per cent. of iron, is easily reduced, and almost entirely free from sulphur or other harmful impurities.

Secondly, as to coal. It is in this that Indiana excels. The Journal has often and so fully presented the overwhelming superiority of our block coal for the manufacture of iron, that we shall not repeat any of the statements other than to

say that the fact is conceded that no such coal exists in the world so far as has yet been discovered. Here is one great advantage. It requires less quantity of coal to work one ton of ore, and, of course the transportation of coal is three times as expensive as to move the ore; or to put it in a different shape, the advantage is as three to one to have the coal near at hand instead of the ore. In this Indianapolis can overreach St. Louis, Chicago or Milwaukee. We have the coal; they have the ore. The coal from the Ohio river, while they are compelled to move three times as much as we, to obtain the best coal used at the Iron Mountain furnaces, is not at all compared in working quality with our block coal, as the results of furnace tests heretofore published show beyond controversy. The quality of the Indiana coal established, the second point of interest is, that the supply is inexhaustible. We have about eight thousand square miles of coal lands, and still the best coal used at the Iron Mountain furnaces is not at all compared in working quality with our block coal, as the results of furnace tests heretofore published show beyond controversy. The quality of the Indiana coal established, the second point of interest is, that the supply is inexhaustible. We have about eight thousand square miles of coal lands, and still the best coal used at the Iron Mountain furnaces is not at all compared in working quality with our block coal, as the results of furnace tests heretofore published show beyond controversy. The quality of the Indiana coal established, the second point of interest is, that the supply is inexhaustible. The quality of the Indiana coal established, the second point of interest is, that the supply is inexhaustible. We have about eight thousand square miles of coal lands, and still the best coal used at the Iron Mountain furnaces is not at all compared in working quality with our block coal, as the results of furnace tests heretofore published show beyond controversy. The quality of the Indiana coal established, the second point of interest is, that the supply is inexhaustible. We have about eight thousand square miles of coal lands, and still the best coal used at the Iron Mountain furnaces is not at all compared in working quality with our block coal, as the results of furnace tests heretofore published show beyond controversy.
