

NEWS OF KOSCIUSKO & ELKHART COUNTIES

The Warsaw and Columbia City school football teams are arranging for a game at the county seat soon.

The people of Oswego have contributed money for the purpose of purchasing a bell for their new school building.

Warsaw merchants have possession of several worthless checks, and some one is soon to have trouble for issuing them.

C. P. Bliss of Elkhart, was struck by a Lake Shore switch engine and hurled a distance of 20 feet by escaping without serious injury.

Interurban cars between Warsaw and Goshen have been delayed quite a bit of late on account of the bridge just north of Milford sinking and twisting the rails out of shape.

Jacob Ambos, aged 50 years who lives near Waterford, was kicked by a horse last Thursday, several ribs being fractured and internal injuries sustained which may cause his death.

Within less than a year the Butler family near Benton, Ind., has lost three of its members by death. The first to be called was Mrs. William Butler, second the husband and last week a daughter, Mrs. Chas. Juday of Goshen, 35 years of age, leaving two children, one two years old and the other ten months. The cause of her death was Bright's disease.

Prosecuting Attorney Anglin and County Attorney Wood have filed suit in the circuit court against Eff Sharp and Ex-sheriff Mabie, demanding the return of fees collected which did not belong to them. The fees were taken for work on books which the complaint says was paid for by Sharp's salary. It is probably that other suits will be started if some illegal fees are not returned to the county.

James E. Watson Speech.

Everybody likes a big man, one who shows his bigness of mind in his speech and appearance. Such a man is James E. Watson, republican candidate for governor, who addressed a good size crowd on the public square at Syracuse last Thursday noon.

The people began to assemble about 11 o'clock. The Syracuse band played four pieces and the autos carrying Mr. Watson, Senator Hendee, Perry Smith, the "Old Shady" quartet and others arrived from Milford at just about 12. The quartet sang two rousing campaign songs, and Mr. Watson was introduced by Senator Hendee.

In the twenty minutes taken by the speaker, the issue of the campaign were set forth very clearly without any hedging. Those who heard the speech may easily know the position he is taking on all vital questions. Mr. Watson very emphatically stated that if the republicans were victorious in making him governor that should any bill be passed to repeal the new county local option law, he would surely veto it. But that with a republican legislature no such measure would likely come to him.

Of course after the speech and the departure of the party for Warsaw, there were a few heated arguments on the corner, with the usual results—no change of opinion.

After Elkhart Paper.

Union men of Elkhart, led by oil-garmakers, are after the Elkhart Review for misrepresenting facts concerning the recent Gompers meeting at that place. The Review said the meeting was a failure, whereas the chairman of the labor committee over signed statement declares it a success, and brands the Review as unfair.

FORCED TO DOUBLE ITS CAPACITY

The Advance Radiator Co. received word from the president, Mr. Holland at Sauk Centre, Minn. informing the officials here that final papers had been signed and arrangements made for the erection of a new plant at that place.

All the equipment for subsidiary plants is furnished through the parent plant at this place and yields a good profit to stockholders here, and is a long step in placing the

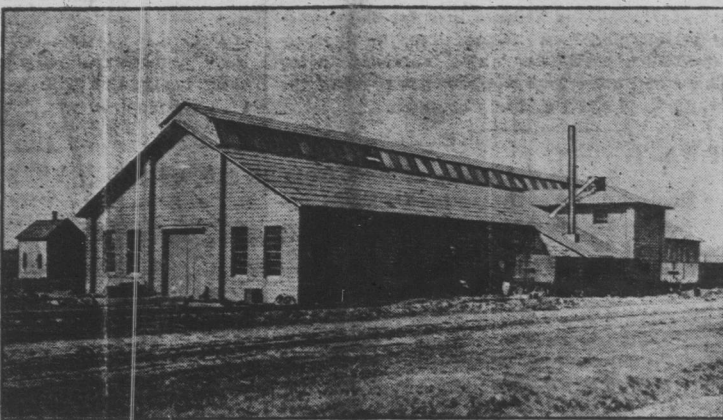

of additional room and facilities, and has been forced to work the men to their limit in order to keep near their orders. Even with all the overtime the company is far behind in work, and it was absolutely necessary that something be done.

A meeting of the stockholders was called for Saturday, Oct. 24, and was very well attended, showing the interest which the stockholders have in the company. The

amount of \$10,000, although it is proposed to keep the majority of the stock for future use, as it may be required from time to time.

With the completion of the additions to the plant a force of perhaps 100 men or more will be employed. This means there will be a material increase in our population and we will pass the 2,000 mark easily.

The company is now offering \$30,000 worth of this new issue of

The Advance Radiator Works which began operations on April 25th, and is forced to double its capacity to take care of its business.

Syracuse plant in the front rank of radiator factories.

The plant just contracted for at Sauk Centre is the third subsidiary company to be formed within the last few months, while there are several other promising points under consideration.

Each subsidiary plant formed adds materially to the profits of the Syracuse plant. For some time the company has been greatly in need

meeting was called to vote on the proposition to increase the capital stock to \$100,000. The fact that the proposition was carried by a practically unanimous vote is the best possible proof of the confidence of the present stockholders in the future of the company.

The proceeds from the sale of the new issue of stock will be used principally to enlarge the plant and take up outstanding bonds to the

stock to the public at par, \$50 per share, and have prepared a very concise and interesting prospectus, which explains very clearly the conditions of the company at present, and you should avail yourself of this information, for we believe the opportunity is a splendid one for the investment of idle funds with good prospects for handsome returns.

Unknown Disease Takes Horses.

It is reported that farmers in Pulaski and Stark counties and those in the southwestern part of LaPorte county have lost 1,500 horses since early last summer from a disease of unknown origin. The horses as a rule, when attacked with the malady, droop as if consumptive, and finally die. In a few instances they recover but if they do, are mere wrecks and have to be killed. One man killed four that survived the attack of the disease.

A Whistling Well.

Stephen Slaymaker of Monroe township had a "whistling well" a few days ago. Workmen drilling for water on his place struck a vein of air in a sheet of gravel about six feet thick and seventy feet below the surface. The air was exceedingly cold which is evidence that this is not a hot air story. The air came up with all the force of natural gas and produced a whistling sound which could be heard for a considerable distance. The pressure forced up the valve so that it would not hold water.

Detective is Thief.

An Evansville firm of wholesale grocers suspected that some of their employees were stealing. They sent to Chicago for a detective and placed him in the store to spy upon the men. In the course of two or three weeks the detective reported three old employees for pilfering and they were promptly discharged; although protesting against the injustice of it. Stealing was again resumed, and then a watch was placed upon the detective. The room he occupied at a boarding house was searched and all the stolen stock was located there. Now the owners are kicking themselves and their former employees are preparing suit for defamation of character and damages.

Not a Bad Set.

The Western Union Telegraph company is sending out instructions to agents throughout the country to accept free of charge all messages filed by public officials or duly constituted committees for the relief of Michigan fire sufferers.

This would indicate that not all men are rogues, who have an opportunity of this kind to show they have sympathy for their brothers in distress.

Typhoid in Garrett.

The city of Garrett is becoming alarmed over the present number of cases of typhoid fever. It was hoped that the present cold weather would put some check to the disease, but it has not yet shown such signs. Several deaths have already occurred.

The physicians have made the statement that the fever undoubtedly comes from the water drawn from the wells of the city, as the city water has been given a thorough test and found to be free from disease germs.

The Waterways Congress.

The lakes to gulf waterway convention at Chicago has brought together one of the greatest assemblages of the country. Aside from the presence of the two big presidential nominees, there were senators from every state in the union.

It is estimated that over 35,000 guests visited the city during the session. This is the third congress held and the work of getting at this great project of an inland waterway from the lakes to the Gulf of Mexico, has been pushed.

President Kavanaugh of the Association is given great credit for the work so far accomplished and is getting at the proposition in the proper manner.

An Aged Night Policeman.

Barney Koltman, who for the past sixteen years has been acting as the night policeman for the business district of Kalamazoo, received a raise of salary at the council meeting last week. Mr. Koltman is nearly eighty years of age and possibly the oldest serving police officer in the state. He gets \$15 a month now from the city, besides collections from the merchants.

Auto Struck By Car.

An automobile in which Mr. and Mrs. Peter T. Longacher of Elkhart were riding was hit by a C. S. B. & N. I. car Friday in Elkhart. Mr. Longacher drove the car out of an alley and onto the track before he saw the approaching car. He then jumped and fell on his head. His lip was badly cut. Mrs. Longacher escaped with a few bruises.

Both rear wheels of the automobile were wrecked and the rear part of the machine crushed. Mr. Longacher recently built a concrete block house at Oakwood Park, for summer use.

Sullivan's Sensible Talk.

John L. Sullivan, ex champion of the prize ring, says some very sensible things occasionally. He always puts in a good word for temperance. His latest utterance is as follows:

"I have learned in life at the age of 50 years, that the will reigns as well as at the age of 30, and that life is real and life is earnest, and the grave is not its goal, and the vanity of human life is like a river, constantly coming on. I have come to realize that to live a life well, no matter how long or how short, is a passport to the Great Beyond. Remember, in all cases to let liquor alone."

Bank on getting something nice at the M. E. church fair to be held on Nov. 27 and 28. Watch for later announcements.

Indiana in Lead.

At a meeting of the special agents and the commission appointed for the National Corn Exposition to be held at Omaha December, 1908, a movement was started to secure funds to purchase a trophy to be awarded annually for the best ten ears of corn exhibited at the National Corn Exposition. The value of this trophy is to be, as decided upon, \$1000.

Through the winnings of Indiana corn growers at the National Corn Exposition held at Chicago last October, and these made at other national shows, Indiana has placed herself in front rank of the corn states. The offering of this trophy at this time gives the state another opportunity to maintain the lead in all movements for the better corn. Already the best artists and designers of the country have been put to work on this trophy and it is hoped to secure one which will eclipse all trophies of the kind ever offered. It is intended that this trophy will bring much advertising and glory, not only to the state but to the corn growers.

The interest among Indiana corn growers for the National Corn Exposition is running high at this time and it is felt by those interested, that a mammoth exhibit will be made by this state at the exposition in December.

Roosevelt in England.

The London Times is making a lot of talk over the apparent "scoop" on the American papers. At dinner on Sunday, October 11, the President told Lord Northcliffe, a part owner of the Times, that he intended to go to Oxford and receive a degree, and at the same time he would make an address. This trip will precede the African hunting trip. We believe all this information was dealt out early this summer. It is evident the Britishers have just discovered the joke.

KOSCIUSKO COUNTY MAN'S VIEWS

A Kosciusko county man, who puts himself on record as being in favor of a law which will permit the buying and selling of fish, adds these suggestions:

"If we were to dictate the law governing the lakes of Kosciusko county, we would say: Use the net from 12 of an inch mesh up for sunfish and the other larger species, and allow them to use nothing smaller, which net might be left on deposit at the county seat all but one month of each year, say from Nov. 15 to Dec. 15. We would prohibit the use of the spear altogether except for carp, suckers, tuffalo, dogfish, etc. If a man wanted to net fish to sell they might require him to pay a reasonable license to the state. We would have a closed season for black bass, crappies, bluegills, etc., from May 10 to July 1, and we would do away with the 12 and 15 hook patent minnows altogether. All casters would use a bait with rot to exceed a trio of hooks. With such a law in force there would be plenty of fish, and our worst violators could be made to obey the law without the endless chain of expense that attends the present law."

A Remarkable Incident.

One remarkable incident of the great dry spell occurred at Grand View, Spencer county. The editor of the Monitor at that place had occasion to cross the river, but instead of going to a bridge he mounted his "bike" and rode across. The water was so low that he only dismounted to wade once or twice and in no place was the water more than a few inches deep. The river is usually navigable at this point for ordinary river steamers. It is the lowest the river has been for many years.

**** COME to me and I can give you light on the art of bread making. Believe we can both be benefited by a good talk.**
