Prof. Shepard of the Milford schools and Prof. Baohman of Syracuse are negotiating for an inter athletic. If it is possible that such an arrangement can be made, it will certainly be both entertaining and aspiring for both schools. These athletic events are conducted in such a way as will bring out the best that a pupil contains, besides they are becoming very popular among our city schools. It will be necessary that ample time be given to rehearsal by both schools, and when the time comes for public contests, it is then the latent forces within those who approve of the union will be brought out. The contests are of a varied character and all tend toward development intellectually and physically. Some will be running, some jumping and others racing, while these will be followed with spelling, reading and writing contests. A game of basket ball between the two schools is to be arranged for in the near future. Prof. Shepard seems to be original in his manner and has a special desire to see things move.—Milford Mail.

## Extract From Game Law.

Section 601 of the present game law makes it a penalty to shoot, destroy or possess any wild squirrel between November 1 of any year and the following July 1 to November 1. Section 608 makes it unlawful to hunt any kind of game, except wild ducks and other water fowl, from October 1 to November 10. Both of these sections are in force today. The open season for squirrels is clearly limited to the time between July 1 and October 1. The only closed season for rabbits is from October 1 to November 10.

The object of this closed season is to keep the violators out of the fields that hunters who observe the law may have a fair chance at the quails November 10. The game laws are being better enforced and more respected every year.

Hunters should be careful not to go into the fields without their resident licenses, as some are paying heavy penalties for this violation.
