OLIVER
EXCELLENCE

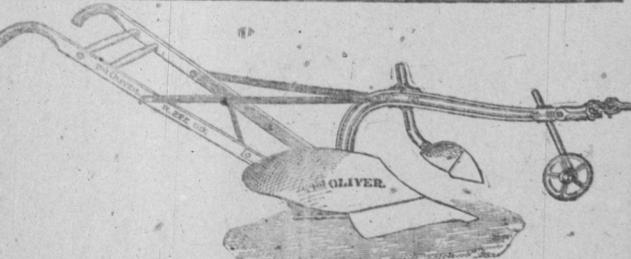

If Somebody Should Offer You

THREE TEN DOLLAR BILLS

You Wouldn't Refuse Them Would You?

That is just what we are doing when we ask you to buy the

Oliver Full Chilled Plows

The Nos. 141 and 222 Steel Beam. Right and Left Hand 12 and 14 inch cut.

Guaranteed to Scour Perfectly in Any Soil, no matter how difficult, in which any other kind or style of plow made will scour.

So much for the satisfactory work they will do but in addition to this

THEY WILL WEAR THREE TIMES AS LONG AS THE BEST STEEL PLOWS

OLIVER'S CHILLED METAL is totally different from any other in that it is much harder, much finer grained, takes an even higher polish than steel, does not scratch in the least and wears indefinitely.

The landside and share are chilled over their entire surfaces just the same as the mouldboard and for this reason the natural wear is perfectly even.

The efficiency of these new plows is so wonderful as to be almost unbelievable. They will scour anywhere that any steel plow will and in ground where it is necessary to stop and use a paddle every 30 or 40 feet, the Nos. 141 and 222 stop through as if they were greased.

We expect you to be rather sceptical at first, but all we ask you to do is to give one of these patterns a trial on your farm as WE KNOW that with the results you will obtain, you will never use any other.

Ask one of your neighbors about them who has possibly seen these plows demonstrated in the field, but above all else

Our neighboring town, North Webster, is quite progressive this year judging from the building that is being done. EDITOR JOURNAL

I arrived at the home of Geo. S. Meyers, near this place July 20, found them well and busy cutting oats. He had out over 100 acres which were good for this season.

He expects to have between 3500 and 4000 bushel. He has out 110 acres of corn which is very good, and nothing but unseasonable weather will prevent him from having an enormous crop.

Mr. Myers has a very fine farm of 233 acres of level prairie land. It is fine drift soil underlaid with blue clay subsoil. There is under construction a large ditch within 20 rods of his farm, which is 40 feet across the top and 13 feet deep with several laterals all emptying into the Tippecanoe river. When that is finished and Mr. Myers puts in some tiling, he will have one of the finest farms in Indiana and I only wish I was the owner of one like it. The price of land seems high to me, ranging from \$100 to \$160 per acre, according to improvements.

Milford Bare, who has been working at the carpenter trade was so badly poisoned he was obliged to quite work for several days.

J. A. Speilman and wife of Wheeling, West Virginia, visited with his sister, Mrs. John Richards and family, Sunday.

They expect to begin threshing (mostly oats) here in about one week and it will take two weeks of good weather to finish. I saw some very heat and clover and some heavy timothy for hay. They cut some timothy with the binder and shock it like wheat.

Mr. and Mrs. Myers send their regards to their old neighbors in and around Syracuse. I do not know just when I will return home as lands are scarce here.

Respectfully,
B. F. Kitson.
