

GREAT AND VALUABLE IMPROVEMENT ON STEAM ENGINES.

ISAAC N. WHITTELEY,
OF VINCENNES.

HAVING INVENTED A NEW AND IMPROVED
STEAM ENGINE,

IS NOW PREPARED TO SELL STATE,
COUNTY, OR INDIVIDUAL RIGHTS.

THE improvement consists in the simplicity of
its construction, the small space it occupies,
the expense saved in the first cost of the engine,
and the quantity of fuel saved.

It, in the first place, will not cost over one-half
as much to manufacture them, will weigh not
more than half as much, will occupy not half the
space, will save much fuel, and is more powerful
than the present reciprocating engine, and withal,
is so simple in its construction that with five min-
utes' explanation, any person can perfectly un-
derstand its principle. Applicable to any thing,
but peculiarly adapted to all mill and shop
purposes.

June 26th, 1840.—a3-f.
The Louisville Journal, St. Louis Republican
and Washburn Courier, will insert the above six
weeks and forward this accounts to this office.
