

FOREIGN NEWS.

THE NEW YORK, arrived at New York on the 22d ult., bringing London news to the 22d Feb. The news by this vessel is that the existence of cholera in London is doubtful, or if it exists there, it is in a very mitigated form.

DUBLIN, Feb. 15.—The Dublin Gazette of last night contains a proclamation under the peace preservation act, declaring fifty one town lands in the county of Kilkenny, and the queen's county, to be in a state of disturbance, and requiring an extraordinary establishment of police. I have no doubt that the adoption of similar measures will be rendered necessary in several parts of Ireland; but this is a matter of common occurrence, and certainly does not warrant the city article in the G. of Monday, which states that there is a rebellion in Ireland, and that 10,000 men have been ordered here for the purpose of suppressing it. There is a formidable and wide spread spirit of discontent and insubordination radically connected with the distressed condition of the people, and the consequent facility with which they are seduced into the perpetration of crime. The mischievous and interested agitators should be immediately silenced, but the peasantry stand in need of redress, and not coercion. In the present wretched state of Ireland, the suffering and crimes of the people, &c. to the agitators on both sides a stock in trade. Fair laws of some kind must be introduced before there can be any hope for improvement.

POLAND.—The Angsburgh Gazette of the 7th inst. contains the following, dated Elbing, Jan. 22.—A very melancholy occurrence is now the general topic of conversation here. In the surrounding towns and villages are still about 5,000 to 6,000 Poles, who partly refuse to return to their country, and cannot do so on account of the exceptions in the Russian amnesty.

On the 27th inst. five hundred of them were ordered to assemble in the village of Fischau, two leagues from our town, in order to separate those who were not allowed to return by the exception in the amnesty, from such as refuse only from fear of being amalgamated with the Russian regiments, and sent into Asia. The proposed separation created in the Poles a suspicion that it was intended to enforce the return of those who had refused to accept the amnesty.—They assumed a hostile position and demanded passports and protection to proceed to France, declaring that they would not suffer any separation.

The officer of the Prussian detachment which guarded the Poles, in vain used every effort to remove all suspicion. The unfortunate Poles rushed forward unarmed to within a few steps of the pointed bayonets, when the commanding officer of the Prussians ordered his men to fire, upon which ten Poles were killed and fifteen wounded.

The Poles then retired, and took the road towards Mariembourg. On their way thither others from the adjacent villages joined them. On their arrival at Mariembourg, they were conveyed to the old castle, which is surrounded with a numerous military force. If immediate and decisive steps are not taken to remove these strangers in a satisfactory manner, our country may be exposed to further misfortunes by their being driven to despair.

Conspiracy at Warsaw.—A letter from Frankfort on the Main of Feb. 4th, says—"A report is current that a conspiracy among the officers of the Russian guard at Warsaw, was discovered and put down on the eve of its explosion, but not until Generals Bergh and Engelhard were killed. One hundred and twenty officers (conspirators) had been sent into the service of Russia."

GENOVA.—The London Courier of Feb. 17, &c.—We have the pleasure of announcing that an important decision has been come to in a conference of the representatives of the five great powers on the subject of Greece.

It has been resolved to put an end to the disturbed state of the country by establishing a regular form of government under the direction of a constitutional sovereign, and for this purpose an offer of the crown has been made to a young German prince of high moral qualifications and unblemished character, who, it is expected, will accept the offer.

The Greek monarch will, we understand, have perfect guarantees for his stability and (nearly 11 years) all hopes of their return to the welfare of his adopted country from the five great powers, who are unanimous in the wish to place Greece in a condition to exercise the influence which she ought to possess in the scale of nations.

Barbadoes papers, to the 25th of last month, have been received at New York.

The paper of the 22d says—"We have the agreeable news from Trinidad, and no wonder, when we think of the danger of the experiments of legislation related to the government of that island. Particulars of the confusion have not yet been received."

BRIGHTON, Feb. 22.—Much excitement, and a pleasing variety, has been produced in the public mind since the arrival of the packet by a report, that the British government had not in July, 1821; from thence they proceeded

only suspended the last order, it came from to Erie, where they went on board the tops-boat to New York, was driven ashore in its operation in the crown colonies, but also had still on board Capt. Bullock, landed at Green Linn bay, on Saturday night last, during the heavy gale. Vessel bulged—crew

Chased to St. Anthony's Falls, Mississippi—sailed, went up to St. Peter's river 300 miles in search of lead mines, where they discovered several very valuable ones—wintered there—went down some river, and down the Mississippi to the mouth of the Missouri, then up the Missouri to the foot of the Rocky Mountains—wintered there, and continued thence to the middle of August—then crossed the mountains and continued there eight days. While travelling by the Frozen Ocean, and having been over Asia, south to the head of the Columbia river, they were overtaken by a snow storm, and compelled to build houses and stay there for nine months, six of which the sun never rose, and the darkness as great as that of our nights. The snow, part of the time, was 14 feet deep, and the company was compelled to eat 41 of their pack horses, to prevent starving; whilst the only food the horses had was birch bark, which the company cut and carried to them by walking on the snow with snow shoes. Each one of the company was armed with a double barrelled rifle, made for the purpose, a brace of pistols, sword, butcher-knife, and a tomahawk with an edge and three spikes. Added to these, they carried on a horse a small brass piece of ordnance, taken from Burgoyne in the revolution. After passing the mountains, they passed 336 different tribes of Indians, some perfectly white, some red, and some entirely covered with hair (denominated the Esu Indians) who were among the most singular, and so wild that the company were compelled to run them down with horses to take their dimensions, which was a part of their duty; whilst others evinced the most friendly disposition.

Whilst west of the mountains they fell in with a tribe denominated the Copper Indians, who received their name from owning extensive copper mines; 3000 of them, armed with bows and arrows, with copper darts, copper knives and axes, attacked the company in day time; a severe action ensued and only about 30 of the Indians escaped—the rest were killed or wounded, with a loss of two of the company, and several wounded.

Among the various discoveries made by the company, we have only room to mention those of extensive beds of pure salt the largest of which was 18 acres, several inches deep on the burdens, found to be pure and wholesome—also innumerable beds of alum, iron, lead, copper, gold and silver ore, the gold almost pure. Among the animals Mr. C. describes the grizzly grey bear, as most ferocious, and lord of the forest. The weight of several killed by the company varied from 9 to 1250 lbs. Their strength was surprising, and tales of it almost beyond belief.

The remains of the company started for home in August, 1831. They recrossed the mountains at the head of the Missouri river, there built a boat, and those who were lame went on board and the rest on foot. Capt. Levensworth being lame, rode on horseback, with those on foot, and is supposed to be now in Washington city, by Mr. C. Of the company 8 died by sickness, 1 by breaking a wild cat in the face. The crew of their commander alarmed the soldiers who burst through the Indian camp, with those on foot, and is supposed to be now in Washington city, by Mr. C.
