

THE WESTERN SUN

VINCENNES, JULY 22, 1809.

The Editor must regret the necessity he is under of claiming the indulgence of another week, for the purpose of clearing up the report so industriously circulated to his prejudice, and which he had promised this week—want of time, he hopes will be considered as a good excuse for the delay.

HARRISON.—St. Clair county, Illinois Territory July 4th, 1809.

From an arrangement made by a select committee for that purpose, the inhabitants of this town and its vicinity met, at the house of captain Walthurn, on this day to celebrate the anniversary of our independence—the following arrangements were made for the order of the day.

Abijah Ward, Vice President.

Peter Darling, with several other respectable citizens to fire the gun, the celebration commenced at day light by the firing of seventeen rounds of a field piece—about one o'clock, Mr. Murphy sung a hymn, and delivered a prayer appropriate to the occasion—after which Jacob A. Boyes, Esq. delivered an animated address to near one hundred people of both sexes, and read the declaration of American Independence—after which the company sat down to an elegant dinner prepared by captain capt. Walthurn—after dinner the following toasts were drank, accompanied by a discharge of a field piece to each toast.

PATENT IMPENETRABLE STUCCO, OR CEMENT.

A substitute for slates, tiles and shingles, to cover roofs of houses and other buildings, &c.

Its colour is of a dark and brilliant slate, which is the prevailing taste.

Should a house be on fire, and a brand from it be lodged on the roof of an adjacent building covered with this stucco, the brand will not communicate fire to the roof.

There are a variety of valuable trees which are only used for ornament, as for example, "the Lombardy Poplar," which cannot when worked up withstand the changes of weather, and likewise "the Gum," (which must always be confined to one element) the "Willow," &c. &c. All these might, by the aid of this stucco, be a substitute for building, where the oak, the pine, the cypress, the juniper, &c. are used. In short it is (as expressed in the patent) "a substitute for shingles, slates and tiles," but may be used for many other purposes.

The preparation for this composition may be made throughout the year in any town, and on every farm and plantation, & there-with cover any building, at the easy cost of one cent the square foot; but its application can only properly have effect when put on in serene weather from the spring to the fall. The patentee laboured under great disadvantages in the experiments he had the honor to make in the presence of the Honorable the Justices of the Supreme court, as the stucco was applied to the shingle in a very tempestuous and stormy season, yet it did not fail.

Those gentlemen who may be desirous of obtaining the privilege from the patentee for making and using the impenetrable stucco for any town, country, district, state, plantation or farm, will be pleased to make application to the inventor, P. P. Baltham, or to his agent H. Hoar, Esq. attorney at law, in the city of Washington—Letters post paid will be attended to.
