

THE WESTERN SUN.

VINCENNES, November 1.

We are requested to state that John L. McCullough has declined being considered a candidate at the next election.

We are authorised to announce the following persons as candidates for the Legislature.

ROBERT BUNTING, JUN.
GEN'L. W. JOHNSON.
SAMUEL EMERSON.

Candidates for County Commissioner,

John Badollett,
Sam'l. Dillworth.

ANDREW ARMSTRONG, will serve as a County Commissioner, if elected.

ITEMS OF NEWS.

We are informed (says the Philadelphia Gazette) that the Franklin 74, com. Stewart, is under sailing orders and will leave the Delaware as soon as the Hon. Richard Rush is ready to embark. The Franklin is to convey Mr. Rush to London, who is appointed Minister Plenipotentiary to the court of St. James. After landing the Minister it is said he will visit the Mediterranean.

HAYTIAN SCHOOLS.

Christophe, king of Hayti, has adopted the Lancasterian system of education in his dominions, and has established schools deriving their support from government, and promulgating instruction in the rudiments of primary education, without expense to individuals. He has also ordered a sale of the national domains of the kingdom with several exceptions.

NEW YORK, Sept. 22.

CLEOPATRA'S BARGE.

The brig Bee, capt. Springsteen, arrived at this port on Saturday morning from Barcelona capt. S spoke the Cleopatra Barge, of Salem, going out with her owner, Geo. Crowninshield, Esq, on a tour of pleasure in the Mediterranean. Capt. S. was credibly informed at Barcelona, that this beautiful vessel had been visited by upwards of 18,000 persons during his very short stay of 4 days at that place, and was obliged to leave the port sooner than Mr. C. otherwise intended on account of the immense number of people who flocked from all quarters to see her. The captain-general of the province, Castanos and staff, intendant's family, foreign consuls residents at Barcelona, many of the nobility, chief magistrates of the city, officers of the navy and army, ladies of the first rank and distinction and even friars, were among the number of those whose curiosity was attracted by this rare specimen of American taste and genius.

The British Government are fitting out armed vessels to protect their trade against South-American privateers.

KINGSTON, (Jam) Aug. 13.

By the Christina we learn that 6000 Spanish troops, which had served under Lord Wellington in the Peninsula, had arrived at Laguna from Old Spain, to go against the insurgents.

In the night of June 14th, a dreadful shipwreck took place off Point la Hogue, near Haver. The Pegasus from Martinique with colonial produce and full of passengers, struck on the rocks off Bas-Blanchard. The deck instantly separated from the hull, and for six hours the crew were driven about upon it. The captain and six passengers were one by one washed off in the sea; at day break however, several intrepid pilots made for the wreck in their boats, and succeeded in taking off the remaining crew and passengers. The captain who perished, is blamed for the loss of this vessel; he was warned several times to keep the land during the night; but he was too obstinate. One of the passengers died soon after being carried on shore.

The Baroness de Stael Holstein daughter of the celebrated Neckar, died on the 15th of July, in the 50th year of her age. She left a son and daughter the latter married to the Duke de Broglie, a peer of France.

A letter from Vienna, of the 2d of July mentions, the mountain called the Haus-

ruck, in Upper Austria has disappeared, and its place is supplied by a lake. This mountain was very high, and the country around took its name from it. Since the preceding month, several phenomena had warned the inhabitants that something awful would happen, and there were frequent subterraneous noises heard. About a dozen cottages which were built in various parts of the hill, have of course disappeared; but it was not known whether any perished in them.

Old Neptune's Dominion affords as many wonders now a-days as was exhibited on land, and its inhabitants imitating the lords of terra firma seem to be either in a state of civil commotion or emigrating to the shores of the new continent in search of freedom. Besides the Cape Ann serpent, and the Kraken seen on the Coast of South America, by capt. Fanning we hear of the mermaid being seen on our coast, of new and non descript species of fish being taken in our harbors, and of unprecedented shoals of herring choking up the mouths of our rivers. To these wonders may be added the serpent of Lake Erie, the existence of which has been satisfactorily demonstrated to us. Independent of other corroborating statements, Mr. Walton who resides near the borders of the Lake, and who is represented as a man of veracity, states that he has seen the Lake Serpent repeatedly and fired several balls at him, at the distance of twenty rods, without the least apparent effect. He describes him as about sixty feet long, of a copper colour, with brilliant eyes, four inches in diameter. He has seen him in a coil & extended upon the water.

PORK WANTED.

WE WILL CONTRACT FOR
PORK,
To be delivered at Vincennes or Coney Island by the 12th of December.
SAM'L. HILL, & Co
November 1. 48-4w

BANK OF VINCENNES,
The State Bank of Indiana.

31st October 1817

THE Stockholders are hereby required to pay a third Instalment of Five Dollars on each share, on or before the first day of January next.—Those who have subscribed for stock, sold under the direction of commissioners appointed for the purpose by a late act of the General Assembly, must pay the said Instalment to the commissioners of the county, where such subscriptions were made. The other Stockholders are requested to pay the said instalment at the Bank.

NOTICE.

ALL who are indebted to the firm of Bradley and Badolet, are requested to come forward & settle their accounts, on or before the 15th of next month, as they wish to close their busines for the present.

V J Bradley who will settle the accounts of the firm, may be found at their old stand. Those who purchased at their sale at Auction, will call and comply with the terms thereof—otherwise not blame them for measures they may take to collect.

48-4f October 30.

Cure of Cancers,
In thirty days, by Applying Powder only.

DOCTOR DULANEY,

INFORMS the public, that he cures the most obstinate Cancers, Wens, Tetter Worms, Scald Head, Scurvy, King's Evil, White Swelling, Rheumatism, Fitts, and various other complaints hitherto thought incurable, by medical art.

[Translated from the *Daun.*] The Diploma.

THIS Diploma from the University of Toulouse, in the Province of Languedoc, in France, is granted by us the subscribers, to BENJAMIN DULANEY as a Testimonial of the degree of Doctor in Physic Anno Domini, Millesimo Septem nesimo octogesimo nono—Decembbris Die tertio.

KN YE, and all singular persons to whom these presents may come, that, having been a laudable custom in this kingdom these many centuries back, to honor with this singular mark of distinc-

tion, as a testimony and reward for their perseverance in studying, and for their extraordinary merit, those who have applied themselves to learning with assiduous study; for which reason we, the doctors and professors of the aforesaid University, hereby do signify to all persons whatever, that the learned gentleman B. Dulany, having studied & practised surgery and physic for many years and thereby acquired so great a merit & proficiency in the salutary art of medicine that we have found him deserving of the highest honor we can confer on him—Therefore we, the aforesaid doctors and professors, with the royal sanction of our most glorious King and the unanimous consent of the principal and rector of our university, do declare and appoint his Majest's subject B. DULANEY Doctor of Physic, with full license and authority for exercising his profession, delivering lectures, teaching & explaining the art of surgery and physic, not only in our Majesty's kingdoms and dominions but also in every other part of the world, conferring upon him, by virtue of this testament, in the utmost extent, all the privileges, immunites and honor annexed to that degree, according to the statutes of his Majesty's Universities. In attestation of which, we have affixed to this Diploma, our respective names and signatures, together with the great seal of our university.

J. DOBO S Medicine Doctor
Professor of Chemistry.
