

resolution from the Governor of Pennsylvania, appointing a commissioner on the part of that state to meet such commissioners, as may have been, or shall be appointed on behalf of the states of Ohio, Virginia, Kentucky and Indiana, or either of them, to examine the obstructions in the Ohio river, and estimate the probable expense that would attend their removal; each of which will be submitted for your consideration. The removal of the obstructions in the navigation of the Ohio river at the Falls, by opening a canal, has become an object of great importance, particularly to this state, as the most certain means of securing an uninterrupted transportation of the vast and increasing commerce embarked on its waters. The act of the last session, incorporating a canal company for the accomplishment of this great object, has been found insufficient, and not so liberal in its provisions, as to ensure the attention of capitalists; even of those who are directly interested in its execution: and it will be with you to determine, whether, it shall undergo the necessary alterations, or whether this first effort of the state, for internal improvement, shall fail for want of public patronage.

The commencement of a State Library forms a subject of too much interest not to meet your attention. I recommend to your consideration, the propriety of requiring by law, a per centum on the proceeds of the sales of Town Lots, to be paid for the support of Schools and establishment of Libraries therein; as well as a like per centum on the sales of any additional lots which may be added to any Town Plat, whether a county seat or otherwise. The establishment of a system of common schools, throughout the inhabited portion of our State, will meet that consideration which its importance dictates. The operation of such a system, so arranged as to afford the means to every description of our citizens, to educate their children, will secure the morals of the rising generation; the better prepare them for the discharge of their several and respective duties; and to estimate the value of our free institutions—the surest guarantees of that love of the country, so essential to the permanence of our form of government.

Permit me again, to introduce to your attention, the subject of slaves escaping into this State, and to suggest the propriety, of making further provision by law calculated to restrain them from fleeing to this State to avoid their lawful owners; and to enable the judges of the circuit courts, or any judge of the supreme court, in vacation, to decide with the aid of a jury, upon all claims of this character, without delay. This subject in the adjoining state of Kentucky, has produced some excitement in the citizens and an interference on the part of their Legislature. To preserve harmony between our State and every other, so far as may depend on our exertions, is a duty, the discharge of which, is intimately connected with our best interest as a state, and solemnly required of Indiana as a member of the Union.

Whilst on our own part we endeavor to promote the happiness of those foreign to this state, it will also be our duty, to cultivate harmony and concord among our own citizens:—so necessary to secure private happiness or public prosperity, and for the accomplishment of objects so desirable, it behoves us to seek, with a becoming confidence, the blessings of the Omnipotent disposer of events, upon your exertions for the prosperity and welfare of those, who have confided their interest to your care.

JONATHAN JENKINS.

### British Manufactures outdone in Ontario.

Much has been said, & many accounts of the celerity with which English manufacturers of cloth have gone through the various operations attendant on manufacturing that article from the fleece to the garment. A few weeks since we published an account taken from an English paper, in which it was stated, that at one of the manufactories in England, the fleece had been taken from the sheep & manufactured into a coat in the short space of 13 hours & 20 minutes. Messrs. Buck, Brewster & Co. managers of the Ontario Manufactory at Manchester, in this county, on perusing that article became sensible from the perfection of their machinery and the dexterity of their workmen, that the same operations might be accomplished even in a shorter time. Immediately a wager of five hundred dollars was offered, and accepted by the managers that they would perform the same operation in 12 hours. The wool was taken from the sack in its natural state, and in *Nine hours and fifteen minutes* precisely the coat was completed, and worn in triumph by one of the parties concerned. The wool

was picked, greased, carded, roped and spun—the yarn was warped, put into the loom and woven—the cloth was fulled, colored, four times shorn, pressed and carried to the tailors, and the coat completed, all within the time above stated. We saw the coat the next day after it was made. The cloth was not of the finest texture, but was very handsomely dressed, & fitted the person who wore it, remarkably well. The truth of the above statement can be attested by many respectable witnesses besides Messrs. Buck and Brewster. The only difference between this and the English experiment is the time occupied in shearing the fleece, and any farmer in the country knows that that operation may be dispatched in ten minutes. The above named gentlemen now confidently assert, that they can manufacture a coat of elegant superfine broadcloth, and have it completed in 12 hours.

Ontario Messenger.

Despatches have been received from Gen. Mina, dated in August from the interior of Mexico. He had been joined by the revolutionary force under Padre Torre, and his disciplined force already amounts to 8000 men. Details of his operations, and the general circumstances of Mexico, had reached Natchitoches & translations were making for the Gazette published on Red River.—Aurora.

### PENSACOLA.

The Philadelphia Freeman's Journal remarks, that if Spain should cede the Floridas to the U. States, or they should come into our possession in any other way, we shall possess, in Pensacola, the finest port next to Havana, in the whole gulph of Mexico. Having 24 feet of water on its bar it will form an excellent naval station, and is likely, moreover, to become a place of considerable commerce, as it will command the trade of all the rivers that flow into the gulph from Mobile eastward to the Appalachicola. It may be expected, that it will draw to its market a considerable portion of the products of the upper settlements on the Alabama, as the navigation of that river above Fort Claiborne, is not a little difficult; and excellent roads may be made to Pensacola with little cost or trouble.

### PLATTSBURG, Nov. 8. Northern Canal.

We have a letter from a gentleman of the first standing, dated Whitehall Nov. 5, which says—"The Northern Canal, connecting the waters of Lake Champlain with the Hudson, was commenced this day and will be prosecuted with energy till stopped by the frost. The whole will undoubtedly be completed next summer."

We have been informed, that on Sunday last, the snow fell 18 inches deep in Chateaugay; and that in Canada there was sufficient snow for good sleighing. In this village the ground was covered with snow.

### CHARLESTON Nov. 11.

We learn by an officer of the army, who arrived in town on Sunday last, direct from Fort Hawkins, that hostilities are immediately to break out between our troops and the Seminole Indians. General Gaines, with his force, took up the line of march from Fort Montgomery, on the Alabama, to Fort Scott, on the Flint River, about the 27th ult. where he was to be joined by about 600 Creek Indian warriors, who would make his army, including regulars, militia and Indians, amount to about 2500 men. The Seminoles are said to have in the field 1500 warriors. Gen Jackson and suite, it was expected, would join Gen. Gaines at Fort Scott.

The officer above alluded to, was dispatched here to procure four field pieces for the expedition, and will return immediately.

We learn that General Gaines made a demand upon the Seminoles for the murderers of seven whites—they refused and in reply stated, that our people had killed ten of their tribe, and demanded the balance to be given up to them, as the only condition on which they would make peace. The General made no further reply, but immediately put his troops in motion to operate against them.
