Evansville, March 13, 1833.—8-3m.

NEW AND VALUABLE INVENTION.

THE undersigned, a resident of Vincennes, Indiana, has invented and perfected a new and valuable improvement in the application of wind, for the purpose of propelling machinery;—for which he has received letters patent from the president of the United States, designated J. L. COLMAN'S SELF-REGULATING HORIZONTAL WINDMILL.

Occular demonstration is always the most satisfactory—and two mills are now erected in the borough of Vincennes upon the plan of the undersigned, one of which has been in operation near two years.—The perfect safety and entire simplicity of these mills, may be conceived from a brief outline.

A horizontal wheel is placed on a vertical shaft above the house, with four or more wings or sails standing in an inclined position from the way the windwheel is calculated to run, which throws a gradual weight of the wings on a given scope of wind, and the wings bearing on the wind propel the wheel: it illustrates a combinational power of weight and wind, with the principle of gravity acting on wind.—Each wing performs one revolution on its pivot, to one of the main windwheel.—Each wing has a bearing of seven-eighths of its circumference upon the wind, and the one-eighth occasions little or no resistance. The power is in proportion to the weight given, and a very light weight is sufficient to drive the simple machinery of a run of millstones. More or less power, if desired, can be given when the mill is in operation by the lower pivots of each wing being placed on a sliding block, to which a rope is attached extending to main shaft passing under a collar on shaft at the roof of building, to a windless on shaft inside the house. There is nothing conjectural or complicated in the improvement mentioned;—it is founded on a principle of nature, and simply tested by practical experience. The use and benefit to accrue cannot long remain limited; it will be found to recommend itself for utility, cheapness, certainty, safety, and convenience, to the citizens of every quarter of the United States.

To those who reside on the western and southern plains, and to those near the Atlantic or northern lake shores, it will afford durable benefit and great accommodation. No person acquainted with mills, who has seen the mill of the undersigned in operation, has withheld an expression of entire approval; and a strong recommendation, after actual examination of the mill at work, could now be procured, signed by hundreds of intelligent citizens.—The expense of the running gearing of a grist mill, whether the main shaft be vertical or horizontal, is well known to all millwrights; and the chief difference arises from the driving power. The expense of a windwheel depends upon the size; one to carry one hundred yards of sail will not exceed one hundred dollars, and one carrying six hundred yards, may not exceed five hundred dollars. The first mentioned size will drive a run of four feet millstones with a very moderate wind; and the last mentioned size will, with the same wind, drive six run of the same size stones with equal safety at all times.

The undersigned, as a matter of choice at the present time, would prefer to recommend a windwheel to carry about three hundred yards, say sixty feet in diameter, and to remove any possible doubt, the following assurances are here made. That with the least possible wind it will drive one run of four feet millstones;—with a moderate breeze it will drive two or three, and with a strong wind five run of the same size, each doing good business.—That it will make flour equal to any other mill, and requires much less attention to keep it in repair. That a boy of ten years of age may have entire and perfect command of it at all times without difficulty. That with garners to hold sufficient grain, and lead a supply to the hoppers, it may be left in perfect safety for twenty-four hours at a time. The wind may blow from a moderate breeze to a storm, (both inclusive) and change its direction as often and as quick as may be, and little if any difference will be perceived in the movement of the mill. That in proportion to cost, it will do a better business than any steam engine, (expense of fuel and engineer saved). And that for sawing and grist mills it will be found equally effective, and less expensive.

Persons desirous of further information in relation to this important discovery, will please visit the mill of the undersigned, or address him by mail, post paid, to Vincennes, Ind., which will receive due attention.

Any person or persons, who will build a good and substantial mill on the above principle, such as the undersigned will designate him or them in writing, in the most prominent place in any of the states, and attend to the same personally, shall be entitled to half the proceeds arising from a patent in the state he or they may select.

J. L. COLMAN.

Vincennes, March 20, 1833.—8-3m

Since the above was handed to the Editor, a respectable and intelligent citizen of this place, Willis Fellows, Esqr. well acquainted with machinery, and with the different principles of windmills, gave it as his opinion, that the above principle is at least five hundred per cent. preferable to any heretofore used. —[Ep. Sec.]

FOR SALE.

I WISH to sell my Tavern Stand, now occupied by Col. Alexis LeRoy, situated on Market street, in the borough of Vincennes;—also the

Brick House

And Two Lots

formerly owned by D. C. Johnson; situated at the east end of Market street, in the borough aforesaid.

The Tavern Stand is in a healthy and pleasant part of the borough; and the other house is well calculated for a private family, and likewise in a pleasant and healthy situation.

For further particulars, inquire of A. T. Ellis, Esqr. and Zachariah Palliam, both living in Vincennes.

INCITATUS

WILL stand the ensuing season at Jas. Gibson's, on the Wabash opposite Vincennes, on Mondays and Tuesdays every week, commencing the first of April, and the balance of the time at my stable, one and a quarter miles east of Lawrenceville, Ill. He will be let to mares at six dollars, paid by the first of July, or eight dollars, paid by the 25th of December, in merchantable produce at the market prices, such as wheat, rye, oats, corn, pork, beeswax, or young cattle. All care will be taken to prevent accidents, but not accountable for any.

INCITATUS is a beautiful dark auburn colour, fifteen hands three inches high, five years old 29th of May next;—he was raised by Joseph Miller, Madison county, Kentucky. Incitatus was sired by Kosciusco, he by Sir Archy, and came out of the imported mare Castanara. The dam of Kosciusco was Lottery, she was got by the imported Bedford, and came out of the imported Arelia. The dam of Incitatus was got by Blackbourn's Whip, granddam by the imported Diomedes.

Any person having any doubt of the stock of my horse, can easily inform themselves by writing to Joseph Miller; for the respectability of Mr. Miller, they can inquire of Mr. Mattingly, who is working in the Western Sea office.

NEW ESTABLISHMENT.

I HAVE established a BLACK SMITH SHOP on Second Street, near Gen. Lasselie's Tavern, where I shall be glad to receive the patronage of the public in the above business. I have, and at all times will keep, the best of workmen, and none but the best of iron shall be kept on hand. It will be to the interest of all persons getting work done to give a call, as I have a large stock of IRON AND STEEL of all sorts, suitable for all kinds of work, on hand, and having made an arrangement at Louisville to keep up a regular supply. There is on hand

A great variety of Ploughs; And I shall keep at all times all articles usually made use of by our farming population. Will be kept on hand at all times, by the dozen or single one, the best of

CAST STEEL AXES,

and many other articles. Farmers will find it to their interest to get their work done at my shop, as I am satisfied they can pay for their work easier and have it done cheaper than at any other shop in the place. I will give work for coal at all times, and receive in payment where there is no money, all kinds of grain, &c.

I want two boys as apprentices to the above business: boys of from 12 to 16 will be taken.
