

LECTURE ON CHRISTIAN SCIENCE

SPLENDID ADDRESS AT OPERA
HOUSE SUNDAY AFTERNOON
HEARD BY LARGE CROWD

DR. J. J. FLINN, SPEAKER

Local Societies and Friends Enjoyed
Meeting and Discussion of
Science Principles

In introducing Dr. John J. Flynn at
Sunday's Christian Science lecture,
Chairman R. A. Confer said in part:

It is very good to see so many per-
sons interested in hearing the truth
about Truth, and you are indeed wel-
come. That Christian Science is the
truth regarding God and Man and
their relationship has been proved so
often that it can no longer be honestly
disputed or denied. Hundreds of
thousands of people in many lands,
through the study of Christian Science
and the right application of its prin-
ciples are carrying on the healing
work, so essentially a part of Scien-
tific Christianity, and are proving the
reality of the Master's words, "If
you love me, keep my commandments,
and I will pray the Father, and he
will give you another comforter,
that he may abide with you for ever;
even the Spirit of truth."

The lecturer today, has chosen as
his subject, Christian Science, A Posi-
tive Faith. There is little of nega-
tive in Christian Science. It is a
positive and exact Science. It is a
privilege and a pleasure to introduce
you, Mr. John J. Flinn C. S., of
Waukegan, Illinois. Member of the
Council of Lecturers of the Mother
Church, The First Church of Christ
Scientist, in Boston, Mass.

To those healed through the writ-
ings and teachings of Mary Baker
Eddy, or through the understanding
demonstration of her students—
those healed, as was I, when even
the faint glimmer of material
had fled—Christian Science is
not mere pleasing abstraction, at-
tenuative philosophy, or beautiful
idealism, but, rather, an immense
something wonderfully near
to real; something serviceable,
available within one's reach, always
available in times of uncertainty,
trouble, and never more so than
in moments of greatest need.

I am going to assume that those
present who are not of the faith
profess, are here, nevertheless,
for the good purpose of learning,
so far as I may be able to present
a subject in so brief a space
of time, why I and tens of thou-
sands like me, in all parts of the globe,
have accepted this faith. I am go-
ing to assume that non-Scientists
here with the worthy purpose
of learning to what extent all that
they have heard, disparaging, or
immendatory, of Christian Science,
is much or little,—all that they
have heard of its Discoverer and
founder, of its tenets, its doctrines,
its demonstrations, of the character
and intelligence of its membership,
true or false.

This is unquestionably a trying
age that is putting to the
test the integrity of human moral-
ity, the stability of human progress,
the very best in men and women
summed, as never before in mo-
dern times, to rally to the protec-
tion and preservation of the good
values of centuries of earnest
striving for enlightenment.

Christian Science, which never
aims to react, nor stoops to pes-
simism, is not fearful regarding the
ultimate outcome of any contest be-
tween truth and error, between good
and evil, for it knows that God
is all-powerful, being practical, neither
in oblivion of, nor indifferent to,
the obligations of, nor present or pas-
sive condition of, any individual.

Now, to confess that evil is more
powerful than good, that morality
cannot measure strength with im-
morality, that virtue must give way
before vice,—that Truth is, or can be,
overwhelmed by error,—considered even
in the light of religion, and as a purely
rational proposition—is to assume
that civilization, as developed through
thousands of years of Christianity,
is a failure, and that the human
race is reverting to paganism and
barbarity. Viewed from a religious
standpoint, such a proposition is
spiteous and unthinkable, since
it involves the presumption that there
is a power greater than God, good,
the universe,—a power more pow-
erful than omnipotence.

Christian Science makes no con-
cession to error in any of its phases,
forms, or manifestations. It does
not admit the reality of evil. It
recognizes no power in the universe
but God, good. In the midst of
trouble, anxiety, alarm, or fear want
of confidence in church or pulpit lead-
ership, Christian Science holds steady-
ly to the conviction, that since man
is God's child, the reflection and im-

age and likeness of God, he cannot
be separated from his creator, de-
prived of his spiritual inheritance by
any human belief, used as a football
by chance, subjected to material mu-
tation, or rendered helpless in the
presence of sin, sickness, discord, dis-
east, or death.

Christian Science is not a blind
belief. It is not a theological exper-
iment, not a conjectural creed. It
is not based upon legendary, tradition,
superstition, or fear of future pun-
ishment; it is a demonstrable faith
that proves with mathematical clear-
ness and certainty, to capable and
honest investigators, its claim as a
Science. Christian Science is an un-
derstanding of infinite intelligence,
and of man's relationship to the Su-
preme Being, omnipresent, omnisci-
ent, and omnipotent divine Mind. It
is an apprehension and understand-
ing of God which admits or no limi-
tation, question nor doubt with regard
to His all-seeing wisdom, His all-
inclusive power, His all-embracing
Love. It is living the conviction that
God made everything that was made;
that He made everything good; that
all of His creations reflect Him, and
therefore, that nothing unlike Him,
infinite good, can be real. It is an
absolute acknowledgment and a posi-
tive assertion, supported by living
truth, that the God of the Bible—
our God—governs and controls the
universe and all that it contains,
visible and invisible, and that there
is none other beside Him.

Christian Science is a positive, and,
in its attitude toward scholastic
theology, a radical faith. As its
Discoverer and Founder never de-
viated from Principle to win the favor
or to avoid the censure of those bound
up with other religious doctrines,
neither do her loyal students and
followers make concession of any
kind either to popular or so-called
scholarly beliefs in the reality of
matter. They stand firmly, immov-
ably, upon "the scientific statement
of being," found in the Christian Sci-
ence textbook, "Science and Health
with Key to the Scriptures" by Mary
Baker Eddy (p. 468).

Now, Christian Science is true
from the first to the last word of
this fundamental declaration, from
the first to the last word of our
textbook. Let it be borne in upon
the thought of every one present
that there is no room or place for
compromise here. If Christian Sci-
ence be not in absolute line with one
invariable, immutable Principle at
all points, then, to use the words of
Paul, "Is our preaching vain?" and,
moreover, to paraphrase slightly
the language of that great apostle,
we who have accepted Christian Sci-
ence is not altogether true, if the
healing power of the Christ be not
present—yesterday, to-day, and for-
ever—if the Christ be not risen—if
spiritual regeneration be not within
the reach of suffering humanity to-
day, through a higher understand-
ing of divine law, then, we who have
been proclaiming our healing in
Christian Science from the very
households—we who feel that we
have been restored in Christian Sci-
ence to health, peace and happiness
—are either duped by the greatest
of all illusions, or we are false wit-
nesses. But we who have been heal-
ed in Christian Science—we who
have been healed slowly or healed
instantaneously, but in either case,
healed permanently—and we who
have practiced Christian Science in
the healing of others—who have
seen in our own and in the lives of
those about us, unmistakable mani-
festations of the Immanuel, or God
with us—know from experience, ob-
servation, and demonstration, that
when the Principle of Christian Sci-
ence is intelligently, honestly, and
scientifically employed, it never fails;
it cannot fail.

There can be no questioning the
logic of Mrs. Eddy's propositions in
Science and Health that the impos-
sible never happens, and that "what-
ever blesses one, blesses all." Most
of us have learned in our own ex-
perience that Truth manifested radi-
ates beyond the bounds of our vision,
even beyond the bounds of our imagi-
nation. Our reasoning faculties
teach us, even if our spiritual intu-
ition be dull, that if Christian Sci-
ence heals in one instance through
the intelligent application of divine
Principle, no limitations can be placed
upon its healing power. The opera-
tion of Principle can indeed be ap-
plied to every human need—to gov-
ernment, politics, business, econom-
ics, labor, sociology, education; when
properly applied, Principle must, as
it does, perform marvels of healing
in general as well as in individual
cases.

With the keenness and the clearness
of spiritual vision which mark all
the thinking and speaking and writ-
ing of Mary Baker Eddy, she is able
to differentiate between the man, Je-
sus, and the Christ, the divine idea;
and thus, to the satisfaction of Jew
and Gentile alike, she has perman-
ently bridged for millions, a theo-
logical chasm that had for centuries
yawned menacingly before the eyes
of confused and bewildered human-
ity. Thus has she enabled her follow-
ers, Jews and Gentiles alike, as she
has written in the tenets of Chris-
tian Science (Science and Health, p.
497), to "acknowledge and adore one
supreme and infinite God," to "ac-
knowledge His son, one Christ," and
to subscribe understandingly and
wholeheartedly to those declarations
of the Christian Science faith which

(Continued on Page three)

COMMITTEES FOR BIG FAIR HELD MEETING

MR. FRIER, OF PURDUE UNIVER-
SITY OUTLINES WORK TO
BE DONE

MUCH INTEREST SHOWN

By County Committees and Much
Good Is Expected From Coming
Agricultural Event

The various committees and exe-
cutive officers for the Putnam County
Agricultural Fair held a meeting in
the assembly room of the Court House
Saturday night, for the purpose of
widening the knowledge of the com-
mittees as to what their work is to
be in preparation for the fair.

Prof. Frier, of Purdue University,
is doing good work in helping the
executive committee straighten out
the difficulties that always come up
in preparation for a real county fair.
Mr. Frier stated that he was sent to
the city because Purdue University
was interested in the outcome of this
fair. He stated that they did not
want any outside concessions allowed
in the fair, for the reason that when
the people think of a fair they think
of stands where you try your luck;
mysterious shows and many other de-
grading things, and as Mr. Frier stated,
these are the things that are not
wanted. This is to be a fair for the
benefit of the farmers and agriculture
and not for some outside faker to
make money and go somewhere else
to spend it. Mr. Frier told the heads
of the different committees that they
should not get it into their heads that
it is an easy thing, because it wasn't
but to go in to it with the idea of
making the people take a real interest
in a real fair. Mr. Frier stated that
the fair was most interesting and
profitable if run right, it is interest-
ing because it brings the people to-
gether in order that they might get
acquainted, and it is profitable be-
cause it helps the farmer and is a
help to agriculture. He told the com-
mittees to either work energetically
or else pull out because no fair could
be successful if one or two commit-
tees laid off and let the others do the
work. "You should take hold of your
part in such a way that nothing can
make you let go," he said. Mr. Frier
stated that this was only the first real
fair that has been held in Putnam
county according to his knowledge
and if the people take an interest in
it they can not only help but they
will know what to do in case of the
next one. He said that another way
to help make interest for the fair was
to do as the Indians did "Make heap
much noise." He stated that he did
not want this to be an ordinary fair
but that it depended entirely upon
what the people make it.

Following the talk by Mr. Frier,
the different heads of the committees
were called upon and told what their
work would be in preparation for the
fair, such as the arrangement of the
exhibit, variety of the exhibit, etc.

The following are the officers elect-
ed: President Charles Edwards,
Roachdale; vice president, Robert
Dills, of Madison; Secretary, C. M.
Moffett, Greencastle; and treasurer,
Lowell Dicks, of Fillmore.

INVESTIGATING DEATH

WHITE PLAINS, N. Y. April 28.—
Charges that Clarence E. Baring ad-
ministered arsenic to his wealthy wife
in an attempt to murder her were to
be presented to a grand jury here to-
day as authorities delved deeper into
the strange tales of intrigue and jeal-
ousy that surrounded the life of the
couple.

District Attorney Arthur Rowland
of West-Chester county, also charges
that he has evidence that pneumonia
and diphtheria germs were given the
wealthy woman.

Baring is held in the county jail
without bail and will be arraigned to-
day.

THE WEATHER THIS WEEK

Showers are indicated for the first
part and again near the end of the
week; cool weather the first half and
about normal temperature thereafter.

CRACK MODERN WOODMAN TEAM WILL INITIATE

Going to Cloverdale on Friday Night.
A Crack Team Has Been Formed
by the New Members

The crack Modern Woodman drill
team of Greencastle, Volz Comp No.
3349, will put on the ritualistic work
for the Cloverdale lodge on Friday
night.

A good team has been organized by
the new members and with two weeks
practice the team has formed a per-
fect squad and drill work. Ten
members have been examined at Clov-
erdale and it is thought by Friday
there will be several more who will
take the work.

Together with the initiation the Clov-
erdale lodge will put on a big ban-
quet for the visiting team and a big
time is expected.

A LUCKY FIND

HARTFORD CITY, Ind., April 28.—
John Veach, a farmer living near here
has decided to go over his farm with
a fine tooth comb. While raking a
field, his rake picked up a roll of
bills containing \$380.

E. MORTON MAKES A NEW STATE RECORD

TIGER THINLY CLAD RUNS 100
IN LESS THAN 10
SECONDS

D'PAUW TRIMS VISITORS

Old Gold Track Team Overwhelmed
Rose Poly by 102 to 24 Score
On Saturday, Here

Earl Morton, DePauw thinly clad,
sprinted the 100 yard dash in the fast
time of 9.3-5 seconds, Saturday after-
noon in the dual meet with Rose Poly
and established a new state record.
He had a strong wind at his back and
this aided him. The time was caught
by four stop watches.

Rose Poly secured only one first in
the pole vault due to the absence of
the Tiger track star, Paul Jones, one
second place and made the rest of
their points on thirds. The Old Gold
cinder artists had little difficulty in
trimming the visitors by an over-
whelming count of 102 to 24. Cap-
tain Glen Smith of the DePauw squad
was also absent because of a bad leg.

POLICEMAN WOUNDED

TERRE HAUTE, Ind., April 28.—
Joseph O'Reilly, 66, merchant, police-
man, was shot through the right hand
shortly before 3 o'clock Monday
morning in the outer lobby of the
Indiana Theater, where he had gone
to make investigation as to why an
entrance was unlocked. It is thought
O'Reilly was shot by a "look-out"
member of a gang of yeggs.

WORK ON TEMPLE STARTS

On Monday morning Charles Black
who has the contract for the base-
ment work of the newly proposed Ma-
sonic Temple to be erected in Green-
castle at the corner of Washington
and Vine streets put a big force of
men to work on the excavation.

The workmen attracted the atten-
tion of all passersby and it was a
busy place during the day. Green-
castle people have been waiting for
several years for work to be started
on the erection of the new Masonic
Temple on this site and their activi-
ties during the day were followed by
a number of people who passed the
street intersection.

BOMB MINISTER'S HOME

CHICAGO, April 28.—Bootleggers
bombed the home of Rev. Elmer L.
Williams, dry crusader, here early to-
day. The entire front of the Williams
home was ripped out but all members
of the family escaped with only minor
shocks and bruises, caused by being
hurled from their beds.

Rev. Williams gave the police the
names of two notorious bootleggers
who he said had been threatening him
with death unless he put a stop to
his crusades against rum running.

THE WEATHER.

Generally fair tonight and Tuesday
Somewhat cooler tonight.

SEASON AT BAY VIEW IS PLANNED

PRESIDENT S. A. HAYS ATTENDS
MEETING OF BOARD OF
NORTHERN RESORT

NEW BUILDINGS DONE

Post Office Building and Sewage Dis-
posal Plant Among Improvements
of the Year

S. A. Hays, president of the Bay
View Assembly Association, arrived
home Sunday from Bay View where
he went to attend the annual spring
meeting of the Board of Trustees.

The summer program has been ar-
ranged and will open about the first
of July. Supt. Kennedy reported to
Mr. Hays that he believed it would
be the best program that Bay View
has had.

Much work has been accomplished
at Bay View in the past few months
and improvements that will be of
much help to the Greencastle cottage
owners and others who spend the
summer there have been completed.
One is the sewage disposal plant
which has been finished at a total cost
of \$11,000.

Another new addition is the post of-
fice building which has been complet-
ed at a cost of \$5,000. It is located on
Parke Avenue opposite the Bay View
House. It is equipped with about 600
lock boxes, all of which are equipped
with keyless locks. All mail will be
delivered either through lock boxes or
general delivery as there will be no
"call boxes" as has been the case heret-
ofore.

Mr. Hays says everything is in good
shape at Bay View this early in the
season. There are huge piles of snow
still at the roadsides that will be
there two or three weeks longer, but
he reports the ice gone out of the bay
which is something unusual as it or-
dinarily does not go out until about
May 10.

The post office at Bay View will
open June 1, and many summer so-
journers are said to be making their
plans to get there about that time or
a short time afterwards and some
from Greencastle will be there before
the middle of June.

PROCEEDINGS ARE STARTED

WASHINGTON COURTHOUSE, O.
—April 28—Attorneys for Mal
Daugherty, president of the Midland
National Bank and brother of the
former Attorney General, indicated
today they will institute proceedings
to prevent Daugherty being taken to
Washington.

The time set for Daugherty's arrest
ordered by the United States senate
because he refused to testify before
the committee investigating the de-
partment of justice was fixed for
noon, but in the meantime John Mc-
Grain, deputy sergeant at arms, sent
here to arrest him, wired Washington
for further instructions.

FRENCH AIRMAN HURRIES

PARIS, April 28.—Lieut. Pellier
D'Oisy, French airman who set out
from Paris Thursday in a dash for
distance flight honors, is believed to
have been overtaken by Major Mac-
Laren, British flyer who left England
last month.

D'Oisy, attempting a flight to Ja-
pan which may be extended into and
around the world effort, was last
reported to have taken off from Baska,
a frontier city of Asiatic Turkey near
the Persian gulf, for Karachi.

Major MacLaren flew from Karachi
Saturday, but was forced down in the
Sind desert and is returning to
Karachi by train to obtain new engine
parts.

CIGARETTE CAUSES FIRE

LOWELL, Mass., April 28.—A
smouldering cigarette carelessly to-
ssed on the floor is believed to have
caused the fire here Sunday which
destroyed seven buildings in the heart
of the city.

Captain Edward P. Cunningham,
was killed when a wall buckled and
he was buried beneath an avalanche
of stones. Eight other firemen were
injured by falling debris.

It is estimated the damage will
amount to more than \$500,000.

B. T. THURMAN AND WIFE PASS AWAY ON SUNDAY

Old Couple, Age 85 and 88, Died Sun-
day at Home Near Bellmore in
Parke County

Mrs. Minerva Thurman, age eighty-
eight years, died Sunday morning at
3:00 at the home near Bellmore in
Parke County. Mrs. Thurman had
been confined to her bed for several
weeks with pneumonia and this to-
gether with her advanced age, was the
cause of the death.

Within fourteen hours after the
death of Mrs. Thurman, her husband
B. F. Thurman, age eighty-five pas-
sed away. Death came at 7:00 Sun-
day evening. Mr. Thurman had not
been in good health for several weeks
and together with the shock which he
suffered by the death of his wife,
proved fatal.

The double funeral was held this
afternoon at 3:00 at the Beech Grove
Church. Interment was in the Beech
Grove Cemetery.

PRIMARY ON LAST LAP

INDIANAPOLIS, April 28.—The
Indiana primary race went into the
home stretch today with candidates
and their organizations planning a
whirlwind finish during the last week
of the campaign.

Although it is generally conceded
that there will be no nomination in
the primary of a candidate for gov-
ernor on either the Republican or Dem-
ocratic tickets, the leading candi-
dates on each side redoubled their ef-
forts to capture enough votes to put
them across.

Ed Toner, Ed Jackson and Lew
Shank, the three Republican candi-
dates believed to have the edge in
the race, have extensive speaking en-
gagements mapped out for them for
the week.

Jackson and Shank rallies will be
held in Indianapolis during the week,
while Toner will close his campaign
in the twelfth district.

Ed. Bush, also has several speaking
dates, but Mayor Davis of Terre
Haute will confine himself to organi-
zation work.

On the Democratic side, Dr. Carle-
ton B. McCulloch, party nominee four
years ago, is believed to have a slight
advantage, with Joseph Cravens and
Dale Crittenberger following close

MURPHY'S FUNERAL

NEW YORK, April 28.—Past the
sidewalks of New York where stood
with bowed heads and tear dimmed
eyes thousands he had befriended, the
funeral cortege of Charles F. Murphy
carried the remains of the dead Tam-
many leader to their last resting
place today.

After services at St. Patrick's the
remains were buried in Calvary Cem-
etry.

GREENCASTLE HIGH TO PLAY MOORESVILLE HIGH

High School Team Going Good and
Expect to Defeat the Fast Moores-
ville Nine. Game at 3:30

The Greencastle High School base
ball team will tackle the fast Moores-
ville nine on the Zinc Mill diamond
Tuesday afternoon at 3:30 o'clock.

This is the third game on the sched-
ule for the local team and although
the Mooresville high school has a
good team the local boys hope to
"grab off" a victory for G. H. S. The
line up of the team has been changed
somewhat by Coach Rhea and it is
thought this will strengthen the team
considerably. The game will start
with Black as pitcher and Campbell
catcher for the local nine.

On Friday they will meet Bloom-
ington on the Zinc Mill diamond.

TO PUBLISH DENIAL

WASHINGTON, April 28.—Cong-
ress today will be asked to give nation-
wide publicity, through the congres-
sional record, to a voluminous denial
by Secretary of the Treasury Mellon
of charges that government bonds
have been duplicated.

Mellon, in a report to President
Coolidge said that charges made by
Charles E. Brewer, department of
justice agent had been completely
disproved by an exhaustive investi-
gation by the treasury department
itself.

GOV. M'CRAY IS STILL ON THE STAND

UNDERWENT ORDEAL OF CROSS
EXAMINATION BY GOVERN-
MENT TODAY IN TRIAL

GOVERNOR IS WORN OUT

And as He Took Witness Stand Ap-
peared Haggard and Looked
Tired

INDIANAPOLIS, April 28.—Con-
tinuing his frank admission of for-
gery and misrepresentation of his fi-
nancial condition, Governor Warren T.
McCray, on cross examination in fed-
eral court today stoutly maintained
he was innocent of any attempt to de-
fraud and said he always believed he
was right in what he did.

The governor defended his acts
throughout a morning of ceaseless
questioning by District Attorney Eli-
ott in the trial of Gov. McCray on
charges of fraudulent use of the
mails.

McCray looked worn and haggard
as he took the witness stand.
Judge Anderson frequently told the
witness to restrict himself to simple
answers to the questions. District at-
torney Elliott resumed cross exami-
nation when he left off Saturday.

Every time Elliott asked the gov-
ernor about forging the names of other
persons to notes payable to himself
McCray would try to qualify his an-
swers with an explanation that he had
personally indorsed the paper.

Finally Judge Anderson said: "Mr.
Witness you must understand that
you will have to answer these ques-
tions and answer them properly."

Later the judge said: "It is strange
that a person can forge the name of
a man to a note and make it valid
by endorsement."

Mr. McCray attempted to answer
him. "This is no occasion for any re-
marks on your part," Judge Anderson
warned.

ENGLISH-FRENCH DISPUTE

PARIS, April 28.—Begin attempted
today to mediate between France and
Great Britain in their differences that
have arisen over the Dawes experts
report. Conferences between Premier
Thienus and Minister Hymans of Bel-
gium and Premier Poincare started at
the Quai D'Orsay at 10 a. m. They
were the first official pourparlous on
the experts findings.

While the Belgians were attempt-
ing to review Franco-Belgian co-op-
eration and realign this united front.

FLYER STALLED IN INDIA

KARACHI, India, April 28.—Fore-
d down onto the sandy wastes of the
Sind Desert near Bali, Major Mac-
Laren today left his British round
the world flight plane yesterday and
returned to Karachi in search of a
new engine.

The British globe girdling plane
will probably be delayed a fortnight
by the accident to MacLaren's ma-
chine which interrupted his eastward
flight from Karachi Saturday.

It is reported the British airman
will find it impossible to obtain the
necessary engine or parts in India and
that an engine will have to be brought
from Irqua by steamer.
MacLaren's flying time from Eng-
land to Partu, the desert town at which
he descended Saturday is 73 hours
and 13 minutes.

NEWSPAPER OWNER DIES

ST. LOUIS, Mo., April 28.—John C.
Roberts, organizer of the greatest
shoe manufacturing company in the
world, close friend of Woodrow Wil-
son, and owner of the St. Louis Star,
is dead here. He died suddenly Sun-
day of a stomach hemorrhage. He
was 70 years old.

Born in Readyville, Tenn., he en-
tered the clothing business in Murfrees-
boro, Tenn., later moving to Nash-
ville to engage in the clothing busi-
ness.

In 1880 he came to St. Louis as a
salesman for the Hamilton Brown
Shoe Company. Seventeen years lat-
er he organized the Roberts, Johnson
and Rand Company, and pushed his
business aggressively.

Nine years ago with Roberts, John-
son and Rand as a nucleus, he orga-
nized the International Shoe Com-

PERSONAL AND LOCAL NEWS

S. H. Rosenthal spent the week-end in Chicago.

Dr. A. W. Broadstreet was in Indianapolis today.

J. C. Darnell, of Roachdale, was in this city on business.

Erwin Randall was here from Cloverdale on business today.

H. C. Foster, of Cloverdale, was in this city today on business.

E. Coffman, of Cloverdale was a business visitor in this city today.

Miss Edith Harlan is spending a few days visiting in Terre Haute.

Miss Gladys Siddons, of Fillmore, was in this city Saturday on business.

Earl Toney of Bainbridge spent Sunday with Mr. and Mrs. Charles Toney.

Harold Phipps and wife of Gary are visiting Mr. and Mrs. Roscoe Dagg.

John H. Stoner of Gary spent Sunday visiting friends and relatives here.

Behive Rebekah lodge, No. 106 will meet in regular session tonight at 8 o'clock.

Simpson Stoner of Gary spent Sunday with his parents Mr. and Mrs. C. E. Stoner.

Harry Williams, son of Mr. and Mrs. Everett Williams, city, is ill of the mumps.

Mr. and Mrs. Heber Ellis and family motored to Knightsville Sunday an visited relatives.

Mr. and Mrs. F. C. Yeager motored to Rockville today to attend the funeral of Mrs. John H. Spencer.

Mr. and Mrs. Thomas Johnson of Brazil visited Mr. and Mrs. Charles Toney over the week-end.

Arthur Raines was in Indianapolis on Monday and took in the John Robinson circus showing there.

Herbert Rosenthal who has been visiting his parents in this city has returned to his home in Chicago.

The Boston Club will meet this evening with Miss Laura Ammerman on east Seminary street at 7:30 p. m.

The Greencastle band will practice this evening at 7:30 o'clock. All members are requested to be present.

Louis Zaharakos, who has been visiting in New York City for the past several months, has returned to this city.

The condition of William Thompson who suffered a stroke of apoplexy last Tuesday night, is reported more favorable today.

Mr. and Mrs. Chester Hunt and daughter of Indianapolis were visitors with Mr. and Mrs. Oscar Sallust over the week-end.

Miss Grace Burdett, who is employed in Indianapolis, is spending the week-end with her parents, Mr. and Mrs. Burdett, of this city.

Mr. and Mrs. Frank Bittles were in Dunkirk Monday for the funeral of their grandfather, B. F. Seamons, held at the home in that city.

Prof. J. P. Naylor arrived home Sunday afternoon from Washington, D. C. where he attended the meeting of the American Physics Society.

The Red Men lodge will meet this evening at the local headquarters. All members and members of the drill team are requested to be present.

All members of the drill team of Modern Woodmen of America, must be present at a meeting called this evening in the lodge headquarters. A trip will be taken Friday night.

J. T. Yeager and daughter Miss Mary of Martinsville, Mr. and Mrs. C. R. Wilson and daughter Miss Helen of Mooresville spent Sunday with Mr. and Mrs. F. C. Yeager and family.

Mrs. Fred Frank, who underwent an operation at Lafayette several weeks ago, was moved to the home of her parents, Mr. and Mrs. M. F. Burdett, of this city. Mrs. Frank was reported doing nicely.

Dr. Royal J. Dye, an internationally known missionary from Africa, will give an entertaining and instructive lecture at the Christian Church on Tuesday evening at 7:30 o'clock. He is a fine orator and will give great inspiration to his hearers. Come and bring a friend.

Mr. and Mrs. Samuel P. Bowen had as their guests for dinner Sunday: Mr. and Mrs. Jonathan Houck, Lloyd Houck, wife and son; Mrs. Ed. Houck, David Houck, wife and son; Bettie Browning and daughter Nellie, Albert Allee, D. S. Bowen and wife of Coatsville, George Landis, wife and granddaughter, Mary Florence.

Word was received here late Saturday afternoon from Mrs. Raser Bittles, announcing the death of her father, Benjamin Franklin Seamons, age 84 years at the home in Dunkirk. Mr. Seamons had visited in Greencastle numerous times and will be quite well remembered by the friends he made in the city. The funeral services were held Monday afternoon

at one o'clock. Burial was in the Farmland Cemetery.

John Harvey of Russellville was a visitor in the city Monday.

M. C. Chastain, of Roachdale, was in this city today on business.

M. C. Dickerson, of Roachdale, was a business visitor in this city today.

Ross Shillings of Cloverdale was in the city transacting business today.

Glenn Clodfelter, of Roachdale, is assisting his brother, W. O. Clodfelter at the County Treasurer's office.

Miss Ollie Terry, of this city, was the Sunday guest of Mr. and Mrs. George Wilkerson, of Crawfordsville.

The Present Day Club will meet with Mrs. E. E. Taylor on Wednesday at 2:30. Members please notice change of date.

Miss Ollie Terry of this city and Ruel Heaney of Lafayette spent Sunday in Crawfordsville visiting Mr. and Mrs. George Wilkinson.

There will be Cottage Prayer meeting Thursday morning at nine-thirty o'clock in the home of Mrs. Ed Sharp on Olive St. Come.

Mrs. May Moler has arrived home from Indianapolis where she has been attending a three day session of the O. E. S. Grand Chapter and looking after school interests.

Mr. and Mrs. John S. Browning and daughter, Mrs. Frank Thompson of Indianapolis spent Saturday evening and Sunday with Mr. and Mrs. Orylle Thomas, north of the city.

Misses Elsa and Phosia Rapp of Flat Rock and Dorothy Lewis of Milan, Indiana, visited Mr. and Mrs. O. E. Ladger today. Miss Phosia and Miss Dorothy will enter DePauw this fall.

Louis Parker, colored, and James Price, colored, who were tried before Judge James P. Hughes in the Putnam Circuit Court Saturday and sentenced to a term of from two to five years were taken to the State Reformatory today by Ben Pace and Artie O'Hair.

LOCUST STREET NOTES

Sunday was a day full of interesting services for Locust Street. The Sunday school attendance broke the record in this regard for many years past, 351 being present. Boys' Day brought new faces, and the Boys and Girls Sunshine Band, under the leadership of Evangelist Lewis also helped to create more interest than usual. The contest by the classes which has been on for several weeks also added interest to the day and all these features helped make a record attendance.

A large audience was present to hear the three strong, eloquent sermons delivered by Evangelist Lewis. "What Think Ye of Christ?" was his morning text, and he gave a most earnest and interesting sermon on the mission of the world's Re-

deemer. Rain hindered the afternoon and evening attendance but there was a large audience at both services. There were twenty-five who came forward at the afternoon service for a better consecration to the Christian life. The evening sermon dwelt on five great subjects, based on Bible texts and for one hour Evangelist Lewis in his most earnest, logical and powerful manner showed the sensible answer to these great subjects based on the Bible and a sound Christian faith. The large audience was deeply impressed. The Sunshine Chorus, boys and girls, are much interested and their work grows in interest and attendance.

DePauw Notes

One of the cleverest stunts ever presented at chapel time was put over this morning by a McCutchan-Thompson-Student trio. Dean Robert G. McCutchan announced to the students and faculty that he had asked several members of a music composition class to write short four measure themes and have them present at chapel this morning. He then called for them and four or five were handed to him upon the platform. Then Dean McCutchan called Prof. Van Denman Thompson to the organ and asked him to go over the presented pieces and from one or two of them improvise a sonata while seated at the Bowman organ.

Prof. Thompson stepped to the organ, looked over the music handed him, played the air of two of the numbers, and then set to work composing a sonata. Without ever having seen the music which consisted of only a dozen or so notes, Prof. Thompson played a wonderful sonata, ranging in its intensity from the soft, plaintive notes to the bombastic militant type, playing the entire range of the organ using the thunderous heavy foot notes and the high treble bird like notes, ever repeating the theme of the two selected compositions.

The close of the magnificent number brought a deafening applause from the audience. Prof. Thompson rising merely to accept the praise with a quaint bow and smile. It was one of the great moments in the history of chapel times this year and those who missed the half hour missed what will go down in chapel lore as one of the most interesting and entertaining periods ever conducted.

Prof. Thompson, on first playing the air of one of the handed in numbers, remarked, "I rather suspect that that is the tune that the old cow died on," but from it he wove an accompanying harmony to which a king could have in state rode through cheering populace or mighty warriors been inspired to greater valor, and yet dainty fairies could have gambled on the green to many of the softer measures.

There is only one Van Denman Thompson; DePauw is to be congratulated on having on her faculty this one.

On Tuesday morning Dr. George Richmond Grose will attend his last chapel this year, for Wednesday he leaves for the East where he will attend the General Conference of the Methodist Episcopal church which will convene during the month of May. He will return in time for the Commencement Exercises. Especially are the senior men and women asked to be present tomorrow morning.

Money's Worth or Money Back

Capital's Service To The Consumer

Says James J. Davis, Secretary of Labor, "No matter who owns the capital, capital works for everybody. The oil companies own the gasoline, but they have to tote it to the roadside where everyone can get it. Equal division is the goal that capitalism constantly approaches. No man wants all the gasoline. He wants six gallons at a time with a service station every few miles. Capitalism performs this service for him. Under 'capitalism', so-called, wealth is more equally divided than under any other system ever known."

The so-called "capitalists" who control the Standard Oil Company (Indiana) are 46,016 stockholders, the majority of them small investors who earned and saved the money to buy stock.

This capital, because it is brought together in a large aggregate, is able to serve the community more effectively than if it were divided up and parceled out into 46,016 separate holdings.

In 1923 this capital brought millions of barrels of crude petroleum from the oil fields, so that during 1924 the 4 1/2 million automobiles of the Middle West may be supplied with gasoline and oils.

This capital has erected large, modern, scientifically equipped refineries, in which to apply the most efficient cracking processes, so that the maximum amount of gasoline may be produced from the crude oil.

This capital has built up a distribution system, with storage depots and service stations at strategic points, throughout the Middle West. By means of this enormous and complete distribution system, petroleum products are delivered to the ultimate consumer with the utmost economy, and the motorist who needs but one gallon at a time receives as efficient service as the manufacturer who buys thousands of gallons.

Without capital the oil would stay in the ground, or at best would serve but a few people adjacent to the oil fields.

By serving the thirty million people of the Middle West with petroleum products, the Standard Oil Company (Indiana) makes it possible for you, wherever you may live, to enjoy the benefits of the petroleum wealth of the United States. Without the employment of the capital of the stockholders of this Company this would not be possible.

Under efficient management of a highly experienced Board of Directors, the capital of the 46,016 stockholders of this Company is working night and day for the service of the community.

CHRISTIAN SCIENCE LECTURE

(Continued from Page 1)

Christ Jesus indelibly in the sight of all who accept and strive to follow his teachings, as the Way, the Redeemer, the Saviour of humanity. The Principle of Christian Science, understood, is nothing new. It never been claimed by Mrs. Eddy of any of her recognized students of any, but, on the contrary, to be as ancient as the days of the world. It has been known to certain of the people throughout all ages, and it was known more clearly, and it was more widely and successfully taught by Jesus and his disciples than any that preceded them, or by that followed them, down to the time that the divine light of revelation shone into the consciousness of the human, wearied of scholastic theories and sophistry, in a modest England home. Apparently lost for centuries, the light whereby this Principle could be put into operation as a tangible, practical, usable, workable agency, for the benefit of humanity here and there, was rediscovered by Mary Baker Eddy. This is her claim to our attention, our affection, our reverence. Her great task, the greatest woman has ever been called to perform, was to proclaim the Principle, convincingly, to a material world, her marvelous revelation. In her own simple but beautiful language, she tells us when and how each of her steps was taken. It proved by demonstration every step which she set down in writing. This she was enabled to do

through the spiritual illumination of the Scriptures which preceded, accompanied, and followed her own remarkable healing, and through her entire dependence upon the Bible thenceforth for instruction and direction.

Just as the Discoverer and Founder of Christian Science places the Bible first at all times; just as she looks to it and clings to it at all times for inspiration and for strength; just as she has given it first place in the services of the church which he instituted and established, so do all of her loyal followers solemnly subscribe to the tenets she has given that church, the very first of which reads: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal life" (Science and Health, p. 497). It is entirely within reasonable bounds to say that in no other class or denomination of professed religionists is the Bible esteemed more highly or studied more regularly, closely, earnestly, or intelligently, than it is among Christian Scientists. The Christian Science textbook, Science and Health, is an exposition of the Bible, a "Key to the Scriptures," and as such, it has already unlocked for millions, as it shall unlock for countless millions to come, inexhaustible treasures of spiritual wisdom and understanding.

It must never be forgotten that Christian Science is engaged first and last, and all the time, in the task of restoring to the world the Word and continuing the works of Christ Jesus; that its highest mission and its greatest joy is to labor unceasingly for the bringing back of primitive Christianity in all its purity, simplicity, and grandeur, and to reestablish, in a world sorely in need of it, that assurance of present-day salvation from error and its consequences, which the Master promised to all who would keep his commandments. He came with healing in his thought, with healing in his voice, with healing in his touch—with healing in his heart—and he went about everywhere doing good, yet sorrowing in his labor of love over the ignorance and perversity of men. Now, as in his day, the Word through Christian Science, is healing all manner of disease and all manner of discord, yet Christian Scientists know that, as in Jesus' day, the healing of physical ailments is a means, rather than an end.

Because of the stiffness of their necks and the rebelliousness of their will, in our times as was the case twenty centuries ago, the great majority of human beings must be impressed by some tangible evidence, of their understanding, of the all-important part which spiritual law plays in regulating their lives, their affairs, occupations, and circumstances; in determining the success of their careers, in solving their minor

as well as their major problems. Only thus are they brought to recognition of the ever-presence of God, and to a realization of the fact, that the paramount mission of Christian Science is not the healing of sickness and disease, but the destruction of ignorance, fear and sin, which lie at the root of all human sorrow and suffering.

Christian Scientists make no stronger pretensions of belief in the Bible than do other professed Christians, but Christian Scientists go further than belief; they trust and strive to understand. And according to the measure of their understanding do they make practical application of Bible truths and achieve demonstration. Here is where the great difference lies. One might believe in mathematics fervently, devotedly, indefinitely, without ever getting further than belief. Mere belief would never solve a problem in figures. One must take chalk, or pencil or pen in hand, and work the problem out in accordance with the rule of the science, if anything worth while is to be accomplished. Christian Scientists prove the truths of the Bible by understanding and demonstration as they go along, and bring realization of its prophecies and promises into their everyday experience.

It cannot be denied that Christian Science holds universal attention today. So-called skeptics and infidels, no less than orthodox Christians, are keenly interested in its doctrines and its demonstrations. The throngs of non-Scientists which everywhere throughout the world flock to Christian Science lectures, to Christian Science testimonial meetings, and to Christian Science services, afford ample proof of this deep and widespread interest. All classes of people see with their own eyes and hear with their own ears something of its accomplishments for the good of humanity and the glory of God, and are seeking to learn more about it. And who should hinder them in this seeking, since wisdom, the understanding of man's true relationship to omnipotence, is to be desired beyond all else that may be sought or attained in this world?

"Whence then cometh wisdom? and where is the place of understanding?" asks Job. And he replies: "God understandeth the way thereof, and he knoweth the place thereof. For he looketh to the ends of the earth, and seeth under the whole heaven... And unto man he said, Behold, the fear of the Lord, that is wisdom; and to depart from evil is understanding." "Wisdom is the principal thing," said Solomon in his proverbs, "therefore get wisdom; and with all thy getting get understanding."

To obtain an understanding of Christian Science is to obtain an understanding of the one ever present and supreme power in the universe, reverently named God, a term which in Christian Science embraces all that is good, and to obtain at the same time an understanding of man's relationship to this infinite Being. Those who are really earnest in the desire to know God, come in the right frame of thought, if they come to Christian Science as little children, trustful and hopeful, receptive of and eager for light, and determined to profit by it.

It is all-important that a right beginning shall be made. To begin rightly is to provide one's self with a copy of the Bible and of the Christian Science textbook, to study both zealously and religiously, and to put their teachings into practice as fast as an understanding of them is gained. All of the Christian Science is contained in these two inspired volumes. To study the Bible and Science and Health, intelligently and profitably, demands of the student constant recourse to prayer, as prayer is understood in Christian Science. It is a fact, strange as it may appear to those of other religious denominations, that through Christian Science many thousands of earnest and devout Christian people have been instructed for the first time how to obtain results from prayer. When we learn how to pray as Christian Science teaches, in that same hour we also learn how to help and heal ourselves and how to bring comfort, peace and healing to others.

Multitudes have come into Christian Science, seeking and finding health; seeking and finding a larger share in the refinements and comforts of life; seeking and finding domestic tranquillity; business success; financial ease; multitudes will continue to come into Christian Science in the hope of gaining the mental freedom, the contentment and peace they have sought elsewhere in vain and if their purpose be honest, they shall not be disappointed. But the vast majority advance in Christian Science because they have, in progressive step by step, made every other consideration secondary to that of rising in spiritual understanding and working out their own salvation. In no other way than by accepting the many invitations of Christ to come unto him, to bring our burdens and our problems unto him, to bring our burdens and our problems to him, to ask of the Father, in his name, believing, anything we need—not something we simply want—may divine assistance be obtained along the way of salvation. To gain healing or salvation, we must be ready and willing to abandon self—self-satisfaction, self-righteousness, self-justification. Self is the principal obstacle to our progress in Christian Science. Self would block the way. We must get of self—but how? By realizing that we are nothing of ourselves, can do nothing for ourselves, because infinite Mind is All-in-all—by throwing up our hands in complete and humble surrender, and declaring, with all the sincerity, earnestness and devotion we can command, "Not my will, but thine, be done." When this point is reached, and we are trusting divine Love, not partly, but wholly; not conditionally, but absolutely; the point of healing is also reached, and salvation to crown the healing is come. For then the glory of God shines into the heart

There is nothing in Christian Science that partakes of the puerile, the weak or the effeminate, as any of these terms may be offensively used; but there is everything that is vibrant with action, vigor, and force. Christian Science, as a class, are not asked for a high order of intelligence, for clearness of perception, for resourcefulness in business or profession, for earnestness in the performance of their tasks, for cheerfulness in their labor, for happiness in their play.

Christian Science is abreast with the advanced thought of the age upon all questions of vital interest to humanity. It is pronouncedly and uncompromisingly for the maintenance of law and order. It is for the upholding and rigid enforcement of liquor prohibition. It is heart and hand with education, since it prays and works constantly for the elimination of all ignorance. It favors and fosters all that makes for refinement, true culture, purity of the spoken and the written word, courtesy, kindness—everything that is beautiful and edifying in art—everything that tends to improve public taste, public life, and public morals.

FUNERAL DIRECTOR
PRIVATE CHAPEL
AMBULANCE SERVICE
Washington St. & Spring Ave
Phone 815

Christian Science has already elevated the thought and, consequently, the character of vast numbers of people in all parts of the globe, and every one of these, if he be doing his part, is spreading the truth, expressing his gratitude, not by intruding his faith upon others, nor by engaging in acrimonious controversy, nor by indulging in useless and fruitless argument, but by living that faith and letting his light shine.

Through the reflection of Life, Truth and Love, among Christian Scientists, the omnipotent power of God is being more widely recognized among thoughtful people now than ever before, and there is coming into the consciousness of the nations, slowly but surely, a sense of reverence for the spiritual which will eventually unify the thought as well as the interests of men.

The Christian Scientist, if he be faithful, prays without ceasing; and he prays not to God made in man's image and likeness, but to infinite Mind, infinite Truth, infinite Life, infinite Love—to the Being who lacks nothing in wisdom—to the One who knows without being told what is best for His children, and who has already provided for them out of the amplitude of His inexhaustible store, everything they need. The Christian Scientist prays constantly for light and understanding, for the Mind to be in him which was also in Christ Jesus. He prays, if he be true to his faith, that he may be a good man, a good friend, a good citizen; and, with all his praying uttered or unexpressed, he prays that righteousness, justice, harmony, and tranquility shall dwell in the consciousness of men throughout all the earth.

Christian Science is essentially a religion of faith, hope, love, these three. To the Christian Scientist the greatest of these is love, because it comprehends all—that love which "doth not behave itself unseemly, seeketh not her own, is not easily provoked, thinketh no evil... beareth all things, believeth all things, hopeth all things, endureth all things,"—that love which from our very beginning in this new-old faith prompts and urges us to strive constantly, and enables us to strive successfully, against every suggestion of error, against every suggestion of evil, against every personal resentment, every personal dislike—against every unjust, uncharitable, unworthy estimate of those with whom we come in contact—until we are brought to a clearer conception of our place in the divine plan, to a fuller realization of our responsibility to God to our neighbor, and to ourselves.

NEWS OF COLORED FOLKS

Eunice Miles and family motored to Indianapolis Sunday to visit their son and brother Russell Miles. The latter has been ill for the last few days.

Miss Almada Woods returned to Greencastle Tuesday after spending a few days in Indianapolis.

Miss Mattie Pearl Julian has returned to Greencastle from a visit in the South.

Mr. John Newson spent two days of the Easter vacation in Indianapolis, visiting friends and relatives.

Mr. and Mrs. Bernice Smith attended the Shriner's Ball Monday evening.

IN MEMORIAM

In loving remembrance of our dear father, W. B. Swain, who died one year ago today, April 28, 1923.

He was a father fond,
A friend both dear and true.
A better father never lived,
His equals were but few.
Years roll on and we must bear,
Whatever is our lot,
But as long as life and memory last,
He will never be forgot.
THE CHILDREN

NOTICE OF SALE OF SCHOOL BONDS

Notice is hereby given that the undersigned Trustee and Advisory Board of Jefferson School Township, Putnam County, Indiana, will receive sealed bids at the Central National Bank of Greencastle, Indiana, until the hour of 4 o'clock p. m. of Monday, May 5th, 1924, for an issue of Thirty-seven Thousand Nine Hundred (\$37,900.00) Dollars of said Jefferson School Township Five (5%) per cent School House Bonds; said Bonds are numbered from one (1) to fifty-six (56). All of said Bonds are in the denomination of Six Hundred seventy-five (\$675.00) Dollars, excepting the last two which are each in the sum of Seven Hundred Twenty-five (\$725.00) Dollars, and all bonds dated May 5th, 1924, interest payable semi-annually. The first two bonds to become due July 15th, 1925, and the next two bonds to become due on January 15, 1926, and a like number of bonds in like amount shall be due each July 15th and January 15th respectively thereafter until January 15th 1939, when the last two bonds become due each in the sum of Seven Hundred Twenty-five (\$725.00) Dollars. Each bid shall be accompanied by a certified check for Five Hundred (\$500.00) Dollars plus the premium offered to be paid for said Bonds, if any. Said check shall be payable to Gilbert E. Ogles, Trustee of Jefferson School Township, Putnam County, Indiana. The said Check being a good faith guarantee of the bidder to purchase and make full payment and settlement for said Bonds. All bids submitted will be opened by said Trustee at said Bank in the presence of the Advisory Board and bidders present.

The said Trustee and Advisory Board reserve the right to reject any and all bids. No bids will be considered for less than par value plus the accrued interest on said bonds.

Dated This April 14th, 1924.

NOTICE

PETITION TO IMPROVE HIGHWAY
Noticet is hereby given by the undersigned Auditor of Putnam County, Indiana, that there has been filed in his office a petition by Theodore Crawley, et al, for the improvement of a certain highway in Greencastle Township, said County and state, and that said petition is set for hearing before the Board of Commissioners of said County, on Monday, May 5th, 1924, the same being the first day of the regular May Term, 1924, of said Board, and which said petition is as follows, to-wit:

Petition for improved highway in Greencastle Township.
State of Indiana, Putnam County, SS: To the Honorable Board of Commissioners of Putnam County, Indiana:

We, the undersigned free holders and voters of Greencastle Township, Putnam County, Indiana hereby petition for the improvement of the following established highway, to-wit: that part of the established highway in said Township known as the Greencastle and Limesdale Road, described as follows:

Beginning at the intersection of said road with the south line of Hanna street in the city of Greencastle and running thence southwardly with said Highway to the south line of section twenty-nine (29) township fourteen (14) North of Range Four (4) West, a distance of about one and three-fourths miles, and we ask that that portion of said highway above described, be improved as follows:

1. That the grade of said highway, where it is now less than twenty-four (24) feet in width, be widened to a width of twenty-four (24)
2. That said road be resurfaced and repaved with concrete to a depth of eight to six inches and a width of eighteen feet (18).
3. That in making said improvement, so far as it is practical the present surface of said road be retained and used as a foundation for the concrete pavement with which said road is to be repaved and resurfaced.

(Said petitioners ask for the improvement of the road less than three miles in length connecting at each end with free gravel or macadamized road and connecting at the north end with the boundary line of the incorporated city of Greencastle, Indiana.)

Signed by Theodore Crawley and 384 others.

In witness whereof I have set hereunto my hand and the seal of my office at Greencastle, Indiana, this 19th day of April, 1924.

W. D. LOVETT,
Auditor of Putnam County, Indiana 21-28

Watch your pimples vanish
Why? Pimple-Poison goes when Red-Blood-Cells increase! S. S. S. builds these Red-Blood-Cells!
You can be sure of this, nature has no substitute for red-blood-cells. Pimple-poison can't live in the red rivers of your blood as long as there are

Every woman, every man, can now have a face clear as a Rose-Petal! enough rich red-blood-cells in it. More red-blood-cells! That is what you need when you see pimples starting at you in the mirror. Blackheads, pimples are worse! Because it is worse yet! You can try everything under the sun—you'll find only one answer, more red-blood in your blood! The tremendous results, produced by an increase in red-blood-cells is one of the A. E. C.'s of medical science. Red-cells mean clear, pure, rich blood. They mean clear, ruddy, lovable complexions. They mean nerve power, because all your nerves are fed by your blood. They mean freedom forever from pimples, from the blackhead pest, from boils, from eczema and skin eruptions, from rheumatic impurities, from that tired, exhausted, run-down feeling. Red-blood-cells are the most important thing in the world to each of us. S. S. S. will build them for you. S. S. S. has been known since 1875, as one of the greatest blood-builders, blood-cleaners and system strengtheners ever produced. S. S. S. is sold at all good drug stores. The large size bottle is more economical.

"The Amherst"—A Five-Room House

A Comfortable Home of English Type

"Thou Shalt Not Covet Thy Neighbor's House" is the tenth commandment. You won't if you have a comfortable and substantial home of the English type like the Amherst. The architect has cleverly adapted English motifs to American requirements, giving as a result, an exterior that is home-like and inviting, as an examination of the plan will show.

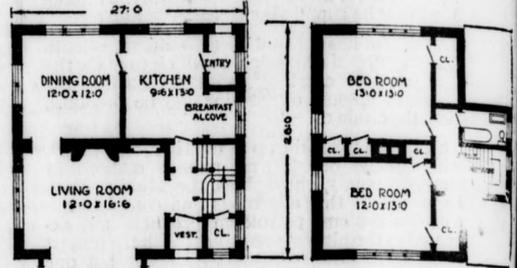

Frame or cement block with portland cement stucco was chosen for wall construction to insure permanence and rigidity. Concrete tile or cement asbestos shingles add the final touch to make the house fire-safe.

The dominating feature of the first floor plan is the comfortable living room. Instead of the customary bay window of English type, the architect has contrived a fine sunporch in connection with the living room in American style, but nevertheless has managed to harmonize its exterior with the English tradition.

The square, well-lighted dining room is entered directly from the living room or kitchen.

The kitchen is cleverly arranged and has two windows, one of which is located in the breakfast alcove, which is amply sufficient for the morning meal and the housewife's noonday lunch.

Two good bedrooms, well lighted and cross ventilated, are found upstairs. The rear bedroom has two medium-size closets and one extra large closet, deep and roomy. The front bedroom has one medium-size closet and a deep and roomy closet similar to the one in the rear bedroom. For the occasional guest, one of the popular bed davenport in the living room will expand the household accommodations, or a dis-

FIRST FLOOR PLAN. SECOND FLOOR PLAN. There is plenty of room in the peering wall bed can be installed in the closet at the right of the living room fireplace. roof space for two good bedrooms if needed; otherwise this space can be used to store seldom-used articles.

Are You Standing in Your Own Light?

Don't overlook this convenient outlet at the end of the drop cord switch.

Are there not some dark corners in your kitchen, don't you find it difficult to see into the oven or in the cupboards or under the sink, don't you find yourself casting shadows across your work at the sink or stove or table?

Daylight Kitchen Unit

Eliminates all these kitchen light troubles, it gives you an artificial daylight so diffused that every corner is illuminated. It is not possible for you to get in your own light if you have one in your kitchen. Hundreds of kitchens are now being lighted with this wonder light.

DON'T DELAY

Our 30 day free trial offer is for a limited time only. Let us install one in your kitchen before it is over. If you are absolutely satisfied the cost is 60c a month for twelve months added to your light bill.

April Twenty-ninth

Eight O'clock

H. S. Notes

The High School parent-teachers' association will meet this evening at 7:30.

After the business session an insight into the factory plan system will be given in the manual training department.

Mr. B. A. Knight, who during the summer is a teacher in the State Normal school at Terre Haute, is giving our boys the same course with the modifications that the difference in age makes necessary.

Last summer his class at State Normal built a house and this summer will build another.

His classes here are active in outside practical work, assisting people in designing houses and garages. They also have built one garage.

Four of his boys are working with architects. One boy is working every day as the architect's chief draftsman. Mr. Knight's boys are sent out on excursions to observe houses in the process of construction and later in the class room make sketches of what they have observed and from these sketches construct slides. In order to display in detail the building processes this is the system that no other school in the state has. They also have an interesting system of reversing plans.

Because this department has been developing along practical lines and

have taken such a prominent place in the state, it being able to give three years toward graduation in the state department.

We are showing tonight to our home folks one thing in our public school system that is attracting state wide attention.

Come and bring your friends. The result of the election for Boys' Week in the high school is as follows:

Mayor, John Campbell.
Councilmen, Robert Knight and John Howard.
City Clerk, William Blanchard.

INDIANAPOLIS LIVESTOCK

INDIANAPOLIS, April 28—Light receipts of 4,000 gave a firm tone to the hog market here today. Some sales were a nickle higher.

Practically all sales were made at \$1.60. Heavies were at a slight discount, selling from \$7.50 to \$7.60. Smooth packing sows sold at \$7 down, with the bulk moving at \$6.75. Roughs brought from \$6 to \$6.50. Demand for pigs was somewhat duller, and only choice heavy pigs brought the top of \$7.

Cattle trading was slow, with prices tending to shade slightly. Traders are of the opinion the local market is a trifle out of line with other centers. Receipts, 1,100.

Many good veals were selling at \$10, with the bulk from \$9.50 to \$10. A few fancies were able to command \$10.50. Receipts were 800.

With less than 50 sheep in the pens, trading in this division was practically at a standstill. Prices were only nominal, lambs being quoted at \$15 down and sheep at \$8.50 down.

Building Materials for Your Home

When you start building your home call on us for the building materials. We carry a complete stock of standard building materials and our prices are always right.

OUR LINE INCLUDES

- Face Brick
- Plaster
- Roofing
- Cement
- Mortar Color
